#### Injuries hit Heels hard

From staff reports

Injuries, which contributed to North Carolina's fading finish during the 1981 football season, have hit early this year.

Alan Burrus, a senior from Shelby, underwent surgery Sunday as a result of a knee injury suffered in the first quarter of the Vanderbilt game.

"Alan tore the medial collateral ligament in his right knee, which is the opposite knee of the one he injured against Virginia last year," orthopedic surgeon Dr. Timothy Taft said. "He's played his last game for UNC."

All-American offensive guard David Dreschler, still hobbling on a sprained ankle throughout the Vanderbilt game, is listed as a starter for Saturday's Army game.

But UNC coach Dick Crum announced Sunday that tailback Kelvin Bryant and cornerback Greg Poole would not play against Army. Bryant, who gained just 27 yards Saturday, is still bothered by a sprained ankle he suffered in preseason drills. He carried the ball only once following the first quarter.

"I didn't think Kelvin was full speed in the second half so that's why we didn't use him," Crum said. "It wouldn't have been fair to him to let him play at half speed. Plus, he could have hurt himself more."

Greg Poole did not suit up for the Vanderbilt game because of a pulled hamstring. He will be replaced by sophomore Larry James against Ar-

Chris Ward, a senior linebacker for the 11th-ranked Tar Heels, was named as one of the Atlantic Coast Conference Defensive Players of the Week. Linebacker Andy Hendel, a junior at N.C. State, was named the co-winner for the week.

Ward, from Cincinnati, had 11 solo tackles and two assists in North Carolina's 34-10 victory over Vanderbilt on Saturday. He also caused two

The weekly selections of players of the week in the conference are made by a special committee of the Atlantic Coast Sports Writers Association.

#### NFL strike leaves players, networks, fans out in cold

The Associated Press

Around the National Football League, things were not restful on the first day of pro football's first regular-season strike.

"My impression is that we are very unified," Minnesota Vikings offensive guard Wes Hamilton said. "I don't think you'll see any of our players cross the picket line."

Players in Philadelphia and Dallas could not have reported for workouts even if they wanted to: owners in those cities locked their stadium gates.

At issue is how to carve up the NFL's billion-dollar profits over the next five years. The union originally wanted more than half of all revenues, and then half of the television revenues. The owners rejected both demands, and on Tuesday issued a terse statement that said no players - including those who are injured — will be paid during the strike.

The first game to be canceled because of the strike will be Thursday night's Atlanta-Kansas City matchup. Every regular-season weekend without football will cost the NFL teams an estimated \$42 million, and the players will lose about a half-million dollars in salary each week.

In Cleveland alone, the economy will lose about six million for every home Browns game that is lost to the strike. One suburban bar owner said he will lose up to \$3,000 just on Monday nights, when ABC normally televises a game.

In three skyscrapers in midtown Manhattan, there was a type of gambling going on. Network sports officials were scurrying to plug the scheduling holes. After toying with and then apparently dropping the idea of moving top college football games from Saturday to Sunday, CBS said it will have a program on the strike this Sunday and then show highlights of the last Super Bowl.

NBC said it will broadcast two Canadian Football League games instead of its scheduled NFL games on Sunday, and ABC said it will substitute movies on Monday night.

Around the league, various players were saying they hoped that people understood why they were striking for a fair share of the profits instead of blaming them for being greedy while they earn an average of nearly \$90,000 a year.

Experience and strength from the top of the lineup to the bottom. That is the prognosis for the third edition of UNC Tennis, Allen Morris style.

This year the team will be loaded with experience as six seniors return, three of whom were members of last year's starting six. Coach Morris said choosing this year's top six or eight will be difficult at

"We have a lot of boys awfully equal," he said. "It will be a tough coaching job this season. We have six seniors out of 12 players that have been here playing for a couple of years, and we have an outstanding new group challenging them."

The Tar Heels had a modest 15-11 record last year, finishing third in the ACC. While this year's conference battle will be no cakewalk, the Heels' depth should help them challenge Duke and Clemson.

Ken Ludwig is the highest ranking senior returning. Playing in the number three position, he compiled a 16-13 record while gaining valuable experience which he now brings-into his final season.

John Grigg, who played number six and turned in a record that saw him two wins over the .500 mark, is also back this year. Morris said Grigg was hampered by a lack of experience last year, but he has now acquired some.

The last returning senior in the top six missed the latter part of the season due to a freak arm injury. However, Ken Whitaker is well and hopes to again challenge for a starting spot.

Junior Josh Sarner had the team's best record - 17-9 - and played number five. With his experience and a summer of good tournament play, he too looks like a repeat starter.

The number two man of a year ago is back. Ron Erskine didn't have a great year, but he was only a sophomore. Thus, he has two years and a priceless wealth of experience going for him this

#### MARK OF A LEADER

Caxton's moveable type completely changed English society.

In 1475, when William Caxton printed the nirst E started a quiet revolution. A free flow of ideas makes constant change inevitable.

Northern Telecom started its own quiet revolution, one that's also radically changing the way ideas are communicated. We were the first company to design and produce a full line of digital switching systems, the telecommunications technology that transmits both voice and data with

digital signals. Our success convinced many skeptics that digital communications was truly the wave of the future. As private and public digital networks grow, an international web of integrated voice and data communication is gradually being created. Instantaneous access to global data banks is becoming

a reality.

Today Northern Telecom is a world leader in digital switching systems, in related technologies fiber optics, large-scale integrated circuits — and in electronic office systems.

By merging computers and telecommunications, Northern Telecom is changing the way the world communicates.

What we've accomplished so far is imaginative, talented people to be a part of our growth. If you want a career that combines stability, creativity, and limitless opportunity, we'd like to talk with you. You can make your mark in the

Intelligent Universe. See your placement office to schedule an interview with our Division Representative from Digital Switching/Raleigh, on campus October 1st.
