For The Serious Photographer Only

Foister's Asks:

Have you invested over \$500.00 in a 35mm camera and optically top-notch lenses? Do you travel frequently and take high quality photographs of fascinating subjects? Do you use the finest color film in the world, Kodachrome, when subject lighting permits? Do you take pride in making slide presentations to your friends and/or customers of the unique images you have captured?

If the answer to most or all of these questions is "YES", then Foister's thinks you should consider one final question:

"Are you letting yourself and your images down at the final stage by projecting them with a \$100.00 projector through a \$25.00 lens???"

Foister's Camera Store has the E. Leitz & Co. model RT-300 AV slide projector in stock. It features Leitz optics and the brightest, truest color rendition available. You'll see this yourself when we demonstrate it to you side by side with the most popular projectors on the market. Come see the difference so you won't let your images down at the final stage.
