

3 outstanding faculty alumni die

Clyde C. Carter, professor emeritus of business law at UNC and retired colonel in the Air Force Reserve, died Jan. 2.

Carter, 80, specialized in business law and governmental regulation. He taught at the University from 1946-74.

He was the author of "State Regulation of Commercial Motor Carriers in North Carolina", a 1959 book from UNC Press that discussed the organization and history of the State Utilities Commission and other aspects of commercial carrier regulation. He also wrote about state regulation of tobacco marketing.

His military service spanned more than 20 years and included duty as a military intelligence officer in China during World War II. He was recalled in 1951 and served as director of Air Force ROTC at Headquarters Fourteenth Air Force and then with AFROTC headquarters at Air University, Maxwell AFB, Alabama.

He was commander of the Durham flight of the 9945th Air Force Reserve Squadron when he retired from military service in 1964.

Victor August Greulach, professor emeritus and former chairman of the department of botany at UNC, died at Carol Woods Health Center in Chapel Hill Dec. 31 of complications arising from Parkinson's and Alzheimer's diseases. He was 78.

A specialist in plant physiology and the author of several botany textbooks, Greulach joined the UNC faculty in 1949 and served as chairman of botany from 1960 to 1972. He retired in 1974.

On leave of absence from UNC from 1964-65, Greulach served as the first executive director of the Commission on Undergraduate Education in the Biological Sciences in Washington, D.C. He also participated in numerous

committees, institutes and conferences sponsored by the National Academy of Sciences and the National Science Foundation on biological sciences education.

In addition, he designed questions for the Educational Testing Service's high school biology achievement tests, taken by thousands of the nation's future physicians and scientists.

Greulach was president of the Association of Southeastern Biologists from 1960-61, president of the North Carolina Academy of Sciences from 1963-64 and editor of the Journal of the Elisha Mitchell Scientific Society from 1966-73.

Author of many scientific articles on photoperiodism in plants and substances affecting plant growth, he was also senior co-author of three editions of "Plants: An Introduction to Modern Botany" and author of "Botany Made Simple" and "Plant Structure and Function."

A memorial service for Henry A. Latane, nationally known investment researcher and professor emeritus at the UNC School of Business Administration, was held Jan. 7 in Carroll Hall. Latane, 77, died at home Dec. 28.

Acclaimed for his work in rigorous financial analysis of financial decision making, Latane's research earned him a 1983 listing in "Who's Who in Economics" as one of the major economists of the last three centuries.

The Meade H. Willis Sr. professor of investment banking taught at UNC immediately after receiving his doctorate from the University in 1958 until his retirement in 1980. Prior to joining the faculty, he worked 20 years as a security analyst for Bankers Trust Co. and Lionel D. Edie and Co. of New York City.

In lieu of flowers, the family requests contributions be made to the Henry Latane Fund at the School of Business Administration, Carroll Hall 012A, UNC, Chapel Hill, N.C. 27514.

Program to examine pornography effects

Pornography Awareness of North Carolina, in cooperation with Duke University's Women's Studies program, will sponsor a symposium Friday and Saturday, titled "Is There A Relationship Between Pornography and Sexual Violence?"

The program will begin with the showing of the film *Not A Love Story* at 7 p.m. Friday in Duke's Paul Gross

Chemistry Auditorium. Specialists on pornography and its effects will speak Saturday from 8:30 a.m. to 5:15 p.m. in Duke's Page Auditorium. The program will end Saturday with a panel discussion, "Where Do We Go From Here?"

The symposium is designed to increase awareness of pornography in American society. Speakers will include

Dorchen Leidholdt, co-founder of Women Against Pornography; Andrea Dworkin, author of *Pornography: Men Possessing Women* and co-author of the Minneapolis Civil Rights Amendment on Pornography; Special Agent Ken Lanning from the FBI Academy's Department of Behavioral Science Research in Quantico, Va.; Assistant U.S. Attorney Robert Showers; Florence Rush, author of *The Best Kept Secret: the sexual abuse of children*; and psychologists and sexual violence researchers Edward Donnerstein and Wendy Stock.

Admission is free, and no one under age 18 will be admitted.

Dedicated volunteers will love Peace Corps tough experience

By VICKI DAUGHTRY
Staff Writer

If you have a strong desire to promote world peace and understanding, Dan O'Brien can tell you about "the toughest job you'll ever love."

UNC's Peace Corps recruiter, O'Brien is a return Peace Corps volunteer who worked in the Dominican Republic and Nepal.

The Peace Corps is very competitive, with one out of every six applicants accepted, he said. Peace Corps applicants must meet special standards, including weight and height limits, and possess certain qualities, O'Brien said.

"Flexibility is the key word," he said. "Volunteers must be altruistic and non-complainers."

The Peace Corps accepts physically handicapped applicants if they meet the requirements.

After being accepted, applicants are trained for three months.

"During this three months, you are given the option to back out," O'Brien said. "The purpose of the training is to condition you to the type of environment you will be living in and the type of work that is expected of a volunteer."

Although their jobs are very rewarding, Peace Corps volunteers must tolerate not-so-perfect conditions, O'Brien said.

"A volunteer must be able to cope with a certain amount of isolation and loneliness," he said. "The food in some countries takes a great deal of getting used to."

Volunteers never are completely isolated. They receive *Newsweek* and usually can receive some radio station. And they can keep in touch with family and friends, although correspondence may take a long time to reach the volunteers.

"Volunteers face frustrations, also," O'Brien said. "Many times villagers do not have the same priorities as the volunteers. For example, volunteers often set up latrines to improve the health of a community. However, village women in some countries have been known not to use them because they say the men can see their feet and will be able to tell who they are."

O'Brien thinks any volunteer will return with a greater understanding of the country and culture with which he or she associated. The hardest part of being a volunteer is "coming back and adjusting to this culture," he said.

"You realize that not a lot of people share your values," O'Brien said. "As a volunteer, you learn to be resourceful, so, when you return to the States, you get frustrated with

the wasteful society."

Most return volunteers get involved in community talks about the Peace Corps and their experiences.

"Once you're back, it's hard to believe the other world exists," said Mary Champagne, return Peace Corps volunteer. An assistant professor in nursing secondary care at UNC, she and her husband spent three years in Afghanistan.

As a volunteer, she said, she gained a real appreciation for different cultures.

"I learned what it was like to be a real minority," Champagne said. "Over all, you definitely learn more than you give."

"When we arrived, we were met with a prejudice which stemmed from misunderstanding," she said. "Children would throw things at us when we walked by because they didn't understand why we were there. Once they saw the work we were doing was for their benefit, the positive response was overwhelming."

"By living with these people for so long, we learned that there were certain universal values that we all shared," she added.

"It is definitely an adventure. You can broaden yourself as a human being by being a Peace Corps volunteer," Champagne said. "But you have to want to do it."

O'Brien agreed that a strong desire to be a Peace Corps volunteer is necessary.

"Although the Peace Corps is competitive, there is a need for more quality volunteers," he said. "Volunteers are representatives of this country. Quality volunteers can tear down misconceptions about the United States by showing them what the typical American is like."

Carolyn Hill, a senior from Denton, is interested in becoming a Peace Corps volunteer in the next few years.

"I've had four years of education and books, but I think the Peace Corps would broaden my knowledge of the world and its people," she said. "As a citizen of the United States, I feel I have the responsibility to promote peace."

Hill feels a spiritual responsibility to be a Peace Corps volunteer, although the Peace Corps is not a religion-based organization.

"My call as a Christian is to be a peacemaker," she concluded. "I can't prevent a war or decide foreign policy, but as one person I can go to another country and establish a peace relationship, even if it's with just one person."

Anyone interested in the Peace Corps should contact O'Brien at his office in the Hillel Foundation.

OPPORTUNITIES UNLIMITED

Consider a Career in Pharmacy

Two years of General College required
The Hollingsworth Scholar Award is available for a limited number of outstanding candidates during the three years of professional study in the School of Pharmacy.

Inquire: School of Pharmacy, UNC-CH

Jack K. Wier

1985 Winter-Spring Schedule

Jan. 14-March 14 March 18-May 2

— Adult Classes —

Monday 6:00	intermediate	Wednesday 6:00	beginning
7:30	beginning	7:30	intermediate
Tuesday 12:00	beginning	Thursday 6:00	intermediate
6:00	beginning	7:30	beginning

— Children's Classes —

Tuesday 4:00 preschool & elementary

for fun, flexibility, strength, endurance, concentration, relaxation, joy!

YOU'VE GOT TO PLAY HEADS-UP BALL WHEN IT COMES TO YOUR CAREER

THAT'S WHY NSA OFFERS YOU THESE EXCITING CAREER OPPORTUNITIES

ELECTRONIC ENGINEERING

There are opportunities in a variety of research and development projects ranging from individual equipments to very complex interactive systems involving large numbers of microprocessors, mini-computers and computer graphics. Professional growth is enhanced through interaction with highly experienced NSA professionals and through contacts in the industrial and academic worlds. Facilities for engineering analysis and design automation are among the best available.

MATHEMATICS

You'll work on diverse agency problems applying a variety of mathematical disciplines. Specific assignments might include solving communications-related problems, performing long-range mathematical research or evaluating new techniques for communications security.

COMPUTER SCIENCE

At NSA you'll discover one of the largest computer installations in the world with almost every major vendor of computer equipment represented. NSA careers provide mixtures of such disciplines as systems analysis and design, scientific applications programming, data base management systems, operating systems, computer networking/security, and graphics.

LINGUISTS

NSA offers a wide range of challenging assignments for Slavic, Near Eastern and Asian language majors involving translation, transcription and analysis/reporting. Newly-hired linguists can count on receiving advanced training in their primary language(s) and can plan on many years of continued professional growth.

THE REWARDS AT NSA

NSA offers a salary and benefit program that's truly competitive with private industry. There are assignments for those who wish to travel and abundant good living in the Baltimore-Washington area for those who wish to stay close to home. Countless cultural, historical, recreational and educational opportunities are just minutes away from NSA's convenient suburban location.

NSA

Fort George G. Meade, Maryland 20755
An Equal Opportunity Employer, U.S. Citizenship Required.

On-Campus Recruiting dates:
January 23, 1985

To find out more about NSA career opportunities, schedule an interview through your college placement office. For additional information on the National Security Agency, write to National Security Agency, Attn: M322, Fort George G. Meade, Maryland 20755.

American Heart Association WERE FIGHTING FOR YOUR LIFE

DOES YOUR DORM, FRAT OR SORORITY LEAVE YOU TO FEED YOURSELF ON SUNDAY NIGHT?

Then consider

THE HILLEL DELI

Beginning Sunday, Jan. 13th 5:30-7:00 p.m.
210 W. Cameron Avenue
(behind Granville Towers) Chapel Hill

New York Style Deli—corned beef, pastrami, salami, roast beef, hot dogs—all served on fresh rye or pumpernickel. Condiments bar. Dr. Brown's sodas. Ten percent discount for Hillel members.

COME AND ENJOY!

Bring this coupon with you to the Hillel Deli on Jan. 13th and get 50% off on any sandwich!
