

Council member opposes mall project

By LISA BRANTLEY
Staff Writer

Chapel Hill Town Council member David Pasquini criticized the proposed Rosemary Square Tuesday night at a town planning workshop, marking the first time a council member has publicly spoken out against the \$19 million project.

Pasquini said he thought the proposed Rosemary Square complex would not blend well into the surrounding area and might require the designation of a one-way street to speed traffic flow in downtown Chapel Hill.

The project is being planned by Fraser Development Company of Research Triangle Park in conjunction with the town and is using both public and private money.

Pasquini called the design "immense and overpowering" and said he thought its height would be conspicuous in relation to other buildings.

"It doesn't blend in at all with what's around it," he said, adding that he was opposed to the design rather than the concept of the development.

According to a report by the town planning staff, Rosemary Square is not

expected to create the traffic problems that some of its opponents predict.

Although reports show an increase in traffic flow in the vicinity of Rosemary Street, the planning staff said they did not predict that the increased flow would cause long waits or blockages.

Two council members, Bill Thorpe and Jonathan Howes said that they believed Pasquini's comments might have been an attempt to gain support for his re-election campaign by seeking the vote of those opposed to the Rosemary Square development.

The town Planning Board is scheduled to review the Rosemary Square site plan at its next meeting on Tuesday to make a recommendation to the Town Council.

The plans for Rosemary Square are for a 500-space parking garage, a 119-suite condominium hotel and restaurant, and about 20,000 square feet of retail space. The project also will contain an outdoor plaza at the corner of Henderson and Rosemary streets, a covered pedestrian mall along Rosemary Street and a pedestrian mall along the alley between Franklin and Rosemary streets.

Gloria howls toward coast; expected to hit land tonight

From wire reports

The National Weather Service issued a hurricane watch Wednesday from Cape Lookout northward to the Virginia border as Hurricane Gloria headed toward the Atlantic Coast.

The hurricane, the strongest storm ever recorded in the open Atlantic, had 150-mph winds Wednesday evening and was 500 miles south southeast of Cape Hatteras. It was traveling northwest at nearly 20 mph. The storm was expected to hit late tonight.

An Ocracoke Island campground was evacuated Wednesday morning, but property owners were allowed to stay to protect their possessions. Dare County information officer Eve Throw said Wednesday that people would be urged by authorities to leave.

Earthquake death toll increases

MEXICO CITY — The death toll from the earthquakes that devastated the city last Thursday and Friday has reached 4,596, police said Wednesday.

Rescuers pulled a living newborn baby from the rubble of the General Hospital early Wednesday. The baby had been covered by a dead body that protected it from falling debris.

An estimated 2,000 people are still buried beneath hundreds of des-

news in brief

troyed buildings, according to officials.

Plane nearly crashes

WASHINGTON — An Eastern Airlines plane carrying 175 passengers nearly plunged into the Potomac River Tuesday, David Hartman said on his "Good Morning America" program Wednesday.

Hartman was a passenger on the flight that skidded to a stop on the edge of the river to avoid hitting a helicopter.

Explosion caused by gas leak

DAVIE, Fla. — An explosion that killed four and injured eight Tuesday at a muffler shop was caused by a propane gas leak.

The leak came from an underground tank at the Midas Muffler Shop and may have been spotted by employees the previous day, said Davie fire spokesman David Mazarino.

The gas from the tank apparently leaked during the night, causing the explosion as workers reported to work in the morning.

Intersection of Franklin, Boundary dangerous

By BETH OWNLEY
Staff Writer

A head-on automobile collision Saturday night that injured three people was the twenty-fourth automobile accident at the intersection of East Franklin and Boundary streets since the beginning of 1984, Chapel Hill police said Wednesday.

Keith Lohmann, police planner for the Chapel Hill Police Department, said the area between Boundary Street and Roosevelt Drive was dangerous, but the curves had been re-marked with yellow paint, and Roosevelt Drive had been improved. He added that there might be other ongoing minor changes, but no major adjustments to the area were planned.

Lohmann said that nothing could be done to the area, "short of condemning 200 pieces of property."

In connection with Saturday night's accident, Richard Estes, 19, of Durham was charged with driving while impaired, driving left of the center line and speeding. If convicted

of driving while impaired, he could face up to 60 days in jail. Lohmann said the lightest sentence Estes could receive if convicted for the DWI offense would be 24 hours of community service and a fine.

Lohmann said Estes could have to pay court costs if convicted of driving left of center. Estes could also receive a \$10 to \$15 fine if convicted of speeding.

Estes, and the passenger in his car, Edward Clay of Whitesville, W. Va., were thrown from the car when it crossed the center line and struck the car of Vicki Bryant, 24, of Durham. They were transported to N.C. Memorial Hospital with incapacitating injuries. Clay was released Sunday, and Estes was reported in good condition Wednesday.

Bryant, also injured in the accident, was reported in good condition at NCMH.

The accident caused an estimated \$2,500 worth of damage to Estes' car and \$2,800 worth of damage to Bryant's car.

Milton's owner running for spot on Town Council

By LEIGH WILLIAMS
City Editor

Milton Julian, owner of Milton's Clothing Cupboard on East Franklin Street, has announced his candidacy for Chapel Hill Town Council.

Julian, who has lived in Chapel Hill since 1936, said he decided to run for council because he wanted a chance to contribute to the far-reaching decisions facing the council over the next four years.

Julian said the primary concern facing the town was keeping the town center a "viable hub of activity for the entire community's economic well-being." To do this, he proposes continuing efforts to minimize traffic congestion, providing additional off-street parking and augmenting the type of shops and offices that will attract people to the town.

Among his other concerns, Julian listed affordable housing, growth management and continued cooperation between the town and the University.

"Many folks who work in Chapel Hill cannot even afford to live within the town limits," Julian said. "By forcing

people out of the area (with expensive housing) we are compounding the traffic problems on our so-called bypass and thoroughfares."

Julian said he believed in managing growth to leave neighborhoods intact.

"The town will grow," he said. "The University, the Research Triangle Park and the Raleigh-Durham-Chapel-Hill area are significant external growth shapers. In view of this, we need to work toward cleaning up Jordan Lake so that we have it as a water resource when development catches up with the Cane Creek Reservoir in another 30-35 years."

Cooperation between the town and the University is a major goal, Julian said.

"We have two major employers, namely the University and Memorial Hospital, whose future plans will certainly have an effect on the town," he said. "Likewise, the town's plans, especially regarding infrastructure improvements, will have a major bearing on them."

Julian is a UNC graduate who majored in political science.

Elections board announces registration sites

By LOCH CARNES
Staff Writer

It's that time of year when the leaves are falling, people are dragging sweaters out of the closet and fall town elections are right around the corner.

It's also time to register to vote.

The Orange County Board of Elections has set several extra places for people to register to vote in the Nov. 5 elections. Students may register today in the Student Union from 11 a.m. to 4 p.m. The Chapel Hill Municipal Building, the Carrboro Fire Depart-

ment and the public libraries will all be open for voter registration during regular business hours until Oct. 7. Registration will also be held at University Mall on Sept. 28 from noon to 4 p.m. and on Oct. 5 from noon to 4 p.m.

People who register this fall will be told where to vote by the person who registers them.

To be eligible to register in Orange County, you must be 18 years old and

a resident of the county. Convicted felons cannot register.

For those residents of Chapel Hill who will not be present to vote on Election Day, an absentee ballot may be filled out at the Chapel Hill Municipal Building or the Municipal Building in Hillsboro between Oct. 21 and 31. The Chapel Hill Municipal Building is located on North Columbia Street behind the fire station.

The fall elections will be for Chapel Hill mayor, four Chapel Hill Town Council seats and several seats on the Carrboro Board of Aldermen. These elections will be Nov. 5.

MORE Stats. Power! IMPROVED File Handling, Reporting!

SPSS PC+

The Enhanced and Expanded Statistical Package for IBM PC/XT/AT's

SPSS/PC+ combined with SPSS/PC+ Advanced Statistics™ and SPSS/PC+ Tables™ form THE most comprehensive statistical software available for a microcomputer. For nearly 20 years, the name SPSS has meant high quality mainframe software. All three microproducts maintain feature and language compatibility with the mainframe versions. And SPSS/PC+ comes with everything you should expect from a market leader — a thorough, well-designed package with excellent documentation and customer support.

SPSS/PC+:

- Display manager & editor
- File matching & merging
- File transfer with popular PC programs
- Selective installation & removal of procedures
- Crosstabulation
- Descriptive statistics
- Multiple regression
- ANOVA
- Plots & graphs
- Flexible data transformation
- Customized reports

SPSS/PC+ ADVANCED STATISTICS

- MANOVA
- Factor analysis
- Cluster analysis
- Discriminant analysis
- Logistic modeling

SPSS/PC+ TABLES

- Stub & banner tables
- Multiple response data
- Presentation quality tables and reports
- Full range of percentage and statistics options

* This symbol indicates the missing file capabilities. See SPSS/PC+ manual for details.
