

## Campus Calendar

The DTH Campus Calendar is a daily listing of University-related activities sponsored by academic departments, student services and student organizations officially recognized by the Division of Student Affairs. To appear in Campus Calendar, announcements must be submitted on the Campus Calendar form by NOON one business day before the announcement is to run. Saturday and Sunday events are printed in Friday's calendar and must be submitted on the Wednesday before the announcement is to run. Forms and a drop box are located outside the DTH office, 104 Union. Items of Interest lists ongoing events from the same campus organizations and follows the same deadline schedule as Campus Calendar. Please use the same form.

## Environment

The public works department would be willing to negotiate a proposed drop-off site on campus.

"I think students would use the opportunities available to them; however, I am not sure of the logistics (of the drop-off site). If one were placed at the Student Union, how many (students) would actually save recyclable materials in their rooms and drag them down there?" Pollock asked.

He said he congratulated the University students for their efforts. "I applaud the University for hiring a recycling coordinator. The steps they are taking are great, but we can all do more."

The main goal of recycling projects for Chapel Hill is to slow down the filling pace of the landfill on Eubanks Road. Town Manager David Taylor predicts that the landfill will close in 1997, and on Oct. 23 the Orange County Board of Commissioners approved a process to select a new landfill site for Orange County that ensures representation from the towns of Chapel Hill and Carrboro.

In response to this announcement, the Landfill Owners Group (LOG), consisting of Carrboro, Chapel Hill and Orange County governments, is working on solid waste reduction programs.

Gayle Wilson, Orange County solid waste planner, said that the search was in its initial stages and that the first step involved forming the residents' committee to assist the LOG in its search. "The process is expected to be a long one, taking about one year, but things

are moving along smoothly."

**Student Health Service Advisory Board and Student Government** are now accepting applications for a SHS Student Liaison Subcommittee. Now is your chance to be active and heard. Applications and information in Suite C and at the Union front desk.

**The Carolina Week by Week Campus Calendar** exposes you. Deadline for fall photographs is Friday, Dec. 1. Contact Christie Blom at 967-4783 for more information.

are moving along smoothly."

The group plans to mail notices to individuals on specific mailing lists and respond to interested residents who apply to join the committee. The LOG will evaluate the applications and make selections for the committee, Wilson said. The deadline for those applications will be Jan. 15.

Wilson said the expanded curbside recycling programs had made a difference in reducing the amount of solid waste. "They are going quite well. Phase II was just implemented last week and we expect results just as helpful."

Andresen said automobile emissions control had also proven to be an upcoming environmental issue for the council. "There is definitely a problem with the air."

The town council ought to make it more difficult for cars to exist downtown, and everyone should change their lifestyles and walk instead of drive, Andresen said, but it is impossible for the governments to enforce this.

She said more park-and-ride lots should be developed to relieve congestion and lessen air pollution.

Pollock also said downtown air pollution presented a new problem, but he suggested stronger efforts to supply

alternative means of transportation. These would control emissions problems rather than propose solutions that may just shift the problem to a new location.

This may affect the provision of additional parking, but he also said the emphasis should be placed on reducing downtown traffic altogether.

"Investing in and planning for something like the light rail system may be more worthwhile (than creating more park-and-ride lots). Park-and-ride lots are like a Band-Aid. But we do need them because we have a lot of bloody spots."

research and teaching that needed to be addressed. He also expressed concern in his speech that the consolidated system might be damaging the system's flagship schools.

Miller refused to speculate whether the General Assembly would address the status of the UNC system in the May 1990 short session, but he said the issue should be addressed soon.

The current UNC system was created in 1972 by legislative action, which brought together all 16 campuses.
