

Think a college degree makes you some kind of expert? So do we.

At Microsoft, you can turn your degree into an exciting opportunity as a technical expert with our Product Support group.

You'll be joining some of the most knowledgeable people in the personal computing industry, providing critical technical support to end-users of our products. You'll be given immediate responsibility, researching and answering questions via the phone on everything from Windows 3.0 to Windows applications.

You'll be given

all the technical challenge you can handle including being involved in testing new systems in software products.

We have a few more questions.

If you're about to graduate with a Bachelor's degree in Computer Science, Math, Electrical Engineering or MIS, we

have a few questions for you. And we're sure you have some for us. So plan on attending our on-campus interviews.

We are an equal opportunity employer and are working toward a more culturally diverse workplace.
