

Holloway Engagement Is Announced

Mr. and Mrs. Edward Willis Fairfield of Route 3 announce the engagement of their daughter, Judith Vianne Holloway, to Billy Coleman Akridge of Carrboro.

Miss Holloway attended Greensboro High School, Louisburg College and Woman's College. She is presently employed at Hospital Savings in Chapel Hill.

Mr. Akridge is the son of Mr. and Mrs. Lonnie L. Akridge of Carrboro. He is a graduate of Chapel Hill High School and a member of the National Guard. He is employed at Domestic Loan Co. in Durham.

The wedding will take place at 2 p.m. Saturday, March 16, at the University Baptist Church. All friends of the couple are invited.

Good Time Now To Plan Garden

By M. E. GARDNER

This is a dreary, wet, cold and cloudy day in Raleigh. Good planning weather for spring operations though. There are some chores for this month, too.

If you have bearing strawberry plants they should be fertilized this month in eastern Carolina and the lower Piedmont and in March in the upper Piedmont and mountain counties. Apply about two quarts of an 8-8-8 fertilizer per 100 feet of row. Select a good day when the leaves are dry. Distribute the fertilizer evenly over the plants and brush from the leaves to prevent burning.

Remember to mulch the plants to keep the berries clean when ripening. Pine straw is probably best but clean grain straw may be used. Fertilize before applying the mulch.

It would be a good idea to fertilize those pecan trees you have been neglecting. Use about two pounds of an 8-8-8 mixture per year of age until the trees come into bearing. On bearing trees, apply three pounds per inch of tree diameter.

The fertilizer may be broadcast evenly around the tree or it may be placed in holes 12-14 inches deep made with a crow bar or an old car axle. The latter method is best because it places the plant food nearer the feeder root zone.

The major portion of the feeder root system extends just inside and outside the spread of the branches of the tree. Stagger the holes in this area uniformly around the tree and divide your fertilizer accordingly when placing in the holes.

On bunch grapevines, apply one-half pound of an 8-8-8 per year of age until the plants are receiving about three pounds per vine per year.

For Muscadine vines, apply one-half pound of an 8-8-8 mixture per year of age until the vines are receiving about six pounds of fertilizer per vine per year.

Check the house plants. Some may need repotting or a good spraying to control insects. If you want to add some color in the house many spring flowering shrubs can be brought in and forced into bloom — flowering quince, winter jasmine, pussy-willow, peach and dogwood.

We have a crescent arrangement in the house now using jasmine, one mahonia (Oregon grape) flower and sprays of hemlock.

Many questions have been asked about cold damage to plants caused by the severe temperatures we have had this winter. More about this next week.

Manning-Williamson Vows Exchanged

Miss Elizabeth Wright Manning and Mr. William Garmett Williamson III were married in a double-ring ceremony at noon Saturday, Feb. 9, in the Chapel of the Cross. The Rev. Thomas R. Thrasher officiated.

The bride is the daughter of Mr. and Mrs. John Taylor Manning of Mint Springs Road, Chapel Hill. A member of the Pi Beta Phi Sorority, she is a graduate of St. Margaret's School, Tappanhamock, Va., and a senior at the University of North Carolina.

The bridegroom is the son of Mr. and Mrs. William Garmett Williamson Jr. of Westfield, N. J. He is a graduate of Christ Church School, Christ Church, Va. He attended Virginia Military Institute and is now associated with the National State Bank of Elizabeth, N. J.

Given in marriage by her father, the bride wore her mother's wedding gown of light ivory satin, designed with a high neck, long sleeves and fitted bodice. The modified controlled skirt fell into a cathedral train. Her heirloom Brussels lace veil, worn mantilla style, was backed by silk illusion which fell to the edge of the cathedral train. She carried a semi-crescent bouquet of gardenias and dark green foliage.

Maid of honor was Miss Carol Stuart Manning, sister of the bride. She wore a cocktail length dress of rouge-red velvet, short sleeves and basque bodice. The modified flared skirt was accented by a satin cord inset around the bottom of the skirt and a satin bow at the waist. She wore a petal-shaped satin head covering and carried a nosegay of gardenias and foliage.

The bridesmaids, dressed the same as the maid of honor, were Misses Jane Carter Hedgpath, Katherine Livas, Anne Royal Carter, all of Chapel Hill; Carolyn Lyday of Greensboro, Ann Prescott of Richmond, Va., and Mrs. Gerald Bell of New Haven, Conn.

Flower girls were Miss Elizabeth Jones, daughter of Dr. and Mrs. J. Kempton Jones; and Miss Georgia Harris, daughter of Dr. and Mrs. Tyndall Harris. Both wore diminutive replicas of the bridesmaids' dresses and carried nosegays of white sweetheart roses.

Best man was the groom's brother, Thomas Williamson of Westfield, N. J.

Groomsmen were Charles Nelson Williamson, the groom's brother; Howard E. Manning Jr., of Raleigh, the bride's cousin; Alexander MacFadyen of Charlotte,

John Crane of Chapel Hill, Kenneth Greer of Marion, Va., and Joseph James of Alexandria, Va., the groom's cousin.

For the ceremony, the bride's mother wore a cocktail length turquoise brocade dress, fashioned with short sleeves high scoop neckline and empire waistline. She wore a matching shell hat of silk organza petals and a corsage of white phalaemopsis orchids.

The groom's mother wore a cocktail length champagne-colored three-piece costume of silk shantung with a lace over-blouse. Her shell hat matched her costume and she wore a corsage of white phalaemopsis orchids.

A reception, given by the bride's parents, was held at the Carolina Inn immediately following the ceremony.

For their wedding trip to the Homestead in Virginia, the bride wore a traveling costume of ice-pink mohair with a jersey over-blouse and a matching flowered hat and veil. Her corsage was lifted from her wedding bouquet.

The newly-weds will make their future home at 743 Jansen Ave., Avemel, N. J.

Dr. Ruth Gilpin Elected Director

Ruth Gilpin, associate professor in the University School of Social Work, was elected to the Board of Directors of the Council on Social Work Education at its annual meeting held in Boston.

The Council on Social Work Education is the national accrediting body for schools of social work and operates to assure the establishment and maintenance of high standards of professional education.

The Board of Directors of the council meets regularly in March and October in New York. Dr. Gilpin's term on the board expires in July, 1964.

A native of Baltimore, Md., Dr. Gilpin attended Wilson College where she received a B.A. degree. She received a M.A. degree at the University of Pittsburgh, and M.S.W. and D.S.W. degrees at the University of Pennsylvania.

ATTENDS EXHIBITION
Mrs. Willbur F. Senter has just returned from Rockland, Maine, where her son, Richard T. Senter, has a one-man exhibit of his paintings at the Farnsworth Museum.

Helpful Advice On Dental Care

This is the fourth in a series of questions and answers on dental health published in cooperation with the Durham-Orange County Dental Society in observance of National Children's Dental Health Week February 3-9.

What is periodontal disease?
The word "periodontal" comes from two Greek words meaning literally "around the tooth." In periodontal disease the tissues that surround and support the teeth, the gums, the fibers that attach the teeth to the jawbones and the bones themselves are affected.

The disease begins as gingivitis. The gums gradually become swollen; they may stand away from the teeth and bleed easily when touched. If gingivitis is not treated and controlled, the inflammation spreads along the roots of the teeth and the gums separate from the teeth, forming a pocket which becomes filled with bacteria and sometimes pus. As the disease progresses, the bone supporting the teeth is lost, and the affected teeth eventually become very loose.

What causes periodontal disease?

Among the local factors causing periodontal disease is calculus, or tartar, a hard, crust-like material that is deposited on the surface of the teeth where the gums and the crowns meet, irritating the gums. Worn-out fillings and crowns, ill-fitting partial dentures, sharp edges of badly decayed teeth and food particles retained in a cavity also irritate the gums.

The loss of a tooth, if it is not replaced with an artificial tooth by a dentist, may cause the adjacent teeth to shift into vacant space. The shifting leads not only to wedging of food into spaces between the teeth but also to improper meshing of the teeth upon chewing. The shock and uneven pressures of these poor teeth contacts cause damage to the periodontal tissues. Teeth that do not come together properly on closing the jaws, regardless of the cause, can be a factor in producing periodontal disease.

If a patient has regular dental checkups, his dentist will discover and promptly eliminate any of these possible causes of irritation.

Can periodontal disease be cured?

Yes, in many cases it can be cured, especially if the disease is in its early stages. Calculus and any other causes of irritation within the mouth are removed. If necessary, diseased gum tissue is removed surgically. In some cases, splints or other appliances are constructed to maintain stability of loose teeth until bone and gums are regenerated.

Although treatment by the dentist is necessary, complete cooperation of the patient in home care is most important if the treatment is to be successful.

Arrivals Add To Population

New arrivals in Chapel Hill include the following new babies:

David John Nelson, born Jan. 23 to John and Nancy Nelson, 4 Audley Lane; Baby Evans, born Jan. 10 to William and Lois Evans, 101-B Bernard Drive; Barbara Norwood Fordham, born Jan. 19 to Robert and Margaret Fordham, 122 Bagley Drive; Robin Lynn Askew, born Jan. 21 to Atwood and Barbara Askew, Route 2; Sherryl Marie Branch, born Jan. 25 to George and Arlene Branch, 72 Hayes Road; Rickey Farrington, born Jan. 26 to Howard and Christine Farrington, Route 1; Beverly Denise Holman, born Jan. 29 to Clarence and Geneva Holman, 327 Lindsay St.; Edith Marie Nelson, born Jan. 25 to James and Lucy Nelson, 185 Daniels Road.

PHYSICIST TO SPEAK

V. P. Kenney, professor of physics at the University of Kentucky, will address a meeting of UNC Physics Colloquium Wednesday at 4:30 p.m. in room 265 Phillips Hall. "Not So Elementary Particles" will be the title of Prof. Kenney's address. Tea and coffee will be served at 4 p.m. in the Phillips Hall Lounge, room 277.

DiCostanzo-Rickenbacker Engagement

Mr. and Mrs. Nestore DiCostanzo of 2 Mt. Bolus Road, announce the engagement of their daughter, Martha DiCostanzo, to Barney L. Rickenbacker Jr., of Chapel Hill.

Miss DiCostanzo is a sophomore at the University of North Carolina.

North Carolina. He is a graduate student in Classics at UNC and a Latin instructor at the Durham Academy.

The wedding will take place in late summer.

Provence Explored By Mme. Servoise

The February meeting of the Alliance Francaise took place last Tuesday night at 8 o'clock at the Monogram Club. The meeting was well attended and many colorful posters were displayed which will be used for the forthcoming Mardi Gras Ball.

The speaker for the evening and the first lady speaker of the Alliance in Chapel Hill has had, was Mme. Claude Servoise, visiting lecturer from Paris. Her subject for the evening was "La Provence Artistique."

Provence is the region in southeastern France bordered by the Rhone valley to the west, the Alps to the north and the Mediterranean to the south. It is one of the most historic regions of France and particularly rich in Roman remains. It is also one of the most beautiful and best known regions of France.

Mme. Servoise's talk consisted of colored slides with a running commentary. She began by showing pictures of several of the Roman arenas and triumphal arches, notably the ones at Arles and Nimes and St. Remy. These are mostly in an excellent state of preservation and arenas are still used for bull fighting. Mme. Servoise had an excellent set of pictures and showed such well known places as Aix-en-Provence, the ancient capital of Provence; Avignon, the one time seat of the Pope and famous also for the bridge at Avignon; the windmill of Alphonse Daudet, and Les Beaux, among others. There were also pictures of the famous Pont du Gard, one of the showplaces of the region.

Mme. Servoise ended her talk by showing some of the famous paintings of the region, notably by Cezanne.

Following the talk, refreshments were served and members were busy discussing their plans for the forthcoming Bal Masque du Mardi Gras to be held February 23.

CHRONIC ILLNESS

Rheumatic fever is a chronic illness which may flare up from time to time over a period of years. Today "repeat episodes" of rheumatic fever can be prevented with proper medical care, the North Carolina Heart Association says.
