HON. W. E. DANIEL'S CLAIMS.

Garland E. Midyette Declares he is The Man For Lieutenant Governor.

To the Editor:- It appears that the candidacy of the Hon, Walter E. Daniel for the Democratic nomination for Lieutenant Governor is meeting with encouragement from all sections of the State. This information is most gratifying to the

friends of Mr. Daniel, who believe that he is worthy of the State's highest honors and that if nominated to this high and honorable position he would discharge its duties with fideltlemen who have held this position. Mr. Daniel is easily one of the State's strongest men. In the legal profession he is rightly regarded by his brethren of the bar as one of our ablest and most successful lawyers,

First, ten years ago there were and for a number of years in his section he has enjoyed a most lucrative practice and has been connected with some of the most important litigation. THE GOSPEL OF GOOD ROADS.

The editor of World's Work, Wal- Wake Forest College and many years pel for good roads when he says:

"In a dark corner of one of the Southern states-a county God had forgotten and few men had discovered, the sparse population arose a year or two ago and said to one another: 'People go to places where there are good roads. We have bad roads. Few people come here. Let's make good roads and see what will happen.' They went to work building good roads from Nowhere to Anywhere. County and township went into debt. Private persons put up money. By great agitation and much service they built road after road through the woods. And the scoffer said that nobody would ever travel them. A lonely, perfect highway through a thinly settled corner of the world; it did look foolish to incur a debt for that. But presently people came-in motor cars; then more came. Somebody discovered that the land along the highways was good land. It had been taken for granted that because it was not tilled it was of little value. Now its price has doubled-in places, quadrupled; prosperous farms already bloom where there was only waste before.

"Nor is this all. The people of the lonely and formerly unvisited region themselves had stayed at home for lack of roads that tempted them to travel. But, as soon as they had roads they began to go about. The more prosperous of them bought motor cars to fit the roads. They now go to the adjacent States, to the mountains, to the sea-wherever they will-in their touring cars. They are becoming a traveled folk."

The news is now sent out that the South pole has been successfully discovered. We hope the weather will soon get warmer.
