GODWIN TO MEET HIS OPPONENT

Democratic and Republican Nominees to Make Welkin Ring

Evidently the "bloody Sixth" is neither to lose its ginger nor its reputation for stirring times this election year. Whatever other congressional districts may do, the Sixth is going to stage interesting oratorical scraps. The Democratic nominee, Hon. Hannibal L. Godwin, of the city of Dunn, and the Republican nominee, Hon. A. L. McCaskill, of the metropolis of the Upper Cape Fear, have decided to meet each other on the stump and, inwardly, to make the fur fly. So schedule of dates has been arranged for "jint" debates, opening in Brunswick county next week, with a date late in October in New Hanover and a wind-up in the candidates' home counties, Harnett and Cumberland, the days before the general election.

The itinerary of the political contestants, as announces, follows:

Brunswick County.

Town Creek (voting place.) Tuesday, September 26, 2:00 p. m.

Southport, Tuesday, September 26, 7:00 p. m.

Supply, Wednesday, September 27, 2:00 p. m.

Shallotte, Wednesday, September 27, 7:00 p. m.

Ashe, Thursday, Sept. 28, 11:00 a. m.

Cumberland County.

Linden, Tuesday, October 3, 2:00 p. m.

Manchester, Tuesday, October 3, 7:00 p. m.

Currie's School House, Wednesday, October 4, 2:00 p. m.

Cumberland Mills, Wednesday, October 4, 7:00 p. m.

King Hiram, Thursday, October 5, 2:00 p. m.

Hope Mills, Thursday, October 5, 7:00 p. m.

Cedar Creek, Friday, October 6, 2:00 p. m.

Stedman, Friday, October 6, 7:00 p. m.

Fayetteville, Monday, November 6, 7:00 p. m.

Robeson County.

Red Springs Tuesday, October 10, 2:00 p. m.

Maxton, Tuesday, October 10, 7:00 p. m.

Rowland, Wednesday, October 11, 2:00 p. m.

Fairmount, Wednesday, October 11, 7:00 p. m.

Lumberton, Thursday, October 12, 2:00 p. m.

St. Paul, Thursday, October 12, 7:00 p. m.

Cumberland County.

Whiteville, Tuesday, October 17, 2:00 p. m.

Boardman, Tuesday, October 17, 7:00 p. m.

Fair Bluff, Wednesday, October 18, 2:00 p. m.

Tabor, Wednesday, October 18, 7:00 p. m.

Pireway, Thursday, October 19, 2:00 p. m.

Wattville, Thursday, October 19, 7:00 p. m.

Bladen County.

White Oak, Tuesday, October 24, 2:00 p. m.

Elizabethtown, Tuesday, October 24, 7:00 p. m.

Clarkton, Wednesday, October 25, 2:00 p. m.

Bladenboro, Wednesday, October 25, 7:00 p. m.

Tarheel, Thursday, October 26, 2:00 p. m.

New Hanover County.

Wilmington, Tuesday, October 31, 7:00 p. m.

Harnett County.

Duke, Wednesday, November 1, 7:00 p. m.

Lillington, Thursday, November 2, 2:00 p. m.

Buie's Creek, Thursday, November 2, 7:00 p. m.

Coats, Friday, November 3, 2:00 p. M.

Dunn, Friday, November 3, 7:00 p. m.

GRIZZLY BEAR KILLS MAN IN YELLOWSTONE PARK.

Cody, Wyo., Sept. 21.—Details of the killing of Jack Welch, a freighter, by a bear in Yellowstone Park several days ago, have been brought here by tourists in the park.

Welch and another man were sleeping beneath a wagon and a third man was asleep on top when a grizzly seized Welch, dragged him from beneath the wagon and proceeded to kill him. Welch's screams awakened the other men, one of whom fled. The other, although without arms, in accordance with the park regulations, went to Welch's rescue and threw bacon to it. The bear abandoned Welch for the bacon and his companion dragged him away.

Shortly afterward a tourist arrived in an automobile. Welch was loaded into the machine and hurried to the Muse Tourist camp, where he died. The bear, after finishing the bacon, attacked the load in the wagon, overturning it and tossing bales of hay in every direction in search of more bacon.

The farm woodlots of the United States contain about 10 per cent of the total standing timber of the country.

SIMMONS SAYS ELECTION SURE

States to Warsaw Man That There Was No Doubt of the Re-election of Wilson

Warsaw, Sept. 20.—A gentleman of Warsaw, who was recently in conversation with Senator F. M. Simmons, and feeling that the Senator was in a position to know, asked him his opinion of the result of the coming election. He reports Senator Simmons as saying, that there was not in his mind a doubt but that President Wilson would be re-elected.

There was a peculiar prenomenon observed in the sky here on last Thursday night at about half past nine o'clock. As reported by those, who observed it, it resembled a rainbow in shape and formation, but the colors, of course were not discernible, the bow, which appeared in the Southern sky having the color of a brilliant light. If it could have been a rainbow, the old adage, "Rainbow at night, is a sailor's delight," was without true significance, for instead of fore-telling fair weather, it only presaged a heavy rain-fall for Thursday night, and Friday.

A three weeks term of Court for the trial of Civil cases has just closed at Kenansville, with Judge W. A. Devin, presiding, it is unusual for so long a term to be held there, but was necessary in this instance, owing to full docket.

Warsaw is enjoying to the meeeting of the members of the Wilmington-Goldsboro Highway Association at this place today, and is giving a hearty welcome to all, who attend. The addresses of Dr. Joseph Hyde Pratt and others were heard with interest.

FEARS EXHAUSTION OF THE OIL SUPPLY

Austin, Tex., Sept. 21.—There has been considerable discussion of late as to the possible length of time that the petroleum supply of the United States and the world will hold out. With the development of the automobile and other motor vehicles and engines the use of petroleum and its products for fuel has become of first importance from an industrial standpoint.

J. S. Cullinan, of Houston, Tex., has been prominently identified with the petroleum industry for more than forty years. He has seen the production of the world grow from a little more than 10,000 barrels per day to approximately 1,000,000 barrels per day. He knows every phase of the industry. It is Mr. Cullinan's belief that the United States Government should adopt a vigorous and far-reaching policy of conserving the crude petroleum supply of this country in order to have on hand a reserve of fuel for the navy in future years. In discussing the petroleum industry Mr. Cullinan said:

"When we exhaust the last oil pool the lights will go out in over 200,000,000 homes. Every wheel in this world will cease to turn, all labor will stand idle, investments aggregating billions of dollars will be thrown into the scrap heap, and a large mass of the most ingenious and likewise some of the most stupid legislation ever written in the statute books will become a dead letter. Petroleum directly enters into the life of every civilized human being, and there is no line of business that does not at some point demand petroleum or its produts. There is no greater tragedy in the life of a people than the extermination or exhaustion of a useful and dependent natural resource. The problem is one that merits the most careful and painstaking examination of the capitalist, the laborer, the tradesman, the manufacturer, the housewife and every man and every woman.

An Important Problem.

"A brief review of the industry can not fail," Mr. Cullinan says, "to convince the most indifferent of the tremendous importance of the subject. The first oil well in the world was completed near Titusville, Pa., by Col. Drake in August, 1859. This well was drilled by hand labor, using a spring pole. It was completed at a depth of sixty-eight feet. Down to the year 1870 benzine, the lighter product contained in refining petroleum, from which the naphtha series and gasoline are now manufactured was considered a useless product. In order that it might be utilized as much as possible, it was frequently mixed with kerosene up to the year 1900. Internal combustion engines were developed commercially in 1885, the first using natural gas as a fuel. It may be interesting to note here that while approximately 60 per cent of the mechanical horse power of the United States, other than hydro-electric power, is of the internal combustion type, up until the year 1884 the textbooks and scientists declared the principle on which the internal combustion engine is operated to be impossible. The automobile was developed commercially in the year 1900. We have now upward of 2,500,000 commercial and pleasure vehicles in the United States, which are estimated to consume upward of 30,000,000 barrels of gasoline per annum. The manufacture and operation of trucks and automobiles are now understood to give employment to upward of 1,250,000 of our population.

Oak is the most suitable wood for carving on account of its durability and toughness, without being too hard. Chestnut, American walnut, mahogany and teak are also desirable while for fine work Italian walnut, lime, sycamore, apple pear or plum are generally chosen.

"Goodnight Corns! We Use 'Gets-It!'"

3 Drops in 2 Seconds. That's All. "GETS-IT" Does the Rest. Never Fails.

"Really, I never could see how some few people use the most difficult and painful way they can find to get rid of corns. They'll wrap their toes up with bandages into a package that fills their shoes full of feet and makes corns so painful they've got

to walk sideways and wrinkle up their faces. Or they use salves that eat right into the toe and make it raw and sore, or they'll use plasters that make the corns bulge, or pick and gouge at their corns and make the toes bleed. Funny, isn't it? "GETS-IT" is the simple, modern wonder for corns. Just put 3 drops on. It dries instantly. No pain, fuss or trouble. The corn, callus or wart loosens and comes off. Millions use nothing else."

"GETS-IT" is sold and recommended by druggists everywhere, 25c a bottle, or sent on receipt of price, by E. Lawrence & Co., Chicago, Ill.

Sold in Wilmington and recommended as the world's best corn remedy by R. R. Bellamy, Smith Drug Store, Southside Drug Co., Elvington's Pharmacy, Harding's Pharmacy.

THEATRE

Another big bill went on at the Victoria yesterday and will be repeated today and tonight. "Blitz and Muldoon On The Midway, a roaring Irish and Dutch comedy, pleased large audiences, in a bright farce with scenes laid on the gay Midway at Coney Island, at the height of the summer season of gaiety.

Jack Fuqay and [illegible] Gilles in the title roles, as Du[illegible] and Irish comedians, fulfilled all expectations and were especially enjoya[illegible] their dialogue numbers, and in [illegible]ing and dancing skit. Bright and [illegible]kling comedy pervaded the atm[illegible]phere for the whole hour that the comedy was being presented.

Fuquay, Gilles and Fleming were especially pleasing and enjoyable in a great trio specialty of singing and dancing, augmented by the nifty chorus. "Knock the 'L' Out of Kelly" was another great number, presented by Dolly Parker, Jack Fuquay, Harold Gilles and the chorus. This was one of the most spontaneously applauded numbers on the whole programme.

The special scenery for this production is very pretty and the costumes, all new, nifty and novel, excited much admiration. The same show will be presented for the last time this afternoon and tonight.

Tomorrow another brand new bill, "The Haunted Station" with all new scenery, new specialties and new and nifty costumes, will be presented.

Mutt & Jeff's Wedding.

With a wealth of pretty girls, new scenery, electric effects, costumes, music etc., together with a brand new play, our old friends Mutt & Jeff Bud Fishers inimitable cartoon creations will be seen in Gus Hill's latest edition entitled Mutt & Jeff's Wedding, which comes to the Academy of Music, Thursday, September 28, for a matinee and night performance.

Scene from "Mutt & Jeff's Wedding," Academy of Music, Matinee and Night, Thursday, September 28th.

Without question this offering excels all former productions of these quaint characters and no expense has been spared in making this the acme of all popular priced musical comedies.

Mr. Hill in his twenty-five years experience in catering to the public taste is a firm believer in the old adage, "laugh and the world laughs with you" and he is rightly credited as being the greatest laugh producer extant.

Mutt & Jeff's Wedding is built for laughing purposes only. It is a laugh, a shout, a scream from beginning to end and is surrounded by a capable cast of vaudevillians and the prettiest "girly chorus" attainable, who can both sing and dance.

There are twenty five musical numbers including the latest song its, interspersed throughout the play which allows the audience ample breathing spells between the paroxysms of laughter.

The stage settings are elaborate and the entire production is staged under Mr. Hill's personal supervision assuring a perfect up-to-date offering.

The prices for the matinee will be 25 cents and 50 cents and 25 cents for children. The night prices will range from 50 cents to $1. Tickets for both performances will go on sale at Flummer's next Tuesday morning.

One ton of coniferous wood waste will produce from 15 to 25 gallons of 190-proof alcohol.

Draw Your Circle of Friends Closer

Most of your friends have Bell Telephones. Perhaps at this moment you are wishing you could talk with one of them.

Why isolate yourself from your friends when a Bell Telephone in your home costs so little and means so much?

In emergencies such as sickness or accident the telephone summons aid promptly, and is often the means of saving life or property.

There is a class of service to fit your needs at a cost within your reach.

Ask us today for details.

STEPHEN D. LUCAS,
District Manager.

SOUTHERN BELL TELEPHONE AND TELEGRAPH COMPANY

Dalton A PIONEER

The Dalton easily maintains its supremacy even when operated by the old style "sight" method. But speed, after all, is only relative, and the Dalton's lead is but a matter of per cent. There is a field, however, in which percentages cannot apply—where there is no "second best." In this field the Dalton is a pioneer, having blazed out and preempted a domain of its own where competition cannot follow.

The small, compact keyboard of the Dalton enables the operator to learn the location of the keys so perfectly that it soon becomes unnecessary to look at them at all, the eyes thus never having to look away from the list of figures being copied. This is the famous

Touch Operation

The practical value of touch operation of the adding machine cannot be easily exaggerated.

Touch Operation increases the speed of an adding machine from 25 to 80%, owing to the particular kind of work in hand.

Touch Operation decreases the liability to commit error by depressing the wrong key even in greater proportion than the figures just stated.

Touch Operation permits of long continued work at top speed without that severe nervous strain invariably experienced by "sight" operators under such conditions.

Touch Operation entirely eliminates eye-strain caused by the ceaseless turning from copy to keyboard and focusing of the eyes on different colored objects at unequal distances thousands and thousands of times each day.

Touch Operation converts drudgery into pleasant routine, gives the operator a sense of mastery over the dreary humdrum of figure work and leaves him with increased time to devote to the bigger things with which he comes in daily contact.

It is easy to learn the Touch Operation. We can bring a Dalton to your office and in a few minutes teach your own operators how to use the Touch Method. Let us show you. Send for booklet on Touch Operation. Write or telephone Today.

LARGEST U. S. BATTLES HIP SETS HIT RECORD.

14-INCH GUNS ON U.S.S. PENNSYLVANIA. CENTRAL FILM SERVICE.

Washington, Sept. 20.—Scoring five hits out of twelve on a small target at a distance of 30,000 yards, approximately eleven miles, the battleship Pennsylvania in the test of her new 14-inch guns has made what ordnance experts here believe to be a world's record in gunnery.

The exact size of the target was not revealed by the Navy Department. It was stated, however, that the five hits were actual hits and not "plotted." In gunnery practice a battle ship is always allowed a hit whenever her shots strike near enough to the target to indicate that a hit would have been scored had a battle ship been fired upon instead of the small target. That is called "plotting." But in this case five hits were registered on the taget.

The Pennsylvania, which is the largest vessel in the Navy was commissioned at Newport News on June 12.

The accompanying picture was made at the Brooklyn Navy Yard where the ship put in for minor alterations after the gun tests.
