in the tonneau door after the fashion

times from road and wheel splash. It adds tremendously to the appearance of the car, lending an air of the high priced sport motor that seems so popular at present. An improved rigid chass in construction has been provided, together with a new design for the front axle. The thrust washers have been hardened. Mounted on top of the axle is a sturdy five leaf spring fully capable of carying for a five passenger load. The new muffler makes the Metz absolutely silent. It is placed at the rear of the chassis.

Charles H. Metz, president of the case charging Charlie, alias Bubbie, Company and designer of the Metz he constructs them for himself, first,

tached to the frame, and then several

road tests are given. The motor transmits an even flow substitute an even, silent flowing Metz operats so smoothly, yet powerfully, that it is more like an aeroplane.

The springs are full ellipitical, front and rear, with extra shock absorbers. Rotarian Abe Einstein, reporting for took a nol pros. This action came as This with the luxuriousness of the uphas a low center of gravity, coupled with gearless drive property, makes the car the easiest riding machine manufactured. Both models are "108" wheel base. A one-man-top of special design, gives that smart appearance

that goes with quality. The great demand for Metz cars this season has amply demonstrated the fact that the gearless friction drive has proven its superiority to the motoring public. It seems that motor car efficiency is better understood by the public, and demanded, in addition to beauty. The Metz has always maintained a 22 mile a gallon reputation. By combining a smart body with the economical transmission, as has been done in the 1917 model, the Metz is
