North and South Carolina and Flor crease in the destruction of British fing the line of Scheroten-Silawaya. ida, when the next increment of the first draft are ordered to camp, beians and 3,150 will represent the draft of more than 1,600 tons and six of ern fronts." districts in South Carolina.

STAGE OF WATER.

## Prefers Buckeye Hulls because they are cheaper

Mr. John A. May, Sheriff of Houston County, Dothan, Ala., says that Buckeye Hulls are cheaper than old style because they are all hulls and no lint, and because they cost him much less per ton. This explains in few words the unusual economy of using

You pay less for them and you get more roughage to the ton. For the amount of money you may now be spending for old style hulls you can get much more roughage in the form of Buckeye Hulls and it will be better roughage too. Buckeye Hulls are not only lintless but they are clean and free of trash and dust. The minute you buy and feed Buckeye Hulls you realize how much more economical they are. Try a ton.

To secure the best results and to develop the ensilage odor, wet the hulls thoroughly twelve hours before feeding. It is easy to do this by wetting them down night and morning for the next feeding. If at any time this cannot be done, wet down at least thirty minutes. If you prefer to feed the hulls dry, use only half as much by bulk as of old style hulls.

Book of Mixed Feeds Free Gives the right formula for every combination of feeds used in the South. Tells how much to feed for maintenance, for milk, for fattening, for work. Describes Buckeye Hulls and gives directions for using them properly. Send for your copy to nearest mill.
