WOMAN ANNOYED BY AMERICAN'S FRENCH

(By United Press.) Paris, Sept. 1.—(By Mail).—American soldiers are making rapid strides in French.

At Y. M. C. A. a group of soldiers gather each evening for their lessons in a room whose windows face a private residence just across the court. The other evening the following question in slow, careful French was asked by the teacher:

"Croyez-vous qu'il pleuvra demain?" (Do you think it will rain tomorrow?) After each American had practiced the question in a gone too quiet voice, a shrill answer sounded from across the way: "Oui, il pleuvra ce soir, de-

A Better Roughage for Less Money

Mr. Wesley Johnson, Aiken, S. C., feeds Buckeye Hulls to his milch cows and says that he prefers them to any hulls he has ever used. He believes that they are cheaper and better. That is the whole

in two words—Cheaper—Better. It is rare that the best product of its kind is the cheapest or that the cheapest is the best but this is certainly true of Buckeye Hulls. Removing the lint not only eliminates all the objectionable features of old style hulls but makes it possible to sell the delinted hulls at the lowest figure for which roughage can be bought. If you want the best roughage you must buy the cheapest—Buckeye Hulls. If you buy the cheapest roughage—Buckeye Hulls—you will get the best.

To secure the best results and to develop the ensilage odor, wet the hulls thoroughly twelve hours before feeding. It is easy to do this by wetting them down night and morning for the next feeding. If at any time this cannot be done, wet down at least thirty minutes. If you prefer to feed the hulls dry, use only half as much by bulk as of old style hulls.

Book of Mixed Feeds Free Gives the right formula for every combination of feeds used in the South. Tells how much to feed for maintenance, for milk, for fattening, for work. Describes Buckeye Hulls and gives directions for using them properly. Send for your
