Chicago, winer of the Cross of the Le YOU THINK ABOUT IT .- Advt.

# Would you mix your cattle-feed with cotton?

TOU know that such a combination would be carried through the digestive tract without giving the milkproducing and fat-producing food a chance to be assimilated. The lint on old style hulls acts the same way. It forms a pad or cushion-like covering around the concentrates that prevents the digestive juices from extracting the full amount of protein.

contain no lint to clog or flux the digestive tract. They are digested and they allow the other forage to be digested the same as hay or any other roughage.

When you mix your feed with Buckeye Hulls you know that you are using roughage that will help-not hinderthe meal, corn, oats, or whatever concentrate you prefer.

Other Advantages

2000 pounds of real roughage to No trash or dust. the ton-not 1500. Cost much less per ton. Go much farther.

Easy to handle because sacked. They mix well with other forage. They take less space in the barn.

Mr. C. K. Henderson, Aiken, S. C., says: that he would rather have Buckeye Hulls than any others. He uses Buckeye Hulls altogether - says they are cheaper and better.

To secure the best results and to develop the ensilage odor, wet the huils thoroughly twelve hours before feeding. It is easy to do this by wetting them down night and morning for the next feeding. If at any time this cannot be done, wet down at least thirty minutes. If you prefer to feed the hulls dry, use only half as much by bulk as of old style hulls.

Book of Mixed Feeds Free Gives the right formula for every combination of feeds used in the South. Tells how much to feed for maintenance, for milk, for fattening, for work. Describes Buckeye Hulls and gives directions for using them properly. Send for your copy to the nearest mill.
