

Agriculture Student Maps Constructive Farm Program

(The following article was written by Norton Bryson, 14, a student in the vocational agriculture class of the Franklin high school taught by E. H. Meacham.)

The farmers of the nation are trying to work out a sound agricultural program for 1933. The farmer is in a worse condition than he has ever been before. He has no markets for his goods, but if he does sell then the margin of profit is very low, if any at all. He must use this fact for the basis of his program for next year.

A sound agriculture program for 1933 is the big problem that faces the farmer today. The farmer must live if the rest of the world wishes to live. The farmer is partly to blame for the condition he is in. The reason for this is that he stays in the same old traces and never moves forward, therefore he cannot expect to be successful. The farmer can make more progress by using his head a little and trying to find out how to do things better than he is doing them. It would help a farmer very much to use the improved or supervised methods of farming.

The Program

What I would do if I had a farm:

1. Produce more and better products on less land.

That is I would improve my land to get large yields of quality products. If the farmer can do this he will cut down the cost of production.

2. Include crop rotation.

The rotation of crops is a very important factor in farming, because it aids in soil fertility. It helps to control crop pest, and the farmer knows what to plant in the future. Rotation helps to conserve soil fertility as it is not good for the same crop to grow for two straight years on the same land. Rotations also improves the physical condition of the soil, helps to conserve moisture and vegetable matter, aids in control of weeds, increases crop yields, distributes farm labor and helps to systematize farm labor.

3. Work your farm on the budget system. This means a well thought out plan of your time and money. Many of the farmers of today do not know whether their farm is paying or not, all he knows is that he is living, though hard up. The farmer should budget his expenses and conserve his time and money. He should get his time and expenses to balance with his income. Most farmers do not go to this trouble though the time spent is well paid. A well balanced farming system will usually balance a budget.

4. Use legumes to add fertility to the soil.

The use of legumes to fertilize the soil is a good practice to follow. They are the cheapest kind of fertilizer that can be used. They add great quantities of nitrogen to the soil. But if the legumes are

removed for hay instead of being turned under they add nothing to the fertility of the soil. In fact they deplete the soil in phosphorus and potash. Many legumes can be sown in the fall and turned under in the spring, therefore keeping the land occupied all the time. Some of the best winter cover crops are the clover, especially crimson, the vetch and Austrian winter peas. The vetch and peas may be sown with rye. Winter cover crops prevent the land from washing and leaching.

Among the many other things that a farmer can do to help his present condition is to live at home, he should produce enough food for his family and produce all the food for his livestock so that he will not have to buy food products that can be produced on the farm. The farmer cannot be a spend-thrift in the condition that he is now in.

The farmer should practice diversified farming, that means to raise a variety of crops and not specialize in any one crop. He should raise corn, wheat, oats, forage crops and hogs, and plenty of garden products. A well balanced farming program will include livestock and poultry. Because of the low market prices a farmer cannot depend upon one crop. If he is a diversified farmer, and the prices are low he is not hurt as badly because he has raised the food needed for his family and livestock. All farmers should raise products and stock of good quality and type. Good seed and good livestock are essential.

The farmer should study the market demands and raise his products to meet the requirements. He should by all means have good wholesome food for his family.

Do not keep an unproductive type of livestock because they eat more than a good type and utilize their food to a much less advantage. An unproductive animal is an expensive one to keep.

Every farm should have improved pastures to furnish an abundance of cheap feed for the livestock. If the pasture contains swampy areas they should be drained. If the soil is acid it should be limed, and if the pasture is unproductive it should be reseeded and fertilized. To raise purebred livestock and plant certified seed are factors of economy. These factors are very important in successful farming.

Purebred livestock will serve any purpose better than scrubs, and good seed is just as important as a well prepared seed bed. The term "like begets like" holds good in both seed and livestock.

Last but not least is to use the best possible methods of production, because they will pay. The state of North Carolina does not give her farmers recommendations unless they have been tried and proven. Any farmer may get agriculture literature free by writing to the State College of Agriculture in Raleigh.

was here on business last Thursday.

Misses Ruby and Blanche Southard spent last week-end at Franklin.

We are glad to say that Mrs. David Guffie, who has been seriously ill, is improving.

F. J. Southard made a business trip to Clarksville, Ga., last Monday.

L. W. Southard, of Franklin, was in this section on business last week.

Rainbow Springs

A. W. Agee returned Saturday after spending 10 days away on business.

Miss Ann Bailey, daughter of L. O. Bailey, and Mr. Russel Shamate of Statesburg, West Va. were recently married.

Robert Latham, of Buck Creek, has returned to West Virginia University.

The employees of the W. M. Ritter Lumber company seem well pleased with the services of their new physician, Dr. N. G. Williams of Franklin.

Oscar Phillips, who lives on the Black place, is resorted to be ill with heart trouble.

The many friends of Mr. J. M. Smith were shocked to hear of his death at his home in Canton last Tuesday. Mr. Smith was well known in this section, having resided for some time on Black street.

Jess Brooks and Ed Cruse, of Rainbow Springs, and S. M. Wolfe, of Asheville, attended the funeral of J. M. Smith in Canton Wednesday.

Mrs. Ed Cloer, who has been ill for the past week or two, is reported to be improving.

Work on highway 28 in Clay and Macon counties has been de-

layed due to bad weather.

According to reports, the thermometer reached 4 or 5 degrees below zero in Rainbow Springs last week. However no damage was reported at the lumber yard or mill.

LEGAL ADVERTISEMENTS

ADMINISTRATRIX NOTICE

Having qualified as administratrix of C. T. Sanders, deceased, late of Macon county, N. C., this is to notify all persons having claims against the estate of said deceased to exhibit them to the undersigned on or before the 9th day of January, 1934, or this notice will be plead in bar of their recovery. All persons indebted to said estate will please make immediate settlement. This 9th day of January, 1933

EULA SANDERS, Administratrix.

NOTICE OF SALE

North Carolina, Macon County.

By authority of the power of sale vested in the undersigned trustee by a certain deed of trust executed by Franklin Company to G. A. Jones, trustee, on the 28th day of July, 1931, said deed of trust being registered in the office of the Register of Deeds for Macon County in Book of Mortgages and Deeds of Trust in Book No. 32, page 269, to secure the payment of a certain indebtedness in said deed of trust set forth, and default having been made in the payment of said indebtedness:

I will, therefore, sell at the Court House door in Franklin, Macon County, North Carolina, on Monday, the 20th day of March, 1933, at 12 o'clock noon, to the highest bidder for cash, the following described real estate:

Lots Nos. 4, 6, 7, 8, 17, 18, 19, 20 in a tract of land known as Fair Ground park, in the town of Franklin, as surveyed by W. N. Sloan, March 1926.

This land will be sold in separate parcels or by the entire tract at the option of the trustee. Terms of sale will be all cash at time of sale. Upon the failure of any bidder to pay cash for any part of said land at the time of sale, sale of that part will be continued and resold at 2 P. M. of the same day.
G. A. JONES, Trustee.

Baptist Church Notes

BY REV. EUGENE R. ELLER

The Sunday school will meet at 9:45 o'clock. This will be Catch-up Day in the Sunday school. The goal for the offering is \$50.00. Let's all work to reach the goal. Let's have at least 200 in attendance.

Dr. Oscar E. Sams of Mars Hill College will preach at the worship hour at 11 o'clock. Dr. Sams is a man of culture, wide experience, and deep spirituality. Don't miss his message. He is anxious to see all the high school students who are interested in going to Mars Hill college.

The B. Y. P. U.'s will meet at 6:30 and the evening worship at 7:45. We are grateful for the fine attendance in the Sunday evening services. The pastor is bringing messages of the evangelistic type each Sunday evening.

Wednesday evening, February 22 Rev. James A. Ivey, pastor of the West Asheville Baptist church and president of the North Carolina B. Y. P. U. Convention, will preach in the Baptist church. This service is being sponsored by our young people and the public is most cordially invited to attend.

If the weather permits the Sunday school will conduct a religious census of the town Sunday afternoon.

Well's Grove

Mr. Paul Carpenter and Miss Dora Lee Garner were married Saturday, Feb. 11.

Mr. Rufe Ray is on the sick list but we hope him a speedy recovery.

Mrs. G. W. Culver has been sick for the past few days. She had a message Saturday that her son, George Culver, Jr., who is now stationed in the Philippine Islands is seriously sick.

Miss Blanche Cabe went to Cor-

nelia, Ga., Sunday to visit her sister, Mrs. R. C. Snyder.

The B. Y. P. U. is still on foot regardless of the bad weather.

There was a mistake in the Well's Grove locals last week where it mentioned that the Snyder school was progressing fairly well. It should have been the Sunday school instead.

Aquone

(Unavoidably Omitted From Last Week's Press)

Regie Neal, of Franklin, is visiting his parents, Mr. and Mrs. W. D. Neal, at Aquone this week.

Miss Rachel Davis, of Franklin, was in Aquone on business last Thursday.

Elmer Rowland, of Kyle, was the guest of Bob Hawks last Saturday night.

Sherdon Gibby and Willard Roper returned home Saturday from Rainbow Springs, where they have been visiting the past week.

David Walls and Nora Taylor and Grace Wood, of Aquone, attended the prayer services at Earnest Roper's home Sunday night.

W. A. Pendergrass was in Andrews last Saturday on business. E. H. Potts, of Clear Creek, is planning to move to Atlanta next week.

We are glad to see some relief work going on in this district. Ten men are at work on the bridge near Clear Creek. Those men surely need work, but it seems they should draw their pay every night as they can't work without something to eat.

Cartoogechaye

(Unavoidably Omitted From Last Week's Press)

Influenza has been raging seriously in this community.

Arthur Sprinkles and son, from Hiawasse, Ga., was in this section on business last week.

Quince Roane, from Dillard, Ga., was visiting home folks Sunday. Mr. Bowers, of Rainbow Springs,

ILLUSION.

The stage is all set for target practice. The magician lifts his bow and aims an arrow at the bull's-eye. His lovely assistant then steps in front of the target and he shoots the arrow—apparently through her—and it fixes itself in the very center of the bull's-eye! And she smiles through it all while the audience gasps.

EXPLANATION:

The arrow which the marksman "shoots through" his assistant simply folds up into the crossbow! The arrow which is actually embedded in the target is shot by the girl herself from a belt concealed under her dress. She releases a little spring, the arrow unfolds, and shoots straight into the bull's-eye! It is all done in a flash! So quickly the eye cannot detect the girl's movements! To heighten the impression that the arrow has gone right through, the girl releases a ribbon from the front of her dress—the continuation, apparently, of the ribbon attached to the arrow in the target.

It's fun to be fooled — ...it's more fun to KNOW

Like to see through tricks? Then let's look at another... the *illusion* in cigarette advertising called "Cigarettes and Your Throat."

The audience is told that by certain magic processes tobacco can be made as soothing as cough medicine.

EXPLANATION: The easiest cigarette on your throat is the cigarette that is made from the choicest ripe tobaccos. Cheap, raw tobaccos are, as you would naturally expect, harsh in their effects upon the throat.

If you have to consider your throat, the quality of the tobacco in your cigarette is important.

It is a fact, well known by leaf tobacco experts, that Camels are made from finer, MORE EXPENSIVE tobaccos than any other popular brand.

Camels are as non-irritating as a cigarette can be because Camels use choice, ripe, tobaccos.

And because of the matchless blending of these costlier tobaccos Camels have a rich bouquet and aroma... a cool, delicious flavor.

Keep the air-tight, welded Humidor Pack on your Camels... to assure yourself and your companions a fresh, cool smoke.
