## THE WORLD'S FINEST TYPE OF MOTOR

# powers the Car

# without a Price Class

**THE V-type engine** hurled an Italian plane through the air at seven miles a minute. It swept a racing car down a Florida beach to the world's land speed record... 270 miles per hour.

Only Ford has been able to put the V-type 8-cylinder engine in an inexpensive car. The next lowest priced V-8 cylinder car sells for \$2545.

At 55 this Ford V-8 is just loafing along—effortlessly. Yet despite performance that lifts it out of the low price class, the new Ford V-8 is the most economical Ford ever built.

The Ford V-8 is the only car that offers you the riding ease of free action for all four wheels—plus the priceless safety of strong axle construction.

Before you buy any car at any price, drive the Ford V-8.
