

# Evergreens Give Holiday Atmosphere to the Home

A few evergreen decorations, brightened with splashes of red here and there, will give the home a holiday atmosphere during the Christmas season.

"You can make your own decorations if evergreens are growing in woodlands near your home," said Miss Pauline Gordon, State college extension specialist in home management.

In most North Carolina woodlands can be found holly, laurel, cedar, pine, running cedar, southern smilax, mistletoe, pine cones, spruce cones, and many varieties of colorful berries.

When gathering these greens, Miss Gordon cautioned, be careful not to uproot the plants or disfigure the trees. In places, evergreens are becoming scarce as a result of thoughtless destruction.

Holly is an unusually slow-growing tree, she added, and especial

care should be exercised to protect the trees. Snip off only small branches, and don't cut away more than one-fifth of the trees' leaf surface. Cut the branches, never break them off.

In making decorations, one needs wire for wreath foundations, wire cutters, pliers, twine, a sharp knife, and a pair of garden shears.

It is necessary to have a frame to make a wreath. It may be made of wire and one of the evergreen vines, such as smilax and running cedar, or boughs may be entwined about the wire. Such boughs must be long and flexible.

Then clip the evergreens into even-sized pieces and fasten them to the frame until the entire wreath is formed. It may then be trimmed with pine cones, red berries, mistletoe, cranberries, tangerines, kumquats, grapes, apples, lemons, or other bright colored objects.

No wood commonly used in buildings and other structural fields is strictly "fireproof."

## SOIL-BUILDING TO BE STRESSED

### 1937 Farm Program Will Encourage Conservation Crops

Soil-building will be given greater emphasis in the 1937 conservation program, according to Dean I. O. Schaub, of State college.

Farmers will be encouraged to grow fewer money crops and more crops for soil-conservation and for providing food and feed for home consumption, he pointed out.

Larger soil-conserving crop bases will be established, he added, and there will be stricter regulations regarding the minimum acreage of conserving crops required.

The minimum payment any farm will be allowed to earn has been increased from \$10 to \$20, and it may be earned by carrying out soil-building practices or reducing cash crop acreage or both.

The rate of payment per acre for carrying out soil-building practices will be in line with those paid this year.

Growers will not be encouraged to divert their base acreages of soil-depleting crops, but when considered advisable, county committees will authorize them to do so. Payments for these diversions may be slightly less than they were this year.

Soil-depleting crop base acreages for each farm this year will be carried over into 1937, with such minor adjustments as may be necessary to correct inequities.

More consideration will be given dairy farmers, truck growers, and orchardists, the dean also pointed out.

### Only Good Eggs Will Produce Good Chicks

Some poultrymen are more optimistic than businesslike in their methods.

This is especially true of those who assemble all kinds of eggs, good or bad, for hatching purposes, said Roy S. Dearstyn, head of the State college poultry department.

"You can't get more out of your incubator than you put into it," he declared in urging poultrymen to be more careful in selecting eggs for hatching.

Hatching eggs should come only from high quality, healthy, vigorous birds. They should be normal in shape, have well calcified shells, and weigh more than 23 ounces to the dozen.

They should be gathered several times a day and stored in a warm place to avoid chilling, he said, as eggs that have chilled too much will not produce good chicks. A temperature of 40 to 60 degrees is best.

Hatching eggs should not be kept in storage for more than seven to ten days, he added.

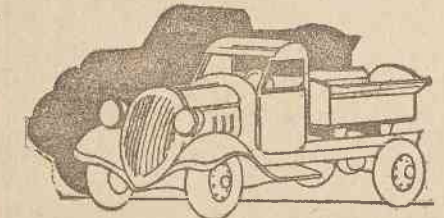

Giraffes cost \$500 a foot.

An ordinary giant puffball contains 6,000,000,000 spores (seeds).

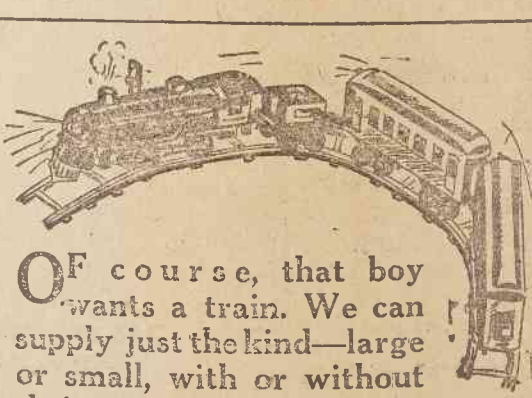

Table salt rubbed on non-washable window shades will re-new their freshness.

# FUN FOR ALL IN TOYLAND

Bring the Youngsters

**Motorize!**  
JUNIOR has always been keen about motors. Here you will find toy trucks and cars, 5¢ to \$5.

Of course, that boy wants a train. We can supply just the kind—large or small, with or without their own motive power.
