

### Lake Emory

(By MRS. J. R. BERRY)

#### SAUNDERS-SHULER

Miss Dorothy Saunders, of Ridgecrest, was secretly married to Mr. Charlie Shuler March 20, at Clayton, Ga., by Rev. Mr. Smith.

Mrs. Shuler has just announced her marriage.

The 18-year-old bride is the daughter of Mr. and Mrs. J. B. Saunders. The groom is a CCC boy and son of Mr. Sam Shuler.

The bride, when married, was wearing a gray ensemble with red accessories.

Mr. and Mrs. Shuler are going to make their home at Canton.

The co-operate observer at the Franklin station kept at Lake Emory reports the rainfall for April to have been 5.12 inches. The total for March was only 1.49 inches.

The infant daughter of Mr. and Mrs. Jess Thompson, Annette, has been very ill for the past few days.

Mr. and Mrs. Dewey Hyatt, and children, from Hazelwood, spent the week-end of last week with Mr. and Mrs. Hyatt, a brother of Mr. Hyatt.

I wish to correct a mistake of last week:

Miss Alice Dean did not go to Asheville to study beauty culture, as it was announced, but to Knoxville, Tenn.

Mr. Veral Anderson was recently operated on at the Angel hospital, and is getting along nicely.

Mr. George Shidels and daughters, Louise and Lois, were visiting relatives on Savannah, Jackson county, Monday of last week.

We are very sorry that Mr. Luther Anderson's health will not permit him to report Lake Emory news at the present time. Hope that he will be able to continue reporting in the near future.

### Van Buren Carter Joins Alpha Phi Sigma

CULLOWHEE, May 5.—Van Buren Carter, of West's Mill, has been admitted to the Alpha Phi Sigma honorary fraternity at Western Carolina Teachers college. Membership in this fraternity is limited to students maintaining a high scholastic rating.

He is a member of the freshman class. He is the son of Mrs. S. W. Carter of West's Mill.

### Nitrate of Soda Is Fatal to Livestock

Sodium nitrate in fertilizer is good for grass but bad for livestock.

Dr. C. D. Grinnells, veterinarian at the N. C. Agricultural Experiment Station, warns that nitrate often causes a rapid, fatal inflammation of the stomach.

Before turning stock into a pasture where nitrate has been applied, he said, be sure that enough rain has fallen to wash the nitrate off the grass and down into the soil.

He also cautioned against leaving bags of nitrate around where domestic animals can get at it.

at \$9 per thousand.—Zickgraf Hardware Co., Franklin, N. C. ltc

WANTED—A house close in, or would consider rooms, to take possession June 1.—Call or write Mrs. W. C. Burrell, Box 201, Clayton, Ga. ltp

FOR SALE—Choice corner lot and good 11-room house with modern conveniences, close in. Can be bought at bargain. Possession at once.—D. G. Stewart, Franklin, N. C. ltp

FREE—If excess acid causes you Stomach Ulcers, Gas Pains, Indigestion, Heartburn, Belching, Bloating, Nausea, get free sample doctor's prescription, Udga, at Perry's Drug Store. M18-12tp-J3

We are always in the market for oak, baswood, poplar, birch, maple, cherry and chestnut logs. We pay stumpage for good loggers. Inquire at office.—Zickgraf Hardware Co., Franklin, N. C. ltc

MAID WANTED—Summer resident of Highlands wants first class cook and maid for family of two. State full qualifications and references.—Address P. O. Box 114, Highlands, N. C. ltc

## Entire Nation Hails Peace in Auto Industry

PLATE GLASS:	146,500,000 sq. ft.	72%
CRUDE RUBBER:	960,000,000 lbs.	75%
STEEL:	6,500,000 tons	20%
MALLEABLE IRON:	290,500 tons	54%
LEATHER:	12,000,000 sq. ft.	31%
COTTON:	612,000 bales	10%
WOOL UPHOLSTERY:	46,750,000 yards	
MINING: LEAD:	215,000 tons	35%
COPPER:	128,000 tons	17%
NICKEL:	19,000,000 lbs.	28%

The vital importance to the entire nation of restored peace in the auto industry is shown by this latest survey of raw materials consumed during a single year.

One out of every seven American workers now derives his daily bread—either directly or indirectly—from the automobile industry. Miners of lead, zinc and copper, cotton pickers in the South, sheep herders in the West, industrial workers in hundreds of cities—all owe a big part of their income to the modern motor car. Business in every state quickens with renewed activity in big auto plants like the Plymouth factory at Detroit, world's biggest single production unit for finished cars, as new Plymouth

models again move out to 12,500 dealer showrooms throughout the United States.

A single low-priced car like the 1937 Plymouth, when it comes off the assembly line, contains 1,700 pounds of steel and 500 pounds of iron, 70 pounds of safety glass, 180 pounds of rubber including tires, 60 pounds of copper, 20 pounds of aluminum, and other materials too numerous to mention.

Thus the automobile industry is now the No. 1 consumer of steel, malleable iron, rubber, oil, plate glass, mohair, nickel, lead and gasoline, the latest survey shows. Total amounts used by the industry in a single year are shown by the tables above, with the percentage of total production these figures represent.

### Navy to be Increased By Addition of 5,000

The Navy bill which was signed by the President prior to his departure for New Orleans calls for an increase of 5,000 enlisted men. The opportunities are many for young men of Western Carolina to learn a trade, travel and increase their knowledge. Any young man who is interested in the Navy as a career should call at the Navy Recruiting Station, Postoffice Bldg., Asheville, N. C.

The heaviest water in the ocean is in the Antarctic.

Rope and cord made out of glass yarn are now on the market.

YOU have the written testimonials of thousands of motorists as you get extra mileage with Essolene gasoline at regular price. more miles per gallon than premium priced gasolines and the price gives more.

Essolene is different... actually been granted a U. S. patent, patented, loaded with one tankful and see why it Starts at the Esso Sign.

STANDARD OIL

### Plant Soybeans and Cowpeas During May

Soybeans, "the crop with a future," produce a better yield of hay and seed if planted in May rather than in June or July.

The many uses that are being developed for this crop are fast making it a valuable source of cash income, to say nothing of its value in soil-building, said E. C. Blair, extension agronomist at State college.

Growers who wish to have a good acreage of soil-conserving crops to qualify for payments under the soil-conservation program will find soybeans well adapted for this purpose, he added.

For plowing or disking under soybeans, velvet beans, or cowpeas as green manure after they have attained a normal growth of at least two months, payments will be made at the rate of \$2 an acre. If they are left on the land, the payment will be \$1 an acre.

Blair also pointed out that \$1 an acre will be paid for planting crotalaria, which is considered the best legume that can be grown in sandy soil areas of this state.

Velvet beans should be planted as early in May as possible, while crotalaria should be sown during the latter part of the month. Cowpeas may be sown at about the same time as soybeans.

Blair added that the payments usually take care of the cost of growing these crops, but their soil-building value to a farm is worth far more than the payments.

These crops may also be used to replace cotton, tobacco, and other soil-depleting crops when farmers wish to earn the diversion payments offered for taking land out of depleting crops and putting it into conserving crops.

An agricultural scientist grades soil into seven grain sizes: Gravel, coarse sand, medium sand, fine sand, very fine sand, silt and clay.

Less than 10 varieties of chicken are commercially important in this country, though 140 standard varieties are recognized.

### Says Brick Brooder Is Best For Poults

"A brick brooder has it all over a turkey or chicken hen in raising poults," said C. F. Parrish, extension poultry specialist at State college.

A hen can be used successfully in small flocks, he added, but unless great care is exercised, the losses will be heavy.

Either way, he continued, the young turkeys should not be allowed to range on ground with older birds or where adult turkeys or chickens ranged the year before.

Where a brick brooder and a brooder house are used, both should be cleaned thoroughly and moved to a new location not used by poultry or turkeys during the past two years.

The brooder should be operated in about the same manner as for chicks. Start the brood with a temperature of 95 to 100 degrees where canopy brooders are used, or a room temperature of 75 to 80 degrees when brick brooders are used.

Reduce the temperature gradually. After six or seven weeks, depending on the weather, the heat can be discontinued.

Poults are the least intelligent of fowls, and must be taught where to eat and drink and where to find warmth.

Liquid milk makes a good food for the first feedings. The solid food may be oatmeal flakes, Johnny cake, boiled eggs, cornbread crumbs, bread soaked in milk with the surplus milk squeezed out, or other such palatable feedstuff.

If these feeds are used, they should be mixed with fresh, tender, green feed chopped fine. Start feeding a good balanced ration, with plenty of protein, as soon as possible. Some growers prefer to start the poults right away with a regular baby chick starter.

### Permanent Pastures Now Ready to Graze

Beef cattle should be turned into permanent pastures in May, for by this time the grass is in good condition for grazing, said Earl H. Hostetter, professor of animal husbandry at State college.

While on the summer range, he continued, the animals will require less care and will need no feed other than good pasturage, but they should be inspected regularly and given plenty of salt.

The bull should be turned with the beef cattle herd about the first of May so that next year's calf crop will be early and uniform, Professor Hostetter added.

"And remember, a purebred bull improves the value of the calves and in the long run is worth more than he costs," he says.

## WANTED

By

W. L. Richardson & I. M. Roberts

Beans—Fordhook Limas—Yellow Squash—Cucumbers and Tomatoes

We will open our packing house in Franklin July 10th, and will pay cash for all produce listed above.

We have bought produce in this section for the last 10 years, and find August the best month. We have never been able to get enough produce to supply the demand. So let everybody plant all they can this year. We will have a good market all summer.

We will not be in the market for tomatoes and squash until August.

For Further Information Write:

W. L. Richardson or I. M. Roberts  
651 Poplar Street  
Macon, Ga. Plant City, Fla.
