Quality Tire at This New Low Price**

Because Firestone saves money by controlling and securing rubber and cotton at the sources and by more efficient manufacturing and distributing. These savings make possible extra values at lower prices. You get:

High Quality — First choice rubber and selected cotton that conform to Firestone's high standards and rigid specifications.

Long Mileage — Safe, silent tread design made of tough, slow wearing rubber that assures long mileage. Sturdy bars and rugged notches give protection against skidding.

Blowout Protection — Nine extra pounds of rubber are added to every 100 pounds of cord by the Firestone Patented Gum-Dipping process. Every fiber of every cord in every ply is saturated with liquid rubber which counteracts internal friction and heat that ordinarily cause blowouts.

Puncture Protection — Firestone's patented construction of two extra layers of Gum-Dipped cords under the tread protects against punctures.

New Low Prices — Never before have all these safety and economy features been combined in a tire priced so low.
