

### Town and Farm In Wartime

#### CIVILIANS AT WAR

The Government needs and asks its citizens in the 178th week of the war to:

1. Stay in the fight against a wartime rise in prices. Inflation will remain a danger until supply and demand regain a normal balance. Buy only what you need. Save your money for the better products to come after the war.

2. Ask your local salvage committee whether your community has tin collection facilities. If so, save and turn in all discarded tin cans.

3. Serve all the daytime hours you can spare if you are a trained Nurse's Aide. Employ the training the Red Cross has given you, thus releasing registered graduate nurses to use their special skills.

#### REMINDERS

The last dates for use Stamps listed below are as follows:

**Meats, Fats**—Red Stamps Y5, Z5, and A2 through D2, June 2. Red Stamps E2 through J2, June 30. Red Stamps K2, through P2, July 31. Red Stamps Q2 through U2 will be validated May 1, August 31.

**Processed Foods**—Blue Stamps H2 through M2, June 2. Blue Stamps N2 through S2, June 30. Blue Stamps T2 through X2, July 31. Blue Stamps Y2, Z2, A1, B1, C1 validated May 1, August 31.

**Sugar Stamps**—35, June 2, 36, validated May 1, August 31.

**Shoes**—Airplane stamps Nos. 1, 2, 3, in Book Three continue valid indefinitely.

#### State College Answers Timely Farm Questions

Q. How much space should be allowed for feeding poults?

A. Young turkeys require 1 lineal foot of feeder frontage for each 5 poults, according to Prof. R. S. Dearstyne at State College. At 4 weeks of age, change to intermediate size feeders and provide 2 feet for each poults. He also suggests two fountains of three-gallon capacity for 125 poults and that they be kept filled with fresh, clean water at all times. This amount of water should be doubled not later than the fourth week.

Q. Where can I get log measure tables?

A. Just ask the county agent or one of the Extension foresters for a copy of Extension Folder No. 59. It gives tables for both Doyle and International log rules. These tables are designed for measuring logs from 8 to 40 inches in diameter and short logs as used by handle plants and veneer mills in lengths of 30 to 96 inches, as well as longer or standard logs

### State College Hints For Farm Homemakers

BY RUTH CURRENT

Honey and peanut butter make a favorite combination for filling sandwiches and spreading on toast. Mix honey and peanut butter just before using, because the mixture soon hardens. The popular flavor and high-quality protein, energy value and B-vitamins of peanut butter make it a good food in soups, main dishes, and desserts as well as in sandwiches.

One thing is certain say nutritionists. Going without breakfast is a bad start for the day. It's been found that workers who skip breakfast get less done in the first working hour than those who tuck away a good meal before work. As the morning goes on, the hungry ones grow less efficient. After lunch they do better; then they slow up again. What happens to these workers happens to homemakers, too, and to everyone else. It's especially true for children. A child who eats a good breakfast has a better chance to do well with studies and games.

### Labor Profit Of \$2 A Day By 4-H Boy

Everyone likes a winner but especially the fellow who has failed in his first endeavor and then comes back to make a rousing success. That's the story of Roy Staton of the Marshallville 4-H Club in Union County.

Last year Roy began his poultry work with 500 chicks but he allowed his brooder to get too hot and lost a number of chicks. Later the chicks in this weakened condition were attacked by coccidiosis and further losses occurred. As a result, he raised only about 350 out of his 500 chicks.

This year Roy joined the poultry club and began work under the direction of N. B. Nicholson, assistant county agent of the State College Extension Service. He profited by his experiences of last year and followed instructions closely, raising 493 chicks out of a brood of 500.

Roy also kept a careful record of his work at Nicholson's suggestion. He listed his expenses as \$45 for chicks, \$12 for litter, \$114.87 for feed and wood, and a miscellaneous expense of \$1.75.

"In the eleventh week I sold the pullets and 15 cockerels for breeding purposes for \$207.50," Roy said. "During the twelfth week I sold the remainder of the cockerels for \$137.55. My labor profit was \$171.43 for 12 weeks of work, or \$2.04 a day for work after school."

for lumber in 8 to 20-foot lengths, according to R. W. Graeber, in charge of Extension forestry at State College. He will forward you a copy of the folder on receipt of a card.

### NOTICE OF SALE

State of North Carolina, County of Macon, Plaintiff.

Byron E. Hamlin and wife, Hamlin, and Unknown Heirs at Law of Byron E. Hamlin, Defendants.

Under and by virtue of a decree of the Superior Court of Macon County entered in the above entitled action on the 30th day of April, 1945, the undersigned Commissioner will on the 31st day of May, 1945, at 1 o'clock, noon, at the Courthouse in Macon County, North Carolina, sell to the highest bidder for cash the following described real estate:

All the mines, minerals, mineral rights, ways, and so much of the woods, timber, water, and water courses as may be necessary for the full and free operation of the mines and mining rights, milling and manufacturing purposes in, under and upon all of those four certain pieces, parcels or tracts of land situated on the waters of Ellijay, in Ellijay Township, Macon County, North Carolina, and bounded and described as follows:

State Grant No. 2556, BEGINNING at a hickory on a ridge; thence South 20 West 164 poles to a hickory; thence 60 West 80 poles to a chestnut; thence North 50 poles to a white oak; thence West 36 poles to a hickory; thence North 120 poles to a lynn; thence East 150 poles to a chestnut; thence South 14 East 70 poles to the place of BEGINNING, containing 100 acres.

State Grant No. 2557, BEGINNING at a buckeye, the Southwest corner of old survey; thence South 70 West 60 poles to a white oak; thence North 20 East 14 poles to a chestnut; thence North 40 East 24 poles to a chestnut; thence North 50 West 40 poles to a hickory; thence North 65 East 52 poles to a chestnut; thence South 5 West 95 poles to the BEGINNING, containing 30 acres.

State Grant No. 2558, BEGINNING at a chestnut in James Peek's line, thence West 80 poles to a walnut; then North 10 West 58 poles to a buckeye; thence East 70 poles to a maple; thence North 50 poles to a Spanish oak; thence South 70 East 110 poles to a chestnut; then South 100 poles to a black oak; then West 100 poles to a white oak; then North 40 poles to the BEGINNING, containing 100 acres.

State Grant No. 2559, BEGINNING at a poplar 112 poles East of the Southeast corner of No. 113, runs South 117 poles to a beech on the Camp Branch of Ellijay; then West 70 poles to a buckeye; then North 114 poles to a stake and pointers; thence East 72 poles to the BEGINNING, containing 51 acres.

This, the 30th day of April, 1945.

R. S. JONES, Commissioner.

### NOTICE OF SUMMONS

State of North Carolina Macon County

In the Superior Court Belva Martin Jacobs, Plaintiff vs. Carl V. Jacobs, Defendant

The defendant, Carl V. Jacobs, will take notice that an action as above entitled has been commenced in the Superior Court of Macon County, North Carolina, to the end that the plaintiff may secure an absolute divorce under the laws of the State of North Carolina; and the defendant will take further notice that he is required to appear on or before the 25th day of May, 1945, in the office of the Clerk Superior Court, Macon County, North Carolina, and answer or demur to the complaint in said action, or the plaintiff will apply to the Court for the relief demanded and same will be granted.

This the 24th day of April, 1945.

EDITH C. BYRD, Ass't Clerk Superior Court. A26-4tc-M17

### EXECUTOR'S NOTICE

Having qualified as executor of Mrs. H. A. Jones, deceased, late of Macon county, N. C., this is to notify all persons having claims against the estate of said deceased to exhibit them to the undersigned on or before the 6th day of April, 1946, or this notice will be plead in bar of their recovery. All persons indebted to said estate will please make immediate settlement.

This 6th day of April, 1945. Dock Carpenter, Executor 365 Haywood Road, W. Asheville, N. C. A12-6tp-M17

Average gestation periods are: sow, 114 days; ewe, 147; goat, 150; cow, 283; and mare 340.

Use two pounds of arasan in treating 100 pounds of shelled peanut seed for better stands and larger yields.

### Proper Storage Of Eggs Saves Money

In warm weather rapid changes take place inside the egg unless it is stored in a cool, moist place. The quality of an egg cannot be improved after it is laid but the original freshness and quality can be preserved until it is marketed.

T. T. Brown, Extension poultry specialist at State College, suggests that eggs be cooled quickly after they are gathered, kept under proper storage conditions, and then be marketed once or twice a week.

Since fertile eggs deteriorate much more rapidly than do infertile eggs, he also suggests that all cockerels be sold or separated from the laying flock as soon as hatching eggs are no longer needed.

A basement, cellar, insulated room, or a tobacco ordering pit is a good place to store eggs in summer. The room should be kept reasonably moist and well ventilated. Hydrated lime may be sprinkled over the floor to check mold development and prevent musty odors. Opening the windows at night and closing them during the day helps to maintain a lower temperature.

"Poor storage and handling of eggs during hot weather causes large losses to the farmer and to the consuming public," Brown says. "Under present meat shortage conditions when every possible egg is needed for food, proper storage not only saves money but also valuable food."

North Carolina wool will probably be marketed cooperatively this year as last through the United Wool Growers Association, says Leland Case, Extension animal husbandman at State College.

### EXECUTRIX NOTICE

Having qualified as executrix of Bessie M. Richardson, deceased, late of Macon County, N. C., this is to notify all persons having claims against the estate of said deceased to exhibit them to the undersigned on or before the 25th day of April, 1946, or this notice will be plead in bar of their recovery. All persons indebted to said estate will please make immediate settlement.

This 25th day of April, 1945. M. Gertrude Swanson, Executrix.

A19-6tp-M24

### Save Those Pigs That Usually Die

About one-fourth of the pigs die between farrowing and marketing and a large part of these losses can be prevented says Dr. C. D. Grinnells, veterinarian of the Agricultural Experiment Station at State College.

He gives the following suggestions for control of some of the common causes of baby pig losses. Provide a balanced diet for the sow with needed minerals and vitamin A to help prevent scours, which is caused by the toxic quality of the sow's milk. Minerals and vitamin D help to prevent rickets.

There is also a baby pig disease caused by a sugar deficiency. Feeding of plenty of carbohydrates prevents this and sometimes an injection of glucose is needed to save the pigs. The baby pig also needs iron in his system and the placing of clean sod in the pig creeps helps to take care of this condition. Iron salts solution is often sprinkled over the sod.

Parasites are always a problem in pig growing and for this reason it is suggested that the sow and pigs be kept on the fresh land of temporary grazing crops or in clean pastures.

Dr. Grinnells points out that many pig diseases trace back to the feeding of the sow before and after farrowing. If she does not get the proper feeds, she is unable to properly nourish her pigs. "Pigs saved by the above suggestions are one of the quickest ways of increasing the meat supply," he says.

The National 4-H Better Farm-and Home Methods Electric Contest is designed to encourage farm boys and girls to learn how to apply principles of work simplification to every type of activity.

### FARM HINTS Worth Knowing

Chicks and young chickens on U. S. Farms as of April 1 were estimated at 203 1/2 millions compared with almost 229 million last year. Raise an extra brood to swell the meat supply.

Turnip greens, put in cold water and cooked for 30 minutes, held one-third of their vitamin C. When put in boiling water and cooked for the same time, they retained three-fourths of their C.

Never pour boiling water over cold dishes, or cold water on hot dishes. Harsh scouring and strong soaps may also damage dishes.

Egg production in North Carolina during the first three months of the year was 293 million as compared with 296 million last year. With fewer early pullets, what about the fall lay?

Sampson county collected 5,884 pounds of waste fat in February and March through the 4-H clubs, says Mrs. Estelle T. Smith of State College, chairman of the State Fat Salvage committee.

When someone's barn burns, there's always the expression: "The work of years gone up in smoke." The same thing happens when the farm woodland burns.

All poultry houses should have plenty of sunlight. This sunlight helps to keep the house dry, is a good germicide, and serves to produce vitamin D in the bird's body.

Fordhook 242 is a new lima bean that has distinguished itself for heavy yields, superior adaptability, and a long bearing season.

### ELECTRICAL WIRING

LET US BOOK YOUR ELECTRIC WIRING AND ELECTRICAL APPLIANCE IN NEED OF REPAIR

SPECIAL ATTENTION GIVEN TO SCHOOL CHILDREN

They raised the Flag again on Corregidor...

### Let's raise the money in the MIGHTY SEVENTH

OUR FLAG flies once again over Corregidor. The cost was great in blood and pain, but our fighting men did not turn back. And on Iwo Jima, four thousand men—more and more—died to take the long step forward to Victory. Twenty thousand others suffered wounds. Yes, we're on the way to Tokyo!

At home, your contribution to Victory is measured in dollars. The

Seventh War Loan is the biggest in America's history because seven billion dollars must be raised from individuals alone. That means you must buy more and bigger War Bonds.

This is really two great loans in one; for this time last year you had been called upon twice to subscribe in War Loans. As our fighting men raise Old Glory all over the world—let's raise the money back home!
