

Weekly Roundup

Of OPA Price and Rationing News

For Week of May 28, 1945

Processed Foods: Blue Stamps H2, J2, K2, M2, now valid, expire June 2. N2, P2, Q2, R2, S2, now valid, expire June 30. T2, U2, V2, W2, X2, now valid, expire July 31. Y2, Z2, A1, B1, C1, now valid, expire August 31.

Meats and Fats: Red Stamps Y5, Z5, A2, B2, C2, D2, now valid, expire June 2. E2, F2, G2, H2, J2, now valid, expire June 30. K2, L2, M2, N2, P2, now valid, expire July 31. Q2, R2, S2, T2, U2, now valid, expire August 31.

Sugar: Sugar Stamp No. 35 good for 5 lbs., expires July 2. No. 36, good for 5 lbs., expires August 31.

Shoes: Airplane Stamps No. 1, No. 2, No. 3, now good.

Fuel Oil: Periods 1, 2, 3, 4, 5 valid for 10 gallons each.

Gasoline: A-15 coupons valid through June 21. Rationing rules now require that each car owner write his license number and state on each coupon in his possession as soon as it is issued to him by his local rationing board. Your mileage rationing record must be presented to the board when applying for all passenger car gasoline rations.

Increase Gas Allotment

Automobile drivers in Macon county are the beneficiaries of an increase in gasoline rations, effective in June, OPA District Director in Charlotte said. The value of "A" coupons will be increased from four to six gallons on June 22, when the new A-16 coupon becomes valid. The limit for "B" card holders will show an actual need for more gasoline will be raised to 650 miles per month on June 11.

The additional quantities to be made available to civilian use are not guaranteed for any certain period of time but must always remain dependent upon changes in the military demand. The military has always had, and must always have first call, he explained.

In explaining the increase in the "B" card ceiling, L. W. Driscoll pointed out that a person who needs only 200 miles a month will continue to receive only that amount. But a person who uses his car in his business and who needs more than he is now receiving will be able to get additional rations up to 650 per month. In both cases they will receive the 50 per cent increase in the "A" ration, he assured.

Increased Interest In Poultry Raising

Because of the meat rationing, the American people are becoming more interested in poultry raising. Evidence of this is contained in a recent survey made regarding requests sent to General Electric's station WGY here for farm bulletins. Poultry subjects were among the top requests during seven months out of twelve, according to Robert B. Child, in charge of programs, WGY agricultural broadcasting.

Every year several thousand requests are received by WGY, asking for booklets offered over the station's two agricultural programs, the daily Farm Paper of the Air and the Weekly Farm Forum.

Tips For Growing Healthier Pullets

Putting pullets in range shelters on fields with plenty of tender green feed is one of the best practices for producing healthier and faster growing pullets, says C. F. "Chic" Parrish, in charge of Extension poultry work at State College.

He suggests that the range shelter be made about 9 by 10 feet to accommodate 100 pullets. It should be built on skids so that it can be moved to a new location about once a

Graduation Class of Franklin High School, 1944-1945

First row left to right: Lois Howard, Helen Gibson, Frances Baughn, Carolyn Leach, Dorothy Jean Rogers, Carolyn Long, Violet Barnard, Arthur Proctor, Lee Roy Roper, Beatrice Ramsey, Grace Younce, Eva Nell Clarke, Betty Gregory, Dorothy Corbin, Catherine Pipes, Jennie Mason, Edna Jennings Dowdle, Annie Burr Huggins, Ava Nell Ray, Fae Ammons, and Mildred Shuler. Second row: Miss Pauline Reed, Mrs. Marie P. Stewart, Ruth Smith, Dorothy Guy, Annie Will Howard, Jeanette Harrison, Margaret Moore, Anne Flanagan, Frances Furr, Mary Lou Liner, Edna Will Mashburn, Annie Lou Huscusson, Lavinia McCoy, Freda Edwards, Grace Raby, Joanna Welch, Hazel Keener, Hattie Nell Henry, Ruth Poindexter, Shirley Welch, Janice Reynolds, Mary Constance, Zena Pearl Rickman, Ruth Edwards, Jessie Lee Downs, and Mr. George H. Hill, principal. Third row: Margaret Vanhook, Violet Lakey, Zana Kate Anderson, Helen Johnson, Elsie Brown, Catherine Meadows, Carol Lee Roper, Dorothy Leatherman, Lassie McCall, Helen Duvall, Kathleen Sellers, Sallie Morgan, Kathryn Patterson, Evelyn Stiles, Iva Dell Norton, Grace Long, Hazel Styles, and Nettie McCall. Fourth row: Bill Cochran, Howard Southards, Bobby Ramsey, Earl Cabe, John Erwin Bradley, Edward Bryson, Carl Mason, J. L. Sanders, Kenneth Corbin, Charles Keener, Edward Rickman, Cecil Tallent, Glenn Hunter, Elmo Rogers, Howell Smith, Charles Jacobs, Wilford Corbin, Fred Kinsland, Lewis Cansler, Jack Nichols and Max Greene.

New fats and oil quotas for household bar and package soaps and for industrial soaps have been reduced. This means to save more salvage fat in the kitchen.

month or whenever the pullets eat all of the green feed near them.

Soybeans and corn with about 300 or 400 pounds of complete fertilizer per acre and no chicken manure will provide excellent grazing. This is also true with lespedeza and alfalfa, where the lespedeza was killed by the freeze, beans and corn can be planted.

The average farmer or poultryman, for that matter, can just about double the water and feed hopper space that he figures to be sufficient for his flock and find it a paying investment, Parrish says. Chickens make relatively fast growth and they respond quickly to plenty of feed and water.

Parrish especially recommends the outdoor feed hopper which is described on Page 8 of War Series Extension Bulletin No. 5, entitled "Equipment for Poultry." This hopper keeps out the rain and the sun from the feed. A free copy of the publication may be obtained by writing the Agricultural Editor, State College, Raleigh.

SAFE SWIMMING

Summertime swimming offers risks as well as fun. The American Red Cross, through its chapters all over the country, helps keep the risks at a minimum by offering a year-round program of instruction and information in water safety and first aid.

The Red Cross National Aquatic Schools, which report a record enrollment for the current year, train swimming instructors and program directors in all phases of water safety. Red Cross representatives visit summer camps and communities desiring water safety instruction. Any Red Cross chapters supply information and suggestions covering all phases of this program.

Nitrogen Produces Large Corn Yields

New methods for increasing corn yields in North Carolina are being tested by a large number of growers this year and the use of large amounts of nitrogen per acre, when the corn is about knee high, is one of the most important points in the plan.

State College agronomists of both the Agricultural Experiment Station and Extension Service call special attention to the five steps in increasing corn yields. These five steps are the use of a proven local variety or an adapted hybrid; adapting the fertilizer to suit the soil conditions; providing enough plants to produce desired yields; avoiding late, deep cultivation, where possible; and varying the topdresser with soil fertility and expected yield increases.

For yields up to 50 bushels per acre, 6,000 plants per acre are needed; for 50 to 75 bushels, 7,200 plants; and for 75 to

100 bushels, about 9,400 plants.

Tests have shown that where land produces from 15 to 35 bushels per acre with little or no nitrogen topdressing, the following increases per acre may be obtained, if all practices as to plants and cultivation are followed: 20 pounds of nitrogen per acre, 10 to 12 bushels; 30 pounds of N, 15 to 18; 40 pounds of N, 15 to 25; 60 pounds of N, 25 to 35; 80 pounds of N, 30 to 45; and 100 pounds of N, 30 to 50 bushels of corn.

Fertilization recommended at planting for corn in rotation with heavily fertilized crops is 200 to 300 pounds of 6-8-6 or 5-7-5 and in rotation with legumes for seed and small grains, 300 to 500 pounds per acre. In rotation with legumes, the recommendation is 300 to 500 pounds of 4-8-8 per acre.

Quail Roost Noble Primrose, at a recent Maxim sale at Quail Roost Farm, sold for \$17,000, which is the highest price ever paid for a North Carolina cow.

That's like getting mad at a fellow for spotting a rattlesnake under your bed.

PRESS ADS PAY

STOP!

CAN YOU?

Brakes that seem O.K. under normal conditions may not have the reserve needed when trouble is just ahead... when a quick stop is the only way out!

WHAT GOOD BRAKES DO You should be able to bring your Ford car to a complete stop within 30 feet or less when traveling at 20 miles per hour.

TEST BRAKES TODAY If you're not sure of your brakes, let us test them. It will take only a minute.

SERVICE PREFERENCE We give brake service top preference and install genuine Ford brake materials recommended by the Ford Motor Company.

Duncan Motor Co. Franklin, N. C.

SALES SERVICE

We welcome this opportunity to co-operate with the police of the nation in the National "Check Your Brakes" Program.

PUT YOUR BUSINESS IN HIGH GEAR BY USING PRESS ADS.

JUST RECEIVED...

- Shipment of Chilean Nitrate of Soda (Champion Brand) for side dressing corn, beans, etc.
● Seed Beans for market
● Complete line of insecticides
● Cane seed, millet and beans for hay crop
● Bone Meal, tankage for hogs.
● Quaker Fui-O-Pep feeds.
