### SAYS SECRETARY OF AGRICULTURE:

## Despite Victory. Used Fat Saving Must Go On!

Every woman in America should know that our country continues to face a serious fat shortage. And victory over Japan won't solve the problem immediately. We must keep on saving used fats in our kitchens!

If you have any thought that saving used fats is one of those wartime chores we can drop, now that Victory is here, please consider these facts and tell them to your neighbors.

**America still needs salvaged fats.** Not even at the peak of our war effort, when fats were required for mountains of shells and bombs and medicines, in addition to the ever-present need for soap, were our needs for salvaging fat greater than now. Our stocks have been drained by four long years of war, and there isn't enough on hand to meet all requirements.

**Don't let "Victory psychology" blind you to this national need!** If housewives stop saving fats now, the shortage will become even more critical.

**Don't let a single drop of used fats go to waste!** Little trimmings of fat left on plates, even the skimmings of soups and gravies are important. It is the consistent saving of these small amounts that counts.

**Don't turn in fats that can be re-used!** But some fats, such as those rendered from lamb and mutton, are not suitable for re-use. Put them immediately in the salvage can. And, with other fats, after you've got all cooking good out of them, there is always a little left. No matter how little it is, save it.

Your butcher will still give you 4c and 2 red points for every pound you turn in. Save consistently — save every drop you can — every day — until Uncle Sam says the job is done.
