Mail Deliveries Cost More When Roads Are Poor

Mail delivery over bad roads costs twice as much as it does over surfaced highways, J. T. Callaway, president of the American Road Builders' Association, told delegates to the recent convention of the National Rural Letter Carriers' Association. But, in spite of this, 1,673,520 miles, or 57 per cent of the total mileage of secondary or feeder roads, are still without surfaces of any kind, Mr. Callaway pointed out.

"No wonder the rural mail carrier is an exponent of better roads. He uses these roads daily in serving the 44,000,000 people who make up our farm population," Mr. Callaway went on. He cited studies to prove that operating over dirt roads costs 7.8 cents a mile, over gravel roads 4.5 cents a mile, and over paved roads 3.8 cents a mile.

Miami Paper Has Story On Biggers' Water Wheel Here

A water wheel, built and owned by W. B. Biggers, located on the Wayah road, was recently the subject of an interesting illustrated article by R. S. Winters in The Miami Daily Sunday News magazine.

In his article, Mr. Winters, a free lance newspaper writer who has spent considerable time in Western North Carolina, besides describing the workmanship involved in making the wheel, has an interesting paragraph on Macon County's scenic attractions.

In giving the setting of the wheel, the writer points out that, "there are 14 peaks in Macon County exceeding 5,000 feet in height. Oddly enough, the Biggers home is within view of Milk Sick peak. Azaleas, mountain laurel, rhododendron, snowballs, lilacs, hollyhocks and old fashioned annuals surrounded the Biggers home."

Mr. and Mrs. Biggers, originally from Miami, have spent their summers here since 1939 in their cottage on the Wayah road.
