

Demonstration

Club Meetings For Week Are Announced

Home demonstration club meetings in the county for the coming week have been announced by Mrs. Florence S. Sherrill, county home demonstration agent. They are as follows:

- Today (Thursday) Liberty club with Mrs. Mamie Reynolds at 1:30 p. m.
- Friday: Union club at Union school at 2 p. m.
- Monday: Upper Cartoogehatche club at the home of Mrs. M. W. Beck at 1:30 p. m.
- Tuesday: Travelers with Mrs. Carlos Rogers at 2 p. m.
- Wednesday: Watauga club with Mrs. James Sanders at 2 p. m.
- Thursday: Clark's Chapel club at the home of Mrs. Harley Wiggins at 1:30 p. m.
- Franklin Business Women at the Agricultural building at 7:30 p. m.
- Friday: Cowee club with Mrs. W. C. Sheffield at 1:30 p. m.

The American lumber industry spends about \$5 million a year on research.

NOTICE OF ELECTION

As required by law, the Town Board of Aldermen in regular session March 7th, 1951, called an election to be held on Tuesday, May 8th, 1951, for the purpose of electing a Mayor and six Aldermen. Any person wishing to have their name placed on the ballot must file with the town clerk on or before Saturday, April 14th, 1951.

John M. Moore was appointed registrar, L. C. Higdon and James A. Palmer appointed judges of election. A new registration was not ordered, but for the purpose of anyone registering who has not previously registered, the registration books will be open, beginning Saturday, April 14th, and close on Saturday, April 28th, the registrar will be in the Court House on Saturday, April 14th, Saturday, April 21st, and Saturday, April 28th, for the purpose of registering anyone who has not registered before. Saturday, April 28th, shall be challenge day.

The polls shall open on day of election at 6:30 a. m., and close at 6:30 p. m.

E. W. LONG, Clerk.

State College Hints To Farm Homemakers

By RUTH CURRENT
(State Home Demonstration Agent)

FREE FITTING
Fitting is the biggest problem in dressmaking for most women, clothing specialists tell us. Only if it fits will a homemade dress pay full returns on the money spent for materials and the time and effort of making.

For the many women who will be starting their spring sewing soon and need to know how to get a good fit as well as how to cut and construct a dress, homemakers may wish to write for two bulletins—"Pattern Alteration" (F.B. 1968) and "Making a Dress at Home" (F.B. 1954). Address requests to: Office of Information, U. S. Department of Agriculture, Washington 25, D. C.

DARNING MATERIALS
Prompt and skillful darning of a little hole or tear often can give a wool garment a new lease on life, say clothing specialists.

For a darn that doesn't show, here are some tips:

If possible, use ravelings from a leftover scrap of the fabric or from seam or hem. Lengthwise yarns are best for lengthwise darning; crosswise yarns for crosswise darning. Imitate the weave of the material. Sink the needle into the yarn of the

on or before the 19 day of March, 1952, or this notice will be plead in bar of their recovery. All persons indebted to said estate will please make immediate settlement.

This 19 day of March, 1951.
ADA CHASTAIN,
Administratrix.

fabric, leaving but ends on the wrong side.

Looking yarn from the same fabric, darn with dull thread of about the same thickness and appearance but slightly darker. Use as fine a needle as possible and short thread to avoid stretching the hole by pulling thread back and forth.

Work under a good light and on the right side of the fabric so that you can see the effect as you work. Take tiny stitches. Keep the darn flat. Stitches that are too tight will pucker, too loose will puff. When finished, steam-press on the wrong side, then brush up lightly on the right side to lift the nap.

State College Answers Timely Farm Questions

Q. What can I do to control lice and mites among my chickens?

A. Warm spring weather usually causes an increase in infestation by lice and mites. A heavy infestation can lower egg production. The pests may also spread to the brooder house and cause unthrifty chicks.

Several hens should be checked. If lice are present, use either sodium flouride or a roost paint. A second treatment should be made in 10 days to

kill the nits that hatch out.

The treatment for mites is different. The red mites hide around the roosting places during the day and suck blood from the birds at night. A cheap but efficient treatment is made with equal parts of used motor oil and kerosene. This mixture is applied to the perch poles and nearby places that may harbor the red mites. Carbolenium will give a more lasting effect than motor oil.

Q. I have a few apple trees in the back yard but can't take the trouble to spray them as a commercial grower would. What

do you suggest?

A. The following recommendations are made for apple growers who wish fair results but can't bother with the expense or trouble of obtaining and using several different materials: Apply one ounce of Ferimate plus one ounce of lead arsenate in three gallons of water. Apply this spray when the center buds first show pink, just before bloom, when most

petals have drooped, 10 days after petals fall, and then about every two weeks until four more applications have been made.

A thoroughly inoculated Ladino clover crop on fertile ground may add as much as 240 pounds of nitrogen to the acre, equivalent to 1,500 pounds of protein or 1,200 pounds of a 20 per cent nitrogen fertilizer.

CONSOLIDATED HIDE AND METAL CO.

HOW TO SAVE 1,000 HOMES!

DROWN YOUR CAMPFIRE! Be sure it's completely out, because one forest fire started by your campfire may easily destroy enough saw timber to build a thousand homes! Last year, fires actually burned enough U. S. timber to build 86,000 five-room houses.

BREAK YOUR MATCH! In 1950 forest fires started by people turned to useless ashes enough pulpwood to provide a year's supply of paper to every newspaper in the United States . . . they covered an area larger than the state of Pennsylvania.

CRUSH YOUR CIGARETTE! When the forest burns, you lose and everyone loses. Not only is invaluable timber destroyed, but camping and recreation areas are gone. And after the fire come drought, floods, loss of hydroelectric power, loss of jobs.

BURN BRUSH CAREFULLY! Check with your local ranger, fire or forest warden before burning brush or rubbish. Careless burning started one fire that ravaged 50,000 acres, killed four men. Suppose your carelessness caused such tragedy.

LET'S STOP THIS SHAMEFUL WASTE! Such wanton destruction of our natural resources, such shameful weakening of our national security CAN BE PREVENTED! Most fires are started by people like you . . . people who mean well but are careless just once. Will you be the next one who starts a fire? This will be an extremely critical year. Give us your promise that you will be careful!

SMOKEY SAYS - Remember - Only you can PREVENT FOREST FIRES!

Like other American business firms, we believe that business has a responsibility to contribute to the public welfare. This advertisement is therefore sponsored in cooperation with The Advertising Council and U. S. and State Forest Services by:
