

Sports Rounds

By J. P. BRADY

This column, most certainly the most outcast of The Press, might appear this week and it might not! If it doesn't, no serious complications will arise, no foreign policy will be changed, in fact, nothing will happen. If it doesn't appear in print, The Press readers will still be able to pull out the hairy laugh-maker about "reading The Press before going to sleep and having nothing on the mind."

FISH

Fishing seems to be taking up most of the headlines everywhere, and in Macon County it is no exception.

Some of you avid bream hook wetters are going to hate to hear the following tale about a catch last week. It concerns a 12 pound catch, sopping wet! Elbert Hedden dropped by the office last Tuesday with a string of bream, eight to be exact, everyone from eight to nine

inches from stem to stern. For this time of the year that sure is a mess of bream. The strange thing tho', is some of the finny articles were caught with a lizard. Could it be that the dry spell for the past five weeks whetted the appetite of the fish? Under normal conditions, the aristocratic bream wouldn't look sideways at a lizard.

Just to even things up, Mr. Hedden threaded his hook with a minnow and hauled out a nice three and a half pound bass.

Incidentally, just for the record, Mr. Hedden caught the record bream last year, a 12-inch weighing a pound and a half. Looks like he has a good start on things this year.

All of the catch was hauled out of yon Nantahala lake, which is low enough after the dry weather to put even an average fisherman closer to the bottom and the fish.

Gneiss

By MRS. F. E. MASHBURN

Mrs. Catherine Russell continues in very poor health, we are sorry to say.

Mr. and Mrs. Gus Hedden and children, and Mr. and Mrs. Everett Hedden and children, of Asheville, and Mr. and Mrs. Bill Berry and children, of Cowee, and Mrs. Martha Dowdle, of Franklin, have all visited Mrs. Jack Berry, who is very ill. We wish her a speedy recovery.

National Forest Timber For Sale

Sealed bids will be received by the Forest Supervisor, Nantahala National Forest, Franklin, North Carolina, up to and not later than 2:00 p. m., July 16, 1951, and opened immediately thereafter for all the timber marked for cutting, live or dead, standing or down, located on an area embracing about 535 acres within the Smart Branch, Dryman Branch and Shoal Creek Unit of Middle Creek, Little Tennessee River watershed, Nantahala National Forest, Macon County, North Carolina, in the total number of 2,199 trees of the species listed below. No bid of less than \$9,907.33 as a lump sum payment will be considered. In addition to the price bid for stumpage a total deposit of \$762.99 will be required for sale area betterment work. In addition to the above amounts any unmarked timber which is authorized for cutting in connection with road construction or other improvements or which is otherwise cut and subject to payment will be paid for at the following current rates for stumpage: Northern red oak, white oak, yellow poplar and black cherry \$35.00; basswood, ash and birch \$25.00; red maple and cucumber \$24.00; black oak, chestnut oak and pitch pine \$17.00; chestnut, Virginia pine and hemlock, \$9.00; and scarlet oak, black gum and buckeye \$8.00 per MBM. \$2,000.00 must accompany each bid to be applied to the purchase price, refunded or retained in part as liquidated damages, according to conditions of sale. The right to reject any and all bids is reserved. Before bids are submitted, full information concerning the timber, the conditions of sale and submission of bids should be obtained from the Forest Supervisor, Franklin, North Carolina. J14 and J15

This Week With Macon County Agents

By Mrs. Barbara B. Hunnicutt
JUNE IS DAIRY MONTH

The 15th Annual June campaign, planned and sponsored by the dairy industry to help the nation's consumers become better acquainted with the nutritional and economic significance of milk and milk products, is now under way in every state.

In Macon County, two team demonstrations are being prepared by 4-H club members to be given in July in the District Dairy Foods demonstrations in Murphy. These girls are Carlene Sorrells, daughter of Mr. and Mrs. J. C. Sorrells; Nancy Ramsey, daughter of Mrs. Ardenia Ramsey, Edwina Bryson, daughter of Mr. and Mrs. George Bryson and Nancy Cabe, daughter of Mr. and Mrs. Jack Cabe. These girls are stressing the use of milk and milk products in the diet.

It has often been said that life begins and ends with milk as the main item of the diet, and true it is that milk is an important item in the diet of every age group.

It has long been recognized that milk contains many nutrients essential for good growth and the proper development of bones and teeth. Consequently, milk has been strongly recommended for infants and children for many years. But once the child has grown into an adult, why drink milk then?

Many people still believe that milk is one of those childish things that should be "put away" when one becomes an adult, but scientists have found that this should not be the case. To insure good health and to be able to maintain that feeling of vim, vigor, and vitality for a long period of years, one needs certain of those vitamins and minerals that milk con-

from Bob Jones university are to conduct the services at the Walnut Creek community church Sunday afternoon. Will you come?

The Ledford Branch road is now graveled all the way. The main Walnut Creek road is graveled to Mrs. Gertrude Strain's home.

The Franklin Press and The Highlands Maconian

tains. Everyone is interested in feeling young and staying active, maintaining the prime of life as long as possible; milk will help achieve that aim.

Then for the person who has reached that stage of life when the body processes are slowing down and appetite is not so keen, milk again is one of the important foods to consider since it offers so many of the essential nutrients in a relatively small volume of food. Throughout life it is easy to see that milk goes right along with every age, playing an active role in making the body strong and healthy, and in maintaining it in that state. It would behoove each of us to be certain that milk is included in some way in the diet to make sure the child gets 3 to 4 glasses per day, and the adult, 2 to 3 glasses daily.

North Carolina has had 10 capitals. Before the seat of government was established in Raleigh in 1792, it was in Edenton, New Bern, Bath, Wilmington, Hillsboro, Halifax, Smithfield, Fayetteville and Tarboro.

CARD OF THANKS

We thank our friends for the offerings they gave us through sickness of our little boys. Mr. and Mrs. Woodroe Mason

Lucky 13
Has a perfect chugging action when jerked and a life-like action on the retrieve. Unexcelled as a casting and trolling lure. Gets both fresh and saltwater fish. A great favorite in lakes.

Here's 180 Horsepower... on regular grade gas—Now!

NEW YORKER NEWPORT

It's always interesting to hear about future-looking experiments with new super engines to run on new super-octane fuels...someday.

But it's even more interesting to hear today's real life, on-the-highway talk about Chrysler's new super-performing FirePower engine. FirePower takes any regular grade gas you care to buy . . . and adds its own

180 HORSEPOWER Here's the new Hemispherical Combustion Chamber that's the heart of Chrysler FirePower. Its new, designed-in "mechanical octanes" make regular grade gas do what best premium grades can't do in any other engine you can drive today!

new mechanical octanes to the power-giving octanes of the gasoline itself. The result is 180 horsepower performance such as no other passenger car built in the U.S. today can equal.

If you haven't driven Chrysler FirePower yet, your Chrysler dealer invites you to do so now. It's the most revolutionary engine in 27 years. It offers highway satisfaction and safety such as you've never known.

And it's a sounder engine other ways than any other on the road. Its new design keeps it almost completely carbon-free. It is smooth and quiet . . . but also rugged

and strong and free from need for great attention and repair.

Now remember that this same new Chrysler offers you the new Hydraguide power steering* . . . plus the amazing new rough-road stability of Oriflow shock absorbers . . . plus Water-Proof Ignition, and Vacuum-Ease Chrysler Cyclebonded super-brakes . . . then come see what we mean when we say the car of your tomorrow is right here for you to drive . . . today, and for years to come!

*Hydraguide regular on Crown Imperials, optional at extra cost on other Imperial and New Yorker models
