What Is Chiropractic?

Possibly you have wondered how this splendid Health Service operates and by what means such remarkable results are brought about.

The Basic Pricipal of Chiropratic is: that normal transmission and expression of vital energy through nerves is necessary to health.

"Chiropractic is the science of locating and correcting in-terference with nerve transmission and expression, without the use of drugs or surgery.

MRS. MARGARET B. McGILL, Mgr. Tel. Franklin 339

to a baby born July 4th 1951

175th ANNIVERSARY OF OUR INDEPENDENCE

What kind of a world have they shoved you into? What kind of a country are you going to grow up in? What kind of a life can you look forward to, as you kick your first kicks and squall your first squalls on the Glorious Fourth of '51?

You see, baby, a lot of big question marks are floating around these days. And your birthday, being the same as your country's, seems a good time to bring some of them up.

175 years before you were born, a bunch of men got together and risked their necks to sign a thing called the Declaration of Independence.

It guaranteed that everyone in this country had the right to "Life, Liberty and the Pursuit of Happiness" -but it took a lot of war, work and worry before the rest of the world believed us.

We hope, when school days come, you'll read this Declaration through—it isn't long—even though you don't quite understand all the big words.

The point to remember, baby, is that all over the

world today the great freedoms our Declaration of Independence stands for are being attacked.

Through the complacency or don't-careness of our own people, those attacks could be successful.

You're little now and the things we're talking about aren't nearly so important to you as a question like "When do I eat?"

Yet you're going to grow and grow and grow into your United States. And when you get big enough, you'll vote and work and have a home of your own. Then is when you'll want to vote free as the birds

that sing outside your window now; you'll want to work wherever you wish; you'll want a home that keeps rain out and Freedom in; you'll want to go to whatever church you choose.

Now, it's up to your dad and mother, and the fathers and mothers of other babies like you, to do the things that keep your Freedom.

Things they can do right in their own home town. Things like voting every time for good leaders. Things like working together in their own neighborhoods to make life better for all.

Other fathers and mothers have done those things since way back in 1776. That's why they've always turned over a free land to their children, no matter what troubles came.

Baby, we'll turn over a land to you where you can grow up to live and vote, and work and talk, the way you please! So help us, we will! God helping us, we must!

Now -- Freedom needs YOU!
