We're keeping our promise!

"...to keep pace with the increasing transportation needs of the South."

Diesels for Dixie!

Diesel locomotives...the dollar...don't grow on trees. These 600 powerful Diesel units the Southern Railway System now has in service and on order cost about \$90 million!

That's a lot of money. But it bought a lot of modern horsepower...to give a modern fast-growing Dixie the best in transportation service.

These "Diesels for Dixie" are just one indication of our determination to keep pace with the increasing transportation needs of the South.

—Diesels for Dixie...a lot of money...but it buys PATRIE. Faith in the bright future of Dixie. Faith that some day our country will lead, in the public interest, that all forms of commercial inter-city transportation must stand independently on their own financial feet...without support from the taxpayer...on only the railroad now do.

Ernest S. Howard
President

SOUTHERN RAILWAY SYSTEM

A YEAR and a half ago we made a promise to you in the advertisement reproduced above.

Since making that promise, we have bought 244 more new Diesel locomotive units at a cost of over \$39 million. We have purchased 2,550 new freight cars costing about \$14 million. We are spending approximately \$16 million for new yards and yard modernization.

These are only a few of the things we have done in the past 18 months to live up to our promise. Many other things have been done and will be done. Because our promise "to keep pace with the increasing transportation needs of the South"—and to meet the needs of national defense—is a pledge we are determined to keep.
