

### Notice That Brown On Pines, Spruce? It's Work Of Insects, Say Foresters

If you've been wondering what is causing white pine and red spruce in this area to wilt and appear to be dying, the Nantahala Forest Service has the answer.

According to Forest Service officials, an aphid-like insect, *Pineus Pinifoliae*, is attacking the trees.

Feeding on spruce, this insect causes the production of terminal compact galls that look like true cones. In one of its immature stages, this chermid also feeds on the current growth of white pines in the vicinity of spruce, it was explained.

Officials said a survey of infested areas in the Southern Appalachians has shown that some spruce stands have been attacked so heavily that whole mountainsides covered with this species appear rusty-red from a distance. However, they said, despite the heavy attack, spruce trees have been deformed or killed by the insect.

It is considered unlikely that severe injury will develop in the spruce, but some killing of white pines is to be expected, they said.

Methods of controlling outbreaks of the chermid in spruce forests or neighboring white pine stands have not been developed.

White pines grown for ornamental purposes may be protected from injury, however, by the timely application of standard nicotine sulphate sprays to control the immature stage of the chermid, officials said.

### State College Hints To Farm Homemakers

There is a correct way to walk. It is described by foot specialists as a "beautiful walk," toes straight ahead and parallel, weight on the outside of the feet, using big toes to propel the body forward. The second recommendation is that people with aching feet take special exercises to strengthen weakened foot muscles. Your good shoe salesman perhaps could help you out with simple exercises that would make everyday walking mileage easier on your two feet.

Women who have to stand and walk a lot should be very sure to wear properly fitted and constructed shoes to give support to arches, and shoes that conform to shape of the foot. Shoes should be long enough to give adequate freedom to the big toe. This is most important.

If you are suffering with aching feet don't wait longer to give prompt attention to your foot defects. We do have, in many towns, foot specialists. Most women know the bath-

**It has a Way with Women**

SOMETIMES we think that too little attention is given to the fair sex in automobile advertising.

After all, it's the woman of the house who has to do most of the shopping, which involves getting into tight places at the curb. And it's surprising what tight spots a Buick can fit into at a turn of the wheel.

It's the woman who likes complete freedom from things that it takes an engineer to operate—and a complete and utter freedom from mechanical complications is exactly what makes Dynaflo Drive\* such a joy.

It's the woman who has an eye for style and fine fabrics—and a nose for economy. On both counts, a Buick is tops.

But we suspect something else. We suspect that a woman gets just as great a lift as a man from commanding this great-powered and trigger-quick bundle of vitality to bow to her will.

Here's a car to win any woman's heart—by its level-gaited stride—its willing response to her hand on the wheel—its smart style and its smart performance—its spaciousness and comfort—and its thrift.

How about taking time off, some afternoon, to boss around a Buick? It's a date that's bound to thrill you.
