This Week With Macon County Agents

By ROBERT M. RAY

Now that spring is here and farms are turning green again, many Macon County farmers are trying to decide which kind and how much livestock to put on their farm to make the best use of their resources and to make the most money. Of course many already have their livestock enterprises set up and have no reason to change them. This is especially true of dairymen. Others, however, do not have the stability of the dairy industry at the present time.

trator of estate of W. C. Sheffield, deceased, late of Macon County, N. C., this is to notify all persons having claims against the estate of said deceased to exhibit them to the undersigned on or before the 26 day of March, 1953 or this notice will be plead in bar of their recovery. All persons indebted to said estate will please make immediate settlement.

This 26 day of March, 1952.
R. C. SHEFFIELD,
Administrator.

SALE OF FARM LAND

UNITED STATES GOVERNMENT REAL PROPERTY LOCATED 15 MILES SOUTHEAST OF FRANKLIN, MACON COUNTY, NORTH CAROLINA, FORMERLY OWNED BY GLENN A. TILSON

59 ACRES OF LAND
DWELLING AND OUTBUILDINGS

Sealed bids will be received by the Farmers Home Administration, Raleigh North Carolina and will be publicly opened at 2:00 o'clock P. M., EST, April 22, 1952. 5% bid deposit will be required. Government reserves the right to reject any or all bids.

TERMS: Cash or 25% down, balance in 5 equal annual installments at 5% interest.

For inspection of the property, information and bid forms, contact Mr. Ray F. Hemphill, County Supervisor, Agricultural Building, Franklin, North Carolina, or for information and bid forms Mr. J. B. Slack, State Director, Farmers Home Administration, Raleigh, North Carolina.

N. C. 'Challenge' Farm Booklet Now Available

L. Y. Ballentine, State Commissioner of Agriculture and chairman of the North Carolina Board of Farm Organizations and Agencies, has announced that copies of "North Carolina Accepts the Challenge" are now available for free distribution.

The booklet, 76 pages in length and illustrated with many charts and photographs, outlines the long-range state agricultural program sponsored by the board.

Commissioner Ballentine said the Publications department of North Carolina State college is acting as the distribution agent.

These include poultry, beef cattle, and hogs.

With the low price prevailing in the hatching egg market, many farmers are becoming discouraged with the poultry business. This same situation existed in 1949 for almost five months. In that period the efficient producers came out with a profit even though it wasn't as large as some years. This year, indications are that egg prices will begin to rise in the next month; therefore, the period of extremely low prices will be much shorter than the 1949 period. If you are making feed costs now you better hold your flock and try for high production this summer. For those who are planning flocks for next year I would keep in mind that feed costs are likely to remain high and the poultry industry will meet competition from beef, since beef production is at an all time high. Efficiency will be the key to making money on your flock. Get good chicks and make sure of lading pastures so you can get birds in the house as cheaply as possible. Don't start with two large a flock until you have experience in taking care of chickens and don't try to jump in and out of the business. Our records show that those who are interested in staying with the business are the ones who make the money.

Those people who are buying high priced beef animals in hopes of grazing them this summer and selling in the fall will probably be disappointed. Beef

THERE'S MONEY IN SHEEP, BUT THEY NEED CARE

Three Questions Posed
For Prospective
Raisers

There's money in sheep—but only if the animals are managed properly.

A. V. Allen, livestock specialist for State College Extension service, says sheep numbers have been increasing in North Carolina for the past three years, but there's still plenty of room for expansion of this enterprise.

Mr. Allen adds, however, that no farmer should go into the business until he is able to answer "yes" to all three of the following questions:

1. Will I like sheep? They require and will respond to good care. They are less likely to get this good care if they are not liked and appreciated by their owner.
2. Do I have a surplus of pasture? Sheep are best suited for use as a secondary livestock project. Therefore the primary project must have already been established and a surplus of pasture must be available before sheep are added.
3. In addition to pasture, can

cy, and requests for copies should be addressed to that source.

The first section of "North Carolina Accepts the Challenge" gives the state's present position with respect to farm income, housing, population, crops and livestock, nutrition, medical care, schools, roads, telephones, and community life. It then presents a two-pronged program designed to promote better farming and better family living conditions.

A final section suggests how the program can be put into effect. It emphasizes the need for cooperation among all agencies, more research, an agricultural program for every county, and a plan for every farm.

The Board of Farm Organizations and Agencies is made up of representatives from the State Department of Agriculture, Department of Conservation and Development, Farm Bureau federation, Farmers Home Administration, Production and Marketing Administration, Division of Vocational Teaching of the State Department of Public Instruction, Rural Electrification Administration, Soil Conservation Service, State Grange, State college, Experiment station, and Extension service.

production has reached its highest point in history and indications are that there will be at least a ten per cent drop in prices by fall. Use caution in buying this spring.

The hog market has been on the bottom for some time now and many people are getting rid of all their hogs. If you have hogs ready for market they have to go, but if you have breeding animals it looks as if there is going to be money in them this year. Already shortages of feeder pigs are showing up in Western North Carolina and it will probably get worse during the summer and fall.

Farmers can make a good profit this year, but it will be necessary for him to use caution in buying and selling, and to utilize farm resources so as to get the greatest production for the least cost.

Silage Is Best Substitute When Pastures Fail

Sometimes pastures fail. And when they do, the nearest practical substitute is good silage.

This is pointed out by A. C. Kimrey, dairy specialist for the State College Extension service, who says Tar Heel dairymen need more silos and more silage.

This need, he says, was emphasized by the recent shortage of hay and grazing caused by drought last summer and low temperatures during the winter. Many farmers have fed all their hay, and in most sections pastures had made very little growth until the past few days.

It's common knowledge among dairymen that good pasture is the best and cheapest source of nutrients for milk production. The next best source is good silage.

An acre of corn that will yield 40 to 50 bushels of dry grain will make about 10 tons of silage—enough to feed four cows 30 pounds per day for five months.

"Corn made into silage will produce more milk per acre than any other practical way it can be fed," asserts the specialist. "If the corn is put into the silo at the proper stage of maturity, and is well cut and packed, practically all the feeding value will be preserved."

Corn varieties generally used for silage in North Carolina are U. S. 282, N. C. 27, and Dixie 18. County agents can give local recommendations.

Mr. Kimrey says a variety should be used that will mature well before frost. It should be planted on good land and be well fertilized.

Demonstration

Club Meetings For Week
Are Announced

Meetings of home demonstration clubs in the county for the coming week have been announced by Mrs. Florence S. Sherrill, county home demonstration agent. They are as follows:

Today (Thursday) Liberty club with Mrs. Mae Leatherman at 1:30 p. m.

Friday: Upper Cartoogechay club at the home of Mrs. Carl Slagle at 1:30 p. m.

Monday: Music appreciation program at the Franklin Methodist church at 1:30 p. m.

Tuesday: Traveler's club with Mrs. Joe Talient at 2 p. m.

Wednesday: Watauga club at the home of Mrs. Byrum Sanders at 2 p. m. Mrs. J. P. Shuford, co-hostess.

Thursday: Clark's Chapel club with Mrs. Harve Vanhook at 1:30 p. m. Franklin Business women at the Agricultural building at 7:30 p. m.

Pvt. Bill Hughes, son of Mrs. Maude Blaine Hughes, of Asheville, and a grandson of the late C. L. Blaine, of this county, recently returned from Korea, it has been learned here.

I provide 285 pounds of good legume hay and 80 pounds of grain per ewe? While 80 per cent of the total seed requirements can be supplied in the form of pasture and hay, the 10 per cent in the form of grain must be provided to gain maximum profit. The hay must be good-quality legume hay and should be fed free-choice during the winter months.

Mr. Allen says any farmer interested in adding sheep should talk with his county agent.

It makes you comfortable all over

BUICK engineers have a habit of getting at the bottom of things.

So they're not content to stop with putting beneath you cushions that are luxuriously soft and deep.

They also, at big, soft, deep coil springs between you and all four wheels—and big, soft tires between the wheels and the road.

But real riding comfort calls for more than cushioning up-and-down jolts and jars.

There's end-sway and side-roll and "wander" to be controlled. There's sure-footed balance on curves. Not to mention the importance of having a frame stout and husky enough to make the whole car feel safely solid.

So Buick engineers have gone through

the list—come up with a ride that cost a cool million dollars and more for special engineering, tooling and components.

Does that cover Buick's comfort story? It certainly does not.

There's the comfort of driving a car that instinctively holds the road—the comfort of ample room and a wide-open view of the world around you—the comfort of fabric colors that please the eye and fabric textures that please the touch—and the effortless smoothness of Dynaflo Drive.*

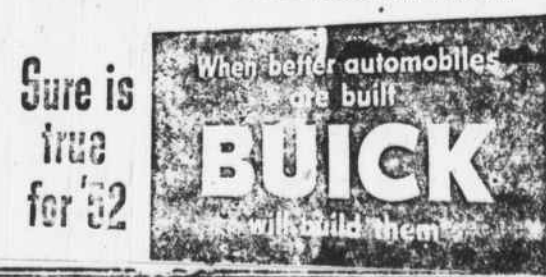

Then there's the mental comfort of bossing power mighty enough to meet any demand you make upon it in emergency—8-cylinder power—high-compression power—valve-in-head power—Fireball power, that makes you proud of the

miles you get from a gallon of gas.

And maybe you'll also find comfort in knowing that this great automobile can be yours at a price that is still just a small step above what's known as "the low-priced three."

On top of all this, driving a Buick's a barrel of fun. Why not drop in tomorrow and ask us to prove it?

Equipment, accessories, trim and models are subject to change without notice. Wheel Covers standard on ROADMASTER, optional at extra cost on other Series. White sidewalls optional at extra cost when available. *Standard on ROADMASTER, optional at extra cost on other Series.
