He stopped at a small hot dog stand and ordered coffee. Just to be polite, he said, "Looks like rain, doesn't it?" "Well," snapped the tony proprietor, "it tastes like coffee, doesn't it?"

"Operation Shirt-Sleeves"

OUT IN THE YARDS — with their sleeves rolled up. That's where you'll find our new Assistant Vice President, Yards and Terminals, and his newly-created "task force" of terminal trouble shooters.

An innovation in railroad circles, this "task force" is actually living in the Yards day and night—studying every operation — seeking new ways, no matter how small, to improve our service.

In recent years, we have invested \$120 million in Diesel locomotives. In recent months, we have been modernizing existing Yards and building new ones at a cost of \$17 million.

"Operation Shirt-Sleeves" is one of many reasons why these expensive new transportation "tools" on the Southern will result in better, ever-improving service for customers of the railway that "serves the South."

Not "warmed over" but strictly brand new!

YOU OWE it to your pocketbook to drive this Chrysler engine before you buy any fine car today.

It's not a "warmed-over" engine, but a basically brand-new one!

It gives a new kind of performance that means new value for every dollar you pay out for purchase, upkeep, or operation.

It was built brand-new around a hemispherical combustion chamber which makes better use of gasoline, and also permits sounder all-round engine structure, than any American motor car engine has had before.

It delivers 180 horsepower . . . without requiring you to buy premium gasoline. It runs with less waste, less heat, less friction and less wear than previous designs can

equal. Its combustion is so clean it literally develops almost no carbon deposit at all.

It will last longer than any engine you've ever known. It will cost you less along the way. It will stay "young" in performance thousands of miles past the point where an ordinary engine shows old age.

And on top of all that, it makes driving a lot more pleasure! Its smooth response . . . its safety-power, in reserve for emergencies . . . its easy scorn for distance or hills . . . make you just plain feel good at the wheel as you've never felt before.

For the good of your purse and your pleasure too . . . we invite you to drive it, soon!
