Was this week end's "Pilots Ruby Rendezvous" a success? That seems to be the big question around town. Even out-of towners arriving are asking it.

Of course, the answer is a great, big whooping YES! And that goes for both sides.

I personally doubt that Macon County ever has been blessed with a more friendly and understanding group. They were really wonder-ful through it all. When their "Mountain Hoedows" was rained out Saturday night, they pointed out that, being pillots, they were sympathetic with our plight. So, instead of trotting off for their motels for some dry clothes, they kept right on when it was re-scrambled indoors a Slagle Mr ial Building. On the other side of the fen. they seemed to like us. Fact is,

several of them are planning to purchase summer homes and juse about all of them want to come back either this fall or next summer for a real vacation

Fersonally, it was a very rewarding week end for me because I met some really swell people. And after all, people are my business. -jpb

We've got an "odd wad" of a cat. Maybe because of the healthy kick I gave it last winter (broke my toe, remember?) for its indelicate approach to the living room carpet. This crazy cat chases rabbits, instead of mice. The heck of it is

she catches them. Brings 'em home too.

I really wouldn't be alarmed at this quirk in her feline make-up except for the fact she's tackling larger and larger rabbits. When she started out, they were little ones. But the other night she literally dragged one in ever bit as large as she is.

That's why we're alarmed. We're preparing for the day when she hauls in one of Sheriff J. Harry Thomas' horses from the nearby pasture and drops it on the doorstep -ipb-

For safe driving, make it a family rule that children are not permitted to distract the driver.

permitted to distract the driver.
Here's a checklist of driving do's and don'ts for harrassed and harried mothers who have to make so many extra "last minute" shopping trips during the holidays.
Remember, while such devices as nylon safety belts, dashboards cushioned with urethane foam, and laminated safety glass windows minimize injuries when accidents occur, they do not prevent collisions from taking place. It is also important to keep windshield wipers in good operating condition at all times, and glass areas clean of snow, sleet, and dirt.
Observe these 14 rules prepared by the National Safety Council, and your SQ\* will put you at the head of the class:
I. Never leave children alone in the car, regardless of whether or not the motor is left running.
Have youngsters ride in back seat whenever possible.
Allow no eating of lollipops or ice cream on sticks in moving car.

Car.

car.
4. Permit no rough-housing, friendly or otherwise.
5. Have family rule that children are not permitted to distract driver (remember, always pull over to the curb and stop car if it becomes necessary to admonish children).
6. All riders must be seated while auto is moving.
7. Hands, heads, and possessions must remain inside the car at all times.

riands, inclus, and post-all times.
 All doors locked when vehicle is in motion.
 No sharp-edged, hard or heavy toys permitted which might become lethal flying missiles in case of sudden stops.
 No objects stowed at any time on window deck behind rear

seat. 11. Infants firmly strapped in car bed or halter type safety seat belt at all times. 12. Driver should be physically fit. Don't drive when tired or high-strung. Car should be mechanically safe also. 13. Children in back should not be sitting in drafts. Crack side vents to provide necessary ventilation, prevent exposures leading to colds or infections. 14. Always remember to be alert to the actions of drivers of other cars. They may not be as careful about their driving habits as you are. as you are.
