

COULD BE EMPLOYED —

Estimated 150 Disabled Persons Are In County

By Sam Colville

No! We cannot stop work on the National Employ Physically Handicapped Program at the end of the nationally proclaimed week on October 11. There must be 51 other weeks of work if the program is to be a success.

How successful were our efforts in 1957 to help the physically handicapped? In North Carolina there were 2,930 disabled persons returned to useful employment. All of these persons required special services which were met through the State Vocational Rehabilitation Service, State Employment Service, and other agencies.

What were some of the services they needed? Thirteen per cent or 383, were trained for jobs that suited their disability, seventy one per cent received surgery and treatment, sixty two per cent had to be hospitalized. Artificial appliances such as arms, legs, and crutches were purchased for twenty six per cent. Occupational tools, equipment or licenses were provided for 103 persons. What are their disabilities? Loss of arms or legs, back or spine injury or deformity, facial disfigurement, defective vision or hearing, speech defects, and many others.

Did most of these have families? Yes, 1,403 of these disabled have 4,722 other dependents; 1,509 of the disabled were men and

1,421 women; 1,798 were married. What are some of the jobs in which they were placed? Accountants, bookkeepers, carpenters, painters, secretaries, teachers, dressmakers, mechanics, and others.

The average cost for a rehabilitated case is \$477 — what an investment! This year our job is just as great if not greater since most of the disabilities are caused by accidents or disease. It is estimated that there are at least 150 disabled persons in Macon County today that could be successfully employed with some help from these sources. We must help these too.

Love That Pie

A stunning dessert, just made for parties, Grape Chiffon Pie is a delightful change in dessert fare. The light, fluffy filling is effortlessly achieved with a package of grape-flavored gelatin. A graham cracker crust gives a delicious crunchiness. For a final touch of elegance, garnish with grapes in a cluster arrangement.

**Grape Chiffon Pie**

3 Egg yolks, slightly beaten	3 Egg whites
1/2 Cup water	Dash salt
1/2 Cup sugar	4 Tablespoons sugar
1 Package grape-flavored gelatin	1 Baked 9-inch graham cracker crust
1/2 Cup pineapple juice	
3 Tablespoons lemon juice	

Combine egg yolks, water, and 1/2 cup sugar in saucepan. Cook over low heat, stirring constantly, until mixture coats a silver spoon, then cook 1 minute more. If mixture curdles, beat with egg beater. Remove from heat. Add gelatin and stir until dissolved. Add pineapple juice and lemon juice. Chill until slightly thickened.

Beat egg whites and salt until foamy throughout. Add sugar, 2 tablespoons at a time, beating after each addition until well blended. Then continue beating until mixture will stand in peaks. Beat gelatin mixture slightly. Fold into meringue and again beat mixture very slightly. Chill a few minutes until mixture begins to hold its shape. Spoon into cold crust. Chill until firm.

Just before serving, garnish with grapes, if desired.

The funds collected would be used to promote the apple industry in all phases: production, marketing, use, and advertising.

State College Answers Timely Farm Questions

Q. I would like to store some of my 1958 corn crop under the government's Commodity Credit Corp. loan program. How does the loan program work?

A. At the time the producer puts his corn under the government loan program, he is paid for the amount stored at the current rate of \$1.49 per bushel for the commercial corn producing counties of the state and \$1.12 per bushel for the non-commercial counties. If at any time during the storage period and prior to the term of the loan date, he can repay the loan, plus 3 1/2 per cent interest, he can reclaim his corn. At the end of the loan period, if the loan has not been repaid, the government takes over the corn and ships it to government storage.

Q. Is there anything being done to improve the stock of loblolly pines now grown in North Carolina?

A. Yes. There is a program underway at N. C. State College to select the best loblolly pines to be found in the state. These superior trees are taken to seed orchards and crossed with other good trees, as a means for developing an improved tree stock.

Q. Is there anything being done to improve the stock of loblolly pines now grown in North Carolina?

A. Yes. There is a program underway at N. C. State College to select the best loblolly pines to be found in the state. These superior trees are taken to seed orchards and crossed with other good trees, as a means for developing an improved tree stock.

Hints To HOMEMAKERS

By MISS RUTH CURRENT  
State Home Demonstration Agent

**BARBECUED TURKEY** — If your group is planning an outdoor get-together, barbecued turkey is a natural for serving a large group cook-out. It's different and delicious. Turkey is reasonably cheap at this season and nothing could make a more elegant meal than juicy barbecued turkey.

The essential ingredients are young, tender turkeys combined with slow cooking to make sure that the birds are done all the way through. Ideal weights are turkeys of about four to six pounds. Split birds in halves or quarters and start the cooking skin-side up on the grill. Slow cooking and frequent basting with a good sauce helps put the rich flavor right through to the bone. Incidentally, for basting use a thin, not thick, sauce. Basting can be done with a brush, or by means of a cloth tied to end of a long stick.

Keep the fire or coals very low so the bird won't scorch or cook on the outside before it is done near the bone. The grill should be at least 14 inches from the heat source. Turn the pieces from time to time to insure even cooking. Test doneness this way: Drumstick should twist readily out of high joint or wing out of shoulder joint.

Make sure all perishable foods you serve at your outing are packed cold and kept cold until serving time.

**Stainless Steel:** Deposits of all kinds come off easily while fresh and soft, so wash promptly with hot soapsuds; use a sponge, fiber brush, or cloth.

**READ LABELS** — More than ever, school and casual dresses — and piece goods — are labeled "wash and wear," "drip dry," "needs little ironing," and "wrinkle resistant."

Vat dyes are the best dyes. They are used on cottons and rayons. A dress labeled "Sanforized," "Rigmel," or "will not shrink more than 2 per cent" should not shrink out of fit.

A dress fabric that has been given special finish and labeled "crease resistant," "wash and wear," "drip dry," or "minimum care," will not shrink out of fit, either. Some names of these finishes you will find on labels are Regulated, Disciplined, Perma-Pressed, Minicare, and Wrinkle

Shed for cottons; and Avocet for rayons.

Mercerized means that the cotton has more luster and is stronger.

Combed cotton means more luster. It keeps its smooth feel through washing and wearing.

Some corduroys are machine washable, and others are only hand washable because their colors won't stand up under the hot water in the machine. If you expect to machine wash, look for "machine washable" on the label. Never take it for granted. Wrinkle-resistant finishes are new for corduroy. They work.

**SAVE LABEL** — It's a guide for care. It may give you detailed directions for care.

Idaho Potatoes . . . Onion Rings

This is the time of year when Idaho's Russet Potatoes, famous not only as "bakers" but also for their all-purpose qualities, are abundant in our markets. And with them are the gentle-mannered Idaho Sweet Spanish Onions—very large, creamy-white or yellow-skinned, with a mild, sweet flavor which makes them so good for their crisp slices in salads and sandwiches, and for making French Fried Onion Rings.

And here they are, partnered to serve as the main course itself. The potatoes are scrubbed (the skins are such good eating), baked in a 400 degree F. (moderately-hot) oven until soft, and gently rolled in towel-protected hands until the fluffy, white contents push through the cracked skins. Then they are topped with crisp-cooked bacon squares, to be served while still piping hot with a dollop of dairy-sour cream and snipped chives. Eat jacket and all!

The Sweet Spanish Onions are wonderful "French fried". So crisp and mild are these that they do not need the soaking in ice water or milk which many recipes call for. Slice the unpeeled onions about 1/2-inch thick. This makes for easier removal of skins. Peel slices. Separate into rings. Dip in a thin fritter batter or first in undiluted evaporated milk, then in seasoned flour, so that each ring is completely coated.

Drop the onion rings, a few at a time, into shortening or oil about 3 inches deep in a deep-fat frying kettle or deep skillet, and heated to 375 degrees F. Fry until golden-brown. Lift out with a two-tined fork; drain on paper toweling. Sprinkle with salt. Serve very hot. These fried onion rings may be kept hot by placing in a 325 degree F. (moderately-slow) oven until all onion rings are cooked.

P. S. Dinner delayed? Scoop out the centers of the baked "Idahos", prepare as for mashed potatoes, using the sour cream mixed with a beaten egg and desired seasonings, instead of the usual hot milk and butter. Return to the potato shells. Heat in moderate oven when ready to serve. Or make these stuffed potatoes in the morning, refrigerate until serving time, then heat.

Please.. The number is

24

That's the number to call to put a Want Ad in The Press.

Just say "charge it".

Electric Eye 8mm Camera

Setting its own lens automatically for each scene when the trigger is pressed, the Keystone

KA-1 electric eye camera is said to provide a perfect exposure for each scene taken. Selling at \$89.95 with one 1/1.8 lens, or at \$119.95 with a three-lens turret, the camera has a two-tone brown finish and built-in "A" and haze filters.

SOAPSUDS ARE BEST—Most household dirt comes from our civilized way of living; soot from industrial plants and heating equipment, lint from linens and blankets, grease from cooking and eating indoors. The things man wears and touches get soiled from body oils and perspiration, as well as from soot and dust.

Soapsuds are the best dirt-chaser for hard surfaces, textiles, plastics—and for man himself. Soap and water get things clean. Dirt has many and varied odors; soapsuds has only one—a clean, fresh fragrance.

**CLEANING FURNITURE** — Wood, canvas, plastic, and cord webbing can be kept clean with warm soapsuds and brisk scrubbing. Always rinse well and wipe off excess water. Glass and tile table tops need frequent washing with warm suds.

**Aluminum:** Use warm-to-hot soapy water, scouring with very fine steel wool if needed. Rinse with hot water; dry, and polish with a soft cloth.

**Chromium:** Scrub with a soapy cloth or soft brush; rinse, and polish with a clean, soft cloth.

**Copper:** Wash in warm soapy water; add a little household ammonia to remove spots caused by corrosion. Rinse, dry, and apply a good metal polish.

**Pewter:** Use warm soapsuds. Rinse and polish with a soft cloth. For heavily tarnished pewter, first cover with silver polish; then, while still wet, apply soap lather.

**NEW improved SPRED SATIN**  
NEW LOW SHEEN • NEW EASY COVERAGE  
NEW GREATER DURABILITY

And new beautiful colors, too! For the wall paint that gives you everything try new formula 100% latex SPRED SATIN today! Paint anytime, no fumes — no odors. Guaranteed washable. Dries in 20 min.
