## At the SANDHILL FAIR Today

SEE THE

# BLUE :: FERTILIZER EXHIBIT

If you don't happen to get to the Fair, drop into the office in Aberdeen and ask for the leaflet that tells about the fertilizer that made the crops that made the records in the Sandhills last summer.

The big tobacco records, the big fruit records, the big cotton records, were made with fertilizer from The Blue Factory at Aberdeen. This was not chance; it was the work of men who know what the Sandhills soil and climate need in the way of fertilizer, for the men who operate the factory use fertilizer extensively in these Sandhills and know what they want.

For the farm's sake look into this question.
