GO TO ABERDEEN APRIL 18th AND 19th

The Peoples' Realty and Insurance Company of Aberdeen is giving two auction sales, dated for April 18th and 19th, very extensive advertising. The property they are going to sell on the first day is confined entirely to Aberdeen. The morning will be taken up by the selling of several manufacturing sites and the sale of some of the last remaining choice residence lots in the district near the new \$75,000.00 school building. In the afternoon they are going to sell some colored property in the Berklyn section of Aberdeen.

On the next day—the 19th—"Mid-Towns," their new sub-division midway between Southern Pines and Aberdeen on the State Highway, will be offered in lots and tracts. Negotiations are now under way for the hard surfacing of this highway which will mean that the sub-division will get the full benefit of it. It will not be long until both sides of the highway will be built up between Southern Pines and Aberdeen and there will be a great demand for these "Mid-Towns" lots and tracts in the next few years. They are a good investment from a speculative standpoint and appeal right now to the man who

 Notary Public.

My commission expires July 22, 1923.

does not like to pay a tribute in the way of taxes, etc, for the privilege of living in a town or who wants more room than he can afford to own in a town.

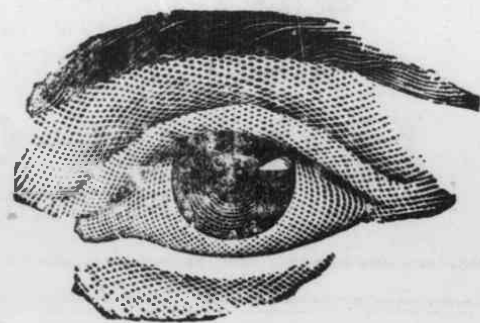

Perhaps if the Vass citizen who makes a garden would try to raise weeds instead of vegetables some vegetables would accidentally come up and crowd them out.

The worst mistake the man who marries a widow can make is to tell her what good pies his first wife made.

BETTER START EARLY

The time to keep disease-carrying flies out of the house is before they get in. And in view of the fact that but a few weeks will elapse until these pesky creatures will be coming down on Vass in swarms, a suggestion along this line is most timely. Put up the screens or the mosquito bar now, instead of putting it off until the house is so full of flies that you are forced to do it in self-protection. You've time, too, to mend any breaks there may be in the screening, or to

give them a good coat of paint if it will improve the appearance. But start this good work early, and let us see if we can't, by giving the house fly the hardest battle he ever had, keep down the amount of sickness in our community the coming summer. Let's try to make this the healthiest summer we have ever had in the history of this community.

With the arrival of warmer weather we would caution our readers against eating fast. It sets a bad example for the flies and mosquitoes.

Endurance Test of Pee Gee Mastic Paint

This house—one of the finest in Toledo—was painted several years ago with Pee Gee Mastic Paint.

Instead of repainting it, the owner had it washed at two different times. The results surprised even the experienced painters, as the paint stood this rigid test perfectly.

Only a paint that produces a tile-like film, such as Pee Gee Mastic Paint, can be successfully washed.

This exceptional durability of Pee Gee Mastic Paint is the result of purest and highest grade materials. A full 50% of Zinc ground in genuine Linseed Oil and White Lead goes into the making of Pee Gee Mastic Paint.

It is the most economical paint for you to use on account of its great covering capacity and long years of service.

For every surface that needs protection specify
