Time To Consider Fertilizers

Beyond a doubt the farmer is nearer controlling the fertilizer situation this spring than in a long time.

To begin with prices are lower than for years. The fertilizer factories have had their troubles, and they are making extraordinary efforts to lower prices to stimulate sales.

But they are doing more than that. Or at least some of them are. They are making better goods. Each year teaches the farmer and the factory some new things about fertilizers, and about the materials from which to make them. As a result the farmer gets better fertilizers if he buys from the right sources.

THE PINEHURST WAREHOUSES, Pinehurst, N. C.

Have always demanded the best that could be obtained. Here the factory is never asked the price of its goods until the quality is determined. The Pinehurst Warehouses never cared to sell anything because it is cheap. The first requisite is that it shall be good. Then the price can be discussed. There is no great mystery about fertilizers. The chemist can readily tell the value of the goods offered him, and the source of supply from which the materials came.

With the quality we have been able to secure for this season, and the prices low as they are we offer the farmer a supply that he cannot afford to overlook.

Mixed Goods, Special Mixtures for particular crops, Phosphate, Potash and Ammoniated Materials.

Nitrate of Soda, Cotton Seed Meal, and other supplies for mixing. You can't afford to make your spring contracts without seeing

THE PINEHURST WAREHOUSES. ANOTHER THING IS SEEDS.

Fertilizer and work are wasted unless you have good seed. To make good crops you need good seed. We have Field and Garden Seed, Selected Seed Corn, the Best Types of Cotton Seed, of the right quality, like everything else at the Pinehurst Warehouses, and at the right price.

Fencing of All Kinds, Cattle, Hog, Poultry, Garden Anything to confine Farm animals and fowls, or to turn them from where they should not be.

The best we can find in the markets, and at a living price.
