

## Our Gratitude

To the people of this community for their patronage since the start of our little decorating business. Because we have your interest (and our success) at heart we've spent the past eight months in New York City and other centers of interest to learn the newer methods and trends in making draperies, slip covers, dressing table skirts and upholstery. Now we can assure you that the interiors of your homes will be well designed and the decorating more ably executed in a skilled and tasteful manner.

Boy! were you proud of that first Electric Range? It was the envy of the entire neighborhood. And it cost you almost \$300.

Today....

A much better Electric Range costs less than 1/2 as much... and the operating cost is also less than 1/2 what it was in 1924. Electric Cookery is

a bargain in health protection, leisure, actual cost and operation. As your use of Electricity has increased, our Company, and the industry as a whole, has responded with better service and more efficient equipment at greatly reduced costs.
