Where will you be at 55-60 or 65?

STATISTICS show that out of 100 average, healthy men starting together at the age of 25, 36 will be dead before reaching the age of 65. One will be rich, 4 will be well-to-do, 5 will be self-supporting and 54 will be dependent upon relatives, friends, or public charity. Five will be retired—living happy, carefree and comfortable lives on an income they cannot outlive. If you would like to be a member of this last-named select group—let us explain the Jefferson Standard SELF-PENSION Plan today.
