Safecrackers Loot Hoffman Post Office

Robbers, following up stamp-buying soldiers, cracked the safe at the Hoffman post office last Friday night and got away with about \$1,200 in cash and stamps, according to Richmond county officers.

Although reports were that the safe-crackers also attempted to penetrate a robbery in Southern Pines the same night, Police Chief Ed Newton said no such attempt was made to his knowledge.

Richmond County officers said the safe was blown after Postmaster Tilley left about 10 o'clock Friday night and that it was Saturday morning before the theft was discovered. Around \$950 in stamps and \$250 in cash was taken from the maneuver-rich little post office, it was said.

BUICK BUILDS FOR DEFENSE
Our assignments:
Building
Pratt & Whitney
colson-in-head
aircraft engines
for defense use.

ANY way you look at it, there's a long, long trail ahead of the next car you buy.

So in spite of all the sleek good looks and trim beauty this Buick has to recommend it, we frankly say: Better look a little deeper than sheer appearance.

The type of engine your next car has will have a lot to do with how efficiently you use the gasoline you buy.

And Buick's engine is not only more efficient because it is a valve-in-head, but also because it's a FIREBALL straight-eight that squeezes extra power from every rationing of fuel.

Here's a drive-shaft that is a simple,

sturdy steel rod, encased all the way from transmission to axle in a stout torque tube.

Buick springs—all-coil springs—never lose their liveliness.

Buick connecting rods are sturdier. Buick main bearings go twice as long under equal loads. Even Buick wheels help get maximum mileage out of tires.

In a word, here's an out-of-the-ordinary car for out-of-the-ordinary times.

So don't be satisfied to look—don't even be content to listen; go try this Buick—thoroughly!

These days you need the best you can buy—and these days that's Buick.
