July Weather Breaks No Records But

Is Rainy and Delightfully Cool

MONTHLY SUMMARY NO. 228⁸
By Charles Macaulay

"For the rain it raineth every day" or so it seemed in the sodden Sandhills, but as a matter of fact we had less rain and twice as many clear days as in July of 1943, when rainfall and cloudy days broke two records. With the exception of a few days the month was delightfully cool, the average temperature falling 3.8 degrees lower than the long time normal average.

Sixteen days were all clear, eleven days partly cloudy, four days cloudy and fifteen days or nights receiving more or less rain. The month was cool, six days registering 90 or more degrees with a high of 94 degrees on the 27th. Rainfall was erratic, heavy showers falling for a few hours in localized areas. Total precipitation for the month was 10.13 inches, 2.78 inches more than the normal expectation. The heaviest rainfall occurred on the 14th when 3.80 inches of rain was recorded, most of which was precipitated between two and three o'clock in the afternoon. Excess for the first seven months of the year is now 15.88

inches. Raleigh reports only 2.31 inches.

The lowest temperature of the month was 55 degrees, registered on July 4th. The holiday was clear with a northeast breeze. St. Swithin's Day, the 15th, gave us scattered showers.

Long time average	Max.	Min.	Aver.
1943	90	67.8	78.9
1944	86.2	68.3	77.2
1944	85	65.1	75.08

FARM BUTTER POINTS UNCHANGED BY OPA

Theodore S. Johnson, Raleigh District OPA director, declared today that farm and processed butter point values are NOT changed in any way—although creamery butter point values have gone from 12 to 16 points per pound.

Re-worked, or processed butter is still four points per pound and farm butter is eight points per pound. Creamery butter is now 16 points per pound.

Restaurants Must Post Ceiling Prices By Aug. 16

By August 16 every eating and drinking establishment in the country is required to post its ceiling prices on 40 basic meals and food items on an official poster supplied by the War Price and Rationing Board, OPA announces. Prices are to be the same as those charged during the week, April 4-10, 1943, except that coffee is to be five cents a cup or pot unless the establishment charged more during the week, October 4-10, 1942.

While ceiling prices on their posters must be week-day prices, those concerns that charged more for Sunday meals may continue such extra charge. Exempt from the regulation under certain conditions are places operated by schools, colleges, fraternities, hospitals, private clubs and recognized charitable, religious and cultural organizations.

WHAT DO YOU MEAN—SACRIFICE?

We speak of sacrifice here in America.

Yet none has the right to unless he has lost an arm or a leg or a life—or a son.

Is rationing a sacrifice? Not until that day when you must leave the table hungry.

Is buying bonds a sacrifice? Not until a gilt-edged security can be called a "sacrifice".

Have you bought enough bonds?

Rationing officials have estimated that black market operations in gasoline have daily drained 2,500,000 gallons from the nation's available supplies.

"It is the duty of every American to see that the war worker has gas enough to get to his place on the production line, that everybody gets his fair share, and that the game is played 'on the square.'" —A Clarke Bedford.
