REMEMBER the story of the Sirens? They sang of their beautiful, trouble-free paradise. But passing ships that ventured too near soon found themselves on the rocks.

Sirens aren't lost in legend—some are still around, still singing a beautiful song: "Unload your troubles and responsibilities on the government's shoulders. Give the government control of this industry—and that service—and your worries are over."

Your liberties are over, too, for that's how a socialistic form of government takes over a nation.

Don't think it can't happen to America. Because right here, right now, there are people who say: "Let the govern

ment control the doctors, the railroads, the newspapers, the electric light and power companies. Government control is good for the people!"

It's strange, but true, that many people who say such things—like most Americans—don't really want a socialistic government. But the effect is the same. When a government controls enough industries and services, a socialistic nation is the result whether people want it or not!

Each time government gains a new control, you lose another freedom. And Americans have more rights and freedoms to guard—or lose—than any other nation on earth. Remember that, when you hear the Siren song. Your freedom is at stake!
