## A Ride Is an Education!

There has never before been a time—since the beginning of the automotive industry—when you could learn as much about motor car performance in a single hour as you can today!

All you need do is slide behind the wheel of a new 1954 Cadillac—and head for the open highway.

That great Cadillac engine introduces you to a new measure of power and performance. It takes even the most challenging hills in easy stride—and sweeps you out of a difficult traffic situation with only the slightest pressure on the accelerator.

Cadillac's improved Hydra-Matic Drive is unbelievably responsive and silken and smooth—and takes you from a standing start to your desired rate of speed in one continuous flow of power.

You guide the car with only a feather-light touch on the wheel. It seems almost to follow the weight of your hand around the corners—and it takes you over the winding highway as if it were reading your mind.

Vision is so wide and clear that a single, sweeping glance acquaints you with traffic on every hand. Braking is unbelievably sure and easy. And you ride in such comfort and quiet that you seem to be resting in your favorite easy chair.

Yes, it's an education to take the wheel of a 1954 Cadillac—an education in all the good and wonderful things of motordom.

So stop in any time—slip into the driver's seat—and head for your favorite stretch of highway. You're in for the greatest surprise of your motoring life!
