**THIS HAZEL REALLY PACKED A WALLOP**

Not since we went into business back in 1908 has our system suffered such wreckage. From deep into South Carolina, across the eastern half of North Carolina to the Virginia line, "Hazel" left a mass of destruction. No part of the area escaped. The damage you see about you has been as bad, or even worse, in approximately three-fourths of the 30,000 square miles of our service area.

**Thanks A Million!**

Through it all you have been wonderful. We thank you for your patient understanding. All of our own line crews, plus crews borrowed from our neighbors to the west in North Carolina, South Carolina and Virginia have worked around-the-clock since the hurricane struck.

Although we are doing everything we can, it will be several days yet before service to everybody has been restored. Be assured that we will continue to do everything we can to make your period of inconvenience as brief as possible.

**New FORD THUNDERBIRD**

**A personal car of distinction ...with Trigger-Torque performance**

You'll be delighted at the wealth of conveniences the Thunderbird offers. Two tops are available: a disappearing fabric top . . . and an easy-to-lift-on hard top. The extra-wide vinyl upholstered seat is foam-rubber-cushioned . . . power-operated 4 ways. Windows roll up . . . by power, if you like. There is a tachometer . . . and a clock with a sweep second hand. There is a telescoping steering wheel. And you can have power steering and power brakes.

Something totally fresh is here—a bewitching new all-steel beauty that sets the styling keynote for other Ford cars to come.

But, styling gives the merest hint of what the Thunderbird has to offer. In traffic and on the open road the Thunderbird's Trigger-Torque performance is literally a revelation. Here is hair-trigger response . . . fleet, liquid agility . . . backed by a reserve of swift, sure power to meet safety's every demand. Trigger-Torque performance stems from Ford's new Thunderbird Special V-8—a high-torque engine with 4-barrel carburetor, dual exhausts, wide-opening valves and Ford's famous low-

friction design. And you can have the Thunderbird with the transmission of your choice—Conventional, Overdrive, or new Speed-Trigger Fordomatic.

Ford's Ball-Joint Front Suspension not only velvet-cushions your ride, it also allows the Thunderbird to handle with utmost ease—to corner with greatest stability.

But, more important, the Thunderbird is the product of the same advanced engineering . . . the same manufacturing skills that have made Ford products so dependable, so value-full and so desirable to so many.
