### FRIDAY, FEBRUARY 18, 1955

"In taking over The Pilot no changes are contemplated. We will try to keep this a good paper. We will try to make a little money for all concerned. Where there seems to be an occasion to use our influence for the public good we will try to do it. And we will treat everybody alike."-James Boyd, May 23, 1941.

### **Give Them Time**

Rome wasn't built in a day and the cease- Chinese proposals had been of course rejected fire in the Formosa area, and what that may mean for the whole critical situation, isn't going to be won easily or quickly.

It will be best if this point is recognized and accepted. For if one thing is certain it is that we shall for many weeks and probably months to come be in the midst of alarms, serious or trifling, as the sides jockey for position, each trying to move ahead without damaging its own prestige and strength.

Yet that each one will move ahead seems to be indicated. At least, as things look right now. sible language. It is understood, now, that ne-There is plenty of sabre-rattling on the part of the Chinese leaders on both sides of the Formosa Strait and it is unlikely that inflammatory statements and even acts will be eliminated entirely from all United States participation in the struggle, but that on both sides there is the desire to avoid major war seems to be very clear.

That, right now, is the point to focus on. We liked the statement of Ambassador Lodge, U. S. delegate to the UN. He said that while the is looking for.

by the Security Council, and with the satisfactory vote of 10-1, the council has not concluded its consideration of the proposal for a ceasefire made by the delegate from New Zealand, Sir Leslie Monroe. "Indeed," said Mr. Lodge, "it has hardly be-

gun to consider it. In these circumstances, we would have done the council and the cause of peace an injustice if we were to allow discussion of the Soviet proposal to becloud the issues of the urgent matter at hand."

That is a sensible attitude expressed in sengotiations will continue but they will be carried on in private session, so to speak, through diplomatic channels. This is a good idea. It should have a quieting effect on peoples and, it is hoped, on leaders now deprived of their oratorical platforms; it should facilitate the bargaining which, we may as well admit, must go on while through personal contacts may be established a basis of sensible human relationship. Out of all that may come what the world

### Secrecy Remains The People's Business

Washington are making efforts to end secret and can be evaded. meetings of committees in the national legislature, just as such meetings have become an issue in North Carolina.

The Pilot stands four-square behind any and all efforts to extend freedom of information on municipal, county, state and national levels. In Raleigh, the House and Senate have repealed their 1953 "secrecy law" that permitted closed sessions of the Appropriations Committee and have substituted "rules"-not lawsthat allow secret meetings now of any commit- to adjournment of the meeting-a violation of tee. This is one step forward and two steps the state statute covering the duties of the backward, as we see it.

We commend Moore Representative Cliff Blue of Aberdeen for his stout championship of open sessions in 1953 and this year. When the matter came up in the House this year, Blue was not there to record his vote, because of a heavy snow storm that held him up on the road, but he made it clear publicly and pri- by the press, as a medium of information, the vately where his convictions lay. Senator Haw- effort for conducting public business in the ley Poole of West End has, we feel, acted un- open is basically the people's business. wisely in voting for the secrecy rule in the Senate. We think Senator Poole voted his hon- the people back it up. est conviction, as he has an obligation and a right to do, but we cannot support him in this action. Secrecy on town and county levels should be the concern of the people, as much or more so than secrecy in Raleigh or Washington. For this reason, we are most interested in how the town council and the county commissioners are handling this problem. The council has an enviable record in this respect. Since the present administration took office in 1953, not a single secret session of the town council has been held. This newspaper has been notified of regular and special meetings, attendance of reporters and the public has been encouraged at all meetings and town officials have been not only willing but cooperative and eager to reveal any and all information about the town and its affairs, when questioned by reporters. \_ At the county level, the picture is not so bright. The commissioners have held some secret sessions, barring reporters, in the past year. Though closed meetings were legalized, ostensibly through error, by the 1953 General Assembly it appears that the guarantee of open sessions of county boards will be restored at the current session in Raleigh. Compliance, of course, depends on local response by county

We note with interest that Congressmen in boards. Law or no law, the guarantee has been

Minutes of the county commissioners are glaringly inadequate. Practically nothing is recorded but the final vote on any matter. Last week, for instance, the board conducted a whole day's business, with but one item recorded on the minutes. The presence of delegations with requests, the nature of the requests and the response of the commissioners, short of a vote, are consistently ignored. The clerk is frequently dismissed from the room prior clerk. Appeals are often made to reporters not to give publicity to some fact or item of information that comes up in meetings.

Lawmakers on all levels of government are, it appears to us, becoming more aware of their legal and moral obligations to guarantee and encourage freedom of information. Though led

heart disease sufferers.

A lively five-year-old boy, Sandy Parker, climbed on Governor Hodges' lap one day last week, to the Governor's obvious delight, and pinned a tiny red heart on his lapel as a gesture of thanks for the Governor's proclamation naming Sunday, February 20, as American Heart Sunday. For Sandy and his parents, Mr. and Mrs. Lee Parker, Jr.,

of Raleigh, this little ceremony was also an expression of their gratitude for the heart research which led to Sandy's recovery from an operation which cured a heart ailment from which he suffered from birth. The text of the Governor's

statement follows: "It is a disturbing fact that diseases of the heart and circulation are responsible for approximately 52 per cent of all deaths in the nation and are the leading cause of death in our State. They also constitute a leading cause of disability and are responsible for a staggering economic loss because of lost productivity

and medical-care expense. "The North Carolina Heart

## **State Withholding Tax?**

The red tape headaches of businessmen and industrialists are sufficiently pervasive at present, without their having to take on more of the same-but we think it makes sense to put state income tax on a withholding basis, like the Federal tax.

A representative of the state revenue department told us recently that perhaps 50 per cent of the people in Moore County who should be paying state income tax aren't paying. He said that gradually, through checking federal income tax returns, state tax men are catching up with these people. But, when faced with a demand for several years back state income taxes, many persons are not able to pay.

If human beings were cast in the perfect mold that they should be, everybody would save enough from income each year to settle federal and state taxes easily. But given the general run of human nature, the "painless" withholding technique is the way to make tax-paying easier for the victim and more lucrative for the government, federal or state.

At this time, when North Carclina is desperately looking for more revenue, withholding of state income tax should be carefully investigated. As a taxpayer, we agree with The Charlotte News which recently summed it up this way: "It is far better to be nipped lightly every pay day, than to be swallowed alive on one or more tax deadlines."

effort will be successful, in the end, only if

# "J. A. P."

Those initials, signed at the end of an article in The Pilot, stood for June A. Phillips. It is hard to realize, it is a very hard thing to accept the fact that this newspaper will not go on carrying articles so signed.

The articles were almost always about one thing. In a broad sense they were about this town of Southern Pines, but in a closer, deeper sense they were about children, about the fact that they were important, that they must be cherished, helped, recognized for what they are: the hope of the world.

The Master said: "Of such is the Kingdom of Heaven." Does it seem a far cry, perhaps even irreverent, to go from that phrase to the accounts of the basketball games and football games, school rallies and sports about which June Phillips used to write? We don't think so. Because of the feelings that were in his heart as he wrote. He insisted that the scoring should be correctly listed, of course, and that every player's name should be entered and that nobody should be left out. But that was just the routine business of writing a good news story ... and he thought a lot about that, for he was a keen reporter. It was what prompted him to write these articles that counted. It was because he understood the full meaning of that sentence up there, and lived it.

June Phillips' interest in the children and young people of this town, in their schooling and their recreation, has meant a very great deal to Southern Pines. We think of the big booming Halloween Party put on by the Rotarians, of which he was the guiding spirit, as he was always a leader in that service organization. We think of his enthusiasm for the school band, for anything that promised good things for the young folks. And we think of the high ideals which he held and which brought him their respect and their devotion.

His was a personality full of gentle charm and whimsical humor, with a depth of friendliness and warmth that once felt can never be forgotten. He was kindly; he had an old-fashioned courtesy and at the same time cheery ocmradeliness that won him a host of friends. He will be deeply missed in this community.

As for his influence over the young people he loved so much it has been deep, so deep that it will be lasting. The finest memorial to June Phillips will endure in the lives of the young people he touched so warmly, so understandingly while he was here.

That is the treasure this good man laid up for himself unconsciously, giving so generously of his time and strength with thought only for them: the young people of Southern Pines whom he loved to work with and to work for.
