

County Dog Pound, Started Just A Year Ago, Proving Good Investment In Rounding Up Stray, Diseased Dogs

Operation Is One Of Two In County Self-Supporting

After little more than a year's operation, the Moore County dog pound seems to be firmly established as a going concern.

W. H. Barber, who operates the pound, said this week that the operation has gone along so far "without a hitch. We feel," he said, "that the pound has more than proven its worth, not only in getting more dogs registered on the tax books, but by making more people conscious of the terrible problem of stray dogs we used to contend with."

The pound was started in March last year at the county home, which had been closed a few months before. Barber, who with his wife had formerly operated the home, was put in charge of the pound and directed to clean up the county of all stray dogs. At that time there were some three to four thousand dogs listed for tax purposes.

Today, there are between six and seven thousand dogs listed and the income derived from the sale of county tax tags will more than pay for the operation of the pound. Along with the airport, the pound is the only self-supporting agency of the county.

Barber constructed four concrete runs adjacent to an old corn crib back of the county home. He was advised by Dr. C. C. McLean, a veterinarian who maintains offices between Pinehurst and Southern Pines, as to the proper type of permanent shelter and runs to build.

"We have what is considered very good quarters for the very good quarters for the im-take excellent care of the ones here. Usually there are between 10 and 15 dogs, mostly mongrels, here at any given time, though we have had as many as 20 at one time. The dogs that we pick up are kept here a minimum of 10 days, the length of time required by law, and we make every effort to find the owner. If the owner can't be found, either because he hasn't missed his dog, or, as is the case most of the time, because he just doesn't want the dog anymore, we then have the dogs put to sleep by a veterinarian."

Barber said that many people visited the pound, some of them looking for their lost dogs and others looking for maybe a nice puppy. "You'd be surprised how many people come out," he said. "On Sundays there seems to be more people than any other time, although we have visitors pretty regularly during the week."

The pound will give a dog to anyone who asks for one, providing they pay the board bill, which is very small, and have the dog listed for taxes. The owner must also have the dog vaccinated against rabies.

"I would like to emphasize that neither the county nor myself have anything against dogs," he said. "We feel that by picking up stray dogs, some of whom have gone wild by being on the loose too long, we are greatly cutting down the chances for an outbreak of rabies. Veterinarians say that most rabies is carried by foxes. And, occasionally, squirrels and cats have been known to

be infected. But, if a dog is running loose and gets bit by a rabid fox, there is no telling just how long it will take to capture the dog. In the meantime, he can infect other dogs."

Barber takes his job quite seriously. He takes calls anytime and will go anywhere in the county to pick up a stray dog. Policemen in the various towns throughout the county have been a constant help to him. Before the pound was started, the usual thing to do when a dog was running loose was to shoot him.

The biggest problem of that procedure was the fact that the policemen never knew whether or not they were shooting a rabid dog and, as it quite often happened, whether they were doing away with a dog that someone really wanted.

"With a pound, you don't run into that sort of thing," Barber said. "We have a definite procedure when we take in a dog. The 10-day waiting period gives us an opportunity to examine the dog for any disease that he may have transmitted to other dogs, and it also gives us plenty of time to find an owner, if there is one."

It is standard procedure of all pounds in the state to send a suspected rabid dog's head to a state-operated laboratory in Raleigh for a complete examination. The results of the examination are usually available within a few days and gives officials time to set up safeguards against the spread of rabies.

Barber said there has only been one case of rabies in the county during the past year. Occasionally Barber has to appear in court—usually before the Justice of the Peace—to prosecute owners who have refused to have their dogs vaccinated. If convicted, owners face a minimum fine of \$10 plus costs.

"Starting this month," Barber said, "we are having a systematic check of all dogs in the county and the owners of those that haven't been registered for taxes will be asked to register them. If they refuse, they will be brought to court and prosecuted. This is the only real way we can keep check of the estimated 9,000 dogs in the county and will, we feel, cut down greatly on the possibility of a rabies outbreak."
