

ONE WEEK CLOSING

Amerotron To Close All Synthetic Fabric Plants Week Of September 3

The Aberdeen, Red Springs and Robbins plants of Amerotron Corporation will be closed for the entire week of September 3-8, it was announced Monday in New York by R. L. Huffines of Pinehurst, Amerotron president.

In announcing the shut-down, which comes during the Labor Day week, Huffines said:

"In a time of great national prosperity, with retail sales proceeding at a satisfactory volume, with raw material prices firm and stabilized, the man-made-fiber business is not returning to its stockholders earnings to compensate them for their investment. It is paradoxical that we are wearing out the most modern and efficient equipment in the industry

without adequate compensation. "Our analysis of the causes underlying this situation are increasing imports and, temporarily, too great a rate of production of these fabrics.

"In the belief our customers will be better served with the knowledge this situation will not continue unchecked and the belief our employees and raw material suppliers will profit, long term, by steadier and more regular operations, resulting from better control of production in relation to demand, Amerotron Corporation, one of the largest producers of synthetic fabrics of all types, announced it will close all of its synthetic fabric plants the entire week of September 3."

PINEHURST NEWS
