

The 1956 lima bean crop in North Carolina is expected to total 98,000 bushels or 6,000 bushels less than as harvested last year. Yield this year is estimated at 75 bushels per acre as compared to 90 bushels in 1955, say marketing specialists with the North Carolina Crop Reporting Service.

Extension cattle marketing specialists at North Carolina State College say the state's 1956 calf crop is estimated at 441,000 head. This number amounts to a decrease of less than one per cent from the 444,000 born in 1955, but it represents over the 1945-54 ten-year average crop of 341,000.

From the road up, 1957 Fords are a complete departure from previous models. They will be unveiled by Ford dealers in 19 body styles, of which this is the four door Victoria, a member of the new "Fairlane 500" series. Fairlane models are nine inches longer and four inches lower than their 1956 counterparts. Though the new models are lower, interior headroom is as great as last year, since the car's chassis and floor are re-designed for a lower center of gravity.

### New Fords To Be Shown At Jackson Motors Wednesday

Ford's 1957 line, which will be unveiled here at Jackson Motors, Inc., on Highway 1 South next Wednesday, introduces 19 entirely new body styles in five series, and features three different body sizes on two redesigned chassis lengths.

The "hardtop convertible" styling formerly available only in Ford's Victoria models set the trend for design of all the closed bodies in the new Fairlane 500 and Fairlane series. The biggest Ford body—more than nine inches longer and four inches lower than 1956 models—is available in the Fairlane and Fairlane 500 series.

There are five models in the Fairlane 500 series, Ford's top line. They are the two-door Club Sedan, the four-door Town Sedan, the two-door Club Victoria and four-door Town Victoria hardtops.

The Fairlane models include the two-door Club Sedan, four-door Town Sedan and the two-door Club Victoria and four-door Town Victoria hardtops.

A separate body shell is used on the Custom and Custom 300 series models, which are more than three inches longer and three inches lower than comparable 1956 models.

The Custom 300 series includes the two-door sedan and four-door sedan, while the economy Custom series has the two-door business sedan, the two-door sedan and the four-door sedan.

There are five models in Ford's station wagon series for 1957. The Ranch Wagon and Del Rio Ranch Wagon are two-door, six-passenger models. The six-passenger Country Sedan, the nine-passenger Country Sedan, the nine-passenger Country Squire are four-door models.

Station wagons also have a separate body shell, which is nearly six inches longer and three and a half inches lower than 1956 models.

Several of the new models will have engines capable of developing 245 horsepower, with a kit that will boost the horsepower to 265.

Jackson Motors will have four different body styles for the showing Wednesday.
