Trimming the Christmas Tree? Heed Safety Council Warnings

Don't risk seeing stars when you try to hang a star on the top of your Christmas tree. This warning comes from the National Safety Council, because Christmas accidents contributed to the 14,000 deaths from home falls last year.

Use a steady stepladder, place it as close to the tree as possible, and be careful when you reach for the farthest branch.

The Council points out that the holiday season brings many fall hazards—placing decorations, toys underfoot, boxes and wrappings laid "temporarily" on stairs, slippery walks outside.

Another danger of the holiday season is fire.

"The Christmas tree, filled with natural pitch and resin, is one of the most combustible objects known," the Council says, "and it can burn so quickly it is almost impossible to extinguish the flames by ordinary methods. In case of fire, call the fire department immediately."

To help prevent Christmas tree fires, the Council offers eight simple precautions:

1. Buy a fresh tree. Be wary of trees sold as "fireproof." And don't attempt to flameproof Christmas trees with chemical solutions.

2. Keep your tree in a cold place until ready to use it. Before setting up the tree, saw off diagonally at least an inch of trunk and place base in water-containing holder. Keep water reservoir filled.

3. Locate tree well away from fireplace, radiators, television sets, powerful electric lights and other sources of heat.

4. Use only electric lights, and be sure they bear the Underwriter's Laboratories label. Check wires for defects and loose sockets before putting on tree.

5. Too many light circuits on one outlet may overload house wiring and blow a fuse. Reduce the load if this happens, or connect part to another circuit outlet. Never increase size of fuse, or substitute a penny for a blown fuse.

6. Be sure ends of metallic icicles or other decorations do not dangle into light sockets where they can cause a short circuit and flash fire.

7. Do not operate electric trains or other electrical toys, which may spark, under tree.

8. Take tree down when

needles start to fall. Dispose of old trees in fire-safe areas outdoors—never in furnaces, stoves or fireplaces, because they burn with almost explosive violence.

School Cafeterias
