

Equipment For New Aberdeen Plant To Be Installed Soon

J. Cecil Beith, manager of the Aberdeen division of A. & M. Karagheusian, Inc., recent purchaser of the Amerotron plant in Aberdeen, said this week that equipment for the new plant will begin arriving early in May, and that a training program will begin as quickly as possible after that.

He said that prospective workers from throughout the Sandhills are encouraged to visit the plant and make applications for employment.

"After talking with scores of people who have applied for positions during the past few weeks," he said, "we're convinced that the people in Aberdeen are just the kind we need to fill the hundreds of interesting jobs that we'll soon have to offer."

More than 500 applications have already been filed at the plant, it was learned.

At the same time Beith said the company would do "everything possible to justify your acceptance of A. & M. Karagheusian in Aberdeen." He added that it was a company policy to purchase as many supplies as possible locally.

The equipping and training period for the manufacture of velvet carpeting in the plant will probably extend over a nine months period, he said.

Blue Legislation: Examining Board For Psychologists

A bill to "create a Board of Examiners for psychology, to give examinations and to certify psychologists" was introduced Tuesday in the General Assembly, bearing the signatures of Rep. H. Clifton Blue of Moore County, Rep. John Umstead of Orange, and Reps. E. K. Powe, Jr., and George Watts Hill of Durham.

A similar bill is expected to be introduced in the Senate over the signatures of Senators J. Benton Thomas and Henry Jordan of this district.

The bill is sponsored by the North Carolina Psychological Association and is patterned after the New York State law, passed last year and regarded as a model. Both are based on points of agreement worked out by the American Psychological Association and American Psychiatric Association.

As a certifying, rather than a licensing bill, it is expected to arouse little opposition from the state's various medical groups which have opposed licensing bills in the past. The bill primarily sets up standards of education and training rather than defining practice.

Blue said that clinical, or private, practice of psychology is only a small branch of the profession in North Carolina as yet. But with the rapid growth of the profession of psychology in recent years, North Carolina included, and the insufficiency of trained psychologists, there are many who feel that certain standards should be established. At present there are no laws in the state governing the practice of psychology.
