WILL CHILDHOOD BE THE ONLY FREEDOM THEY WILL KNOW?

Personal freedom can slip away a little at a time, as quietly as children grow. It can be destroyed by forces from within our borders. Subtle forces—like the steady expansion of the federal government in business, and the effect it has upon our daily lives.

Already our federal government owns many thousand businesses, from bakeries to saw-mills. In the field of electricity alone the output of federally owned plants has risen from less than 1% of the industry's total in 1935 to more than 15% today. And advocates of government-in-business press constantly for more.

They advocate a dangerous course. When any government owns business, it can control both goods and jobs. It adds economic powers to its vast political powers. When it does that, it can tell you where to work, where to live, even what to do or say. Then freedom has slipped quietly away.

More government-in-business could rob our children of the self-reliance they have just begun to learn. And it could rob them of the freedom which they still enjoy.

CAROLINA POWER & LIGHT COMPANY
An investor-owned, tax-paying, public utility company

Hunting and fishing are big business in the nation and in North Carolina. Yet, the landowner who controls virtually all the small game hunting territory and much of the fishing water, has realized little benefit from his resources.
