The House of Windsor.

George V. has renamed the Royal Family. Its German origins, the German language or accent of some of its members, are familiar enough. The House of Hanover, the books used to call it. It has a thin strain of Stuart blood, and there is Danish in the contemporary members.

If Lloyd George seems a little more out of place than, say, the Archbishop of Canterbury at the meeting of the Privy Council where the unnamings and renaming were announced and approved, we are to remember that the King as a symbol of British unity is useful, beloved, permanent, during good behavior, the historical decoration of a mighty democracy.

Windsor, the view from the north terrace of the Castle, the shining river, Eton, the great park where flourish trees of the ancient royal forest where William the Conqueror hunted, are old friends of Americans innumerable. Splendors of history, architecture, of art, are there, but the sense of continuity, of ancientness, is perhaps the prevailing impression Windsor gives. The Anglo-Saxon Kings had a fortress there. There for hundreds of years has been the main home of the English Kings. There, where King Arthur, in the legend sat among the Knights of the Table Round, Edward III, built the Castle for the meeting of the Knights of the Garter. King George has chosen a venerable name for his house. Mr. Kipling irreverently anticipated him in "Ere's to the Widow at Windsor!"

There's never a burden so heavy That it might not be heavier still; There is never so bitter a sorrow That the cup could not fuller fill. —Helen Hunt Jackson.
