

AMERICAN SUGAR SENT TO FRANCE

American Price Rigidly Regulated by United States Food Administration.

CONSUMERS HERE PAY 9c.

Sugar Cost 35 Cents a Pound During Civil War—Refiners' Profits Now Curtailed.

Sugar is selling today throughout America at from 8 1/2 to 9 cents a pound to the consumer, even though there is a world shortage which has reduced this nation's sugar allotment to 70 per cent. of normal.

Through the efforts of the United States food administration the sugar market has been regulated as far as the producer, refiner and wholesaler is concerned. The food administration has no power to regulate retail prices except by public opinion. Even though more than 85,000 tons of sugar have been shipped to France in the last four months the retail grocer's sugar price is around 8 to 8 1/2 cents. He should sell this sugar at 8 1/2 to 9 cents, the food administration believes, and asks the American housewife to pay no more than this amount.

Last August when the food administration was organized the price of sugar rose suddenly to 11 cents a pound. During the Civil War sugar cost the consumer 35 cents a pound. By regulation of the sugar market and reducing the price to 8 1/2 and 9 cents and keeping it from advancing to 20 cents the food administration has saved the American public at least \$180,000,000 in four months, according to a statement made by Herbert Hoover the other day.

"It is our stern duty to feed the allies, to maintain their health and strength at any cost to ourselves," Mr. Hoover declared. "There has not been, nor will be as we see it, enough sugar for even their present meagre and depressing ration unless they send ships to remote markets for it. If we in our greed and gluttony force them either to further reduce their ration or to send these ships we will have done damage to our abilities to win this war.

"If we send the ships to Java for 250,000 tons of sugar next year we will have necessitated the employment of eleven extra ships for one year. These ships—if used in transporting troops—would take 150,000 to 200,000 men to France."

Reason for World Shortage.
As Mr. Hoover pointed out, the United States, Canada and England were sugar importing countries before the war, while France and Italy were very nearly self supporting. The main sources of the world's sugar supply was Germany and neighboring powers, the West Indies and the East Indies. German sugar is no longer available, as it is used entirely in Germany, which also absorbs sugar of surrounding countries.

England can no longer buy 1,400,000 long tons of sugar each year from Germany. The French sugar production has dropped from 750,000 to 210,000 tons. The Italian production has fallen from 210,000 tons to 75,000 tons. Thus three countries were thrown upon East and West Indian sources for 1,925,000 tons annually to maintain their normal consumption.

Because of the world's shipping shortage the allied nations started drawing on the West Indies for sugar; East Indian sugar took three times the number of ships, since the distance was three times as great. Suddenly the west was called on to furnish and did furnish 1,420,000 tons of sugar to Europe when 300,000 tons a year was the pre-war demand. The allies had drawn from Java 400,000 tons before the shipping situation became acute.

"In spite of these shipments," Mr. Hoover stated the other day, "the English government in August reduced the household sugar ration to a basis of 24 pounds per annum per capita. And in September the French government reduced their household ration to 13 2-10 pounds a year, or a bit over 1 pound of sugar a month. Even this meagre ration could not be filled by the French government it was found early in the fall. America was then asked for 100,000 tons of sugar and succeeded in sending 85,000 tons by December 1. The French request was granted because the American household consumption was then at least 55 pounds per person, and it was considered the duty of maintaining the French morale made our course clear."

Today the sugar situation may be summarized by stating that if America will reduce its sugar consumption 10 to 15 per cent. this nation will be able to send 200,000 more soldiers to France.

Sugar today sells at seaboard refineries at \$7.25 a hundred pounds. The wholesale grocer has agreed to limit his profit to 25 cents a hundred plus freight, and the retail grocer is supposed to take no more than 50 cents a hundred pounds profit. This regulation was made by the food administration, which now asks the housewife to reduce sugar consumption as much as possible, using other sweeteners, and also reminds her that she should pay no more than 9 cents a pound for sugar.

Control of Cane Refiners' Profits.
"Immediately upon the establishment of the food administration," Mr.

Hoover said, "an examination was made of the costs and profits of refining and it was finally determined that the spread between the cost of raw and the sale of refined cane sugar should be limited to \$1.30 per hundred pounds. The pre-war differential had averaged about 85 cents and increased costs were found to have been imposed by the war in increased cost of refining, losses, cost of bags, labor, insurance, interest and other things, rather more than cover the difference. After prolonged negotiations the refiners were placed under agreement establishing these limits on October 1, and anything over this amount to be agreed extortionate under the law.

"In the course of these investigations it was found by canvass of the Cuban producers that their sugar had, during the first nine months of the past year, sold for an average of about \$4.24 per hundred f. o. b. Cuba, to which duty and freight added to the refiners' cost amount to about \$5.68 per hundred. The average sale price of granulated by various refineries, according to our investigation, was about \$7.50 per hundred, or a differential of \$1.84.

"In reducing the differential to \$1.30 there was a saving to the public of 54 cents per hundred. Had such a differential been in use from the 1st of January, 1917, the public would have saved in the first nine months of the year about \$24,800,000."

Next Year.
With a view to more efficient organization of the trade in imported sugars next year two committees have been formed by the food administration:

1. A committee comprising representatives of all of the elements of American cane refining groups. The principal duty of this committee is to divide the sugar imports pro rata to their various capacities and see that absolute justice is done to every refiner.

2. A committee comprising three representatives of the English, French and Italian governments; two representatives of the American refiners, with a member of the food administration. Only two of the committee have arrived from Europe, but they represent the allied governments. The duties of this committee are to determine the most economical sources from a transport point of view of all the allies to arrange transport at uniform rates, to distribute the foreign sugar between the United States and allies, subject to the approval of the American, English, French and Italian governments.

This committee, while holding strong views as to the price to be paid for Cuban sugar, has not had the final voice. This voice has rested in the governments concerned, together with the Cuban government, and I wish to state emphatically that all of the gentlemen concerned as good commercial men have endeavored with the utmost patience and skill to secure a lower price, and their persistence has reduced Cuban demands by 15 cents per hundred. The price agreed upon is about \$4.60 per hundred pounds, f. o. b. Cuba, or equal to about \$6 duty paid New York.

"This price should eventuate," Mr. Hoover said, "to about \$7.30 per hundred for refined sugar from the refiners at seaboard points or should place sugar in the hands of the consumer at from 8 1/2 to 9 cents per pound, depending upon locality and conditions of trade, or at from 1 to 2 cents below the prices of August last and from one-half to a cent per pound cheaper than today.

"There is now an elimination of speculation, extortionate profits, and in the refining alone the American people will save over \$25,000,000 of the refining charges last year. A part of these savings goes to the Cuban, Hawaiian, Porto Rican and Louisiana producer and part to the consumer.

"Appeals to prejudice against the food administration have been made because the Cuban price is 34 cents above that of 1917. It is said in effect that the Cubans are at our mercy; that we could get sugar a cent lower. We made exhaustive study of the cost of producing sugar in Cuba last year through our own agents in Cuba, and we find it averages \$3.39, while many producers are at a higher level. We found that an average profit of at least a cent per pound was necessary in order to maintain and stimulate production or that a minimum price of \$4.37 was necessary, and even this would stifle some producers.

"The price ultimately agreed was 23 cents above these figures, or about one-fifth of a cent per pound to the American consumer, and more than this amount has been saved by our reduction in refiners' profits. If we wish to stifle production in Cuba we could take that course just at the time of all times in our history when we want production for ourselves and the allies. Further than that, the state department will assure you that such a course would produce disturbances in Cuba and destroy even our present supplies, but beyond all these material reasons is one of human justice. This great country has no right by the might of its position to strangle Cuba.

"Therefore there is no imposition upon the American public. Charges have been made before this committee that Mr. Rolph endeavored to benefit the California refinery of which he was manager by this 34 cent increase in Cuban price. Mr. Rolph did not fix the price. It does raise the price to the Hawaiian farmer about that amount. It does not raise the profit of the California refinery, because their charge for refining is, like all other refiners, limited to \$1.30 per hundred pounds, plus the freight differential on the established custom of the trade.

"Mr. Rolph has not one penny of interest in that refinery."

CORN WILL WIN DEMOCRACY'S WAR

America's Greatest Cereal Crop Is Now Moving to Market.

MAINSTAY IN NATION'S CRISIS.

Surplus Wheat of the United States Has Been Sent to Famine Threatened Europe.

America's great corn crop, exceeding 3,000,000,000 bushels, will save the world's food situation, officials of the United States food administration believe.

Corn is the nation's best food cereal, housewives are beginning to realize. It contains all the elements needed to keep the body in a state of health and when used according to the scores of tried recipes, especially when combined with an added portion of oil or fat, will sustain life indefinitely. Indian warriors in colonial days lived on parched corn alone for many days at a time, and at Valley Forge parched corn was at times the sole ration of the Continental soldiers.

Owing to transportation difficulties caused by the war the corn crop moved more slowly to market this year than ever before. Now, however, the cereal is reaching the millers and consumers. In the meantime the nation's surplus wheat has been sent to Europe.

Today there are approximately 30 bushels of corn for every American. This quantity is greater by five bushels than in former years.

Corn has become the nation's mainstay in the crisis of war.

Just as this cereal saved the first American colonists from famine on many occasions, just as it served as a staple food during the War of the Revolution and during the Civil War, King Corn has again come to the front in the nation's battle with autocracy.

Corn meal is finding greatly increased use in the making of ordinary white bread. Hundreds of housewives and many of the larger bakers are mixing 20 per cent. corn meal with wheat flour to make leavened bread. This kind of a mixture is worked and baked in the same recipes and with the same methods that apply to straight wheat bread.

Corn bread—using corn meal entirely—is gaining a greater popularity than ever before. Housewives are coming to realize that every pound of wheat saved in America means a pound of wheat released for shipment to the nations with which America is associated in the war.

There are a score of corn products that today possess unusual importance for Americans. Corn syrup for sweetening corn cakes and buckwheat cakes and for use in the kitchen instead of granulated sugar is one of the leading products made from corn.

Corn oil, excellent for frying and for every other purpose filled by salad oils, is appearing on the market in large quantities. It comes from the germ of the corn.

MADE-IN-GERMANY LIES CIRCULATED IN CANADA

Canada is also having trouble with Made-in-Germany lies calculated to hinder Canadian food conservation according to an official statement received from the Canadian food controller by the United States food administration.

The stories bothering Canada are of the same general character as those the United States food administrator recently denounced in this country, such as the ridiculous salt and blueing famine fakes and the report that the government would seize housewives' stocks of home canned goods.

The Canadian food controller estimates that when the people listen to and pass on such stories, each one has the power of destruction that lies in a battalion of soldiers.

"Stories without even a vestige of foundation have been scattered broadcast," said the Canadian statement. "Nor have they come to life casually. They have started simultaneously in different parts of the country and in each instance have been calculated to arouse public indignation.

"They are insidious, subtle, persistent. Bit by bit they dissipate public trust, the great essential in the work of food control.

"It lies with every individual to forbear from criticism; to refrain from passing on the vagrant and harmful story, and thus the more effectively to co-operate in work which is going to mean more than the majority of people yet realize."

THE UNITED STATES FOOD ADMINISTRATION SAYS:

There is no royal road to food conservation. We can only accomplish this by the voluntary action of our whole people, each element in proportion to its means. It is a matter of equality of burden; a matter of minute saving and substitution at every point in the 20,000,000 kitchens, on the 20,000,000 dinner tables, and in the 2,000,000 manufacturing, wholesale and retail establishments of the country.

NEED 37,500 NURSES

1,000 Per Cent Increase Is Sought by Government.

Nurses Being Called for Duty to Meet Needs of the United States Army.

Washington.—Thirty-seven thousand five hundred nurses will be needed in the army nurse corps of the medical department, according to present estimates based on an army of 1,500,000 men. The present strength of the corps is about 3,800. Increasing the enrollment by nearly 1,000 per cent in a year is the task confronting the corps.

Daily numbers of nurses are being called for to meet immediate needs in army hospitals in the United States and for duty overseas. The present rate of enrollment does not meet the demands. Hospitals at National Guard and National army camps still need 271 nurses to bring the quotas of all up to the minimum considered necessary—65 each.

In order to get the enrollments up to the needed number some of the requirements heretofore imposed are being waived. According to estimates of the nursing committee of the general medical board of the council of national defense, there are between 80,000 and 90,000 registered nurses in the country and about 200,000 other graduate and practical nurses.

Just as soon as immediate needs of cantonment hospitals have been cared for a reserve of 100 nurses will be organized for emergency service in the United States. Lakewood hotel, Lakewood, N. J., has been leased by the government for use as a general hospital for the army and provisions will be made for housing the reserve nurses there. This hotel has not yet been turned over to the war department, but will be in a week or so. The necessary alterations will be made as soon as practicable and the 100 nurses for the reserve will be needed in addition to the permanent nursing staff of the hospital.

WHAT? BAKE BEANS SANS PORK? IT CAN'T BE DONE

Boston.—After acquiescing in "meatless Tuesdays and Fridays" and "lightless Thursdays and Sundays," the housewives of this city are rebelling against "porkless Saturdays." They are willing to forego roasts of pork, chops and ham and even bacon, but—

How can one cook the famous Puritan standby, baked beans, without the generous cut of pork snugly nestling in the dish?

It can't be done. So baked beans with the pork graces many a supper table these Saturday nights, and they will right along until Washington sets its inventive geniuses to work solving the question of porkless baked beans.

SENDS ONLY SON TO WAR

Widow in Straitened Circumstances, Sacrifices Her Sole Support in Cause of Humanity.

Denver, Colo.—Although widowed and in straitened circumstances, Mrs. Clara Doss Burrows, one of the few living descendants of the famous Adams family, urged her only son, Earl Gardner Doss, to enlist for service in Uncle Sam's fighting forces.

The young man is now at the Mare Island Marine corps training station.

Young Doss' great-grandfather, Elijah Adams, was among the leaders of the Mohawks, who staged the historic "tea party" in Boston Harbor just prior to the Revolutionary war. His grandfather, Gardner Adams, was a cousin of President John Quincy Adams, and fought in the United States navy throughout the war of 1812. The boy's uncle, another John Quincy Adams, brother of Mrs. Burrows, was with the Union forces in the Civil war.

Mrs. Burrows sacrificed her sole support when young Doss enlisted, but, although she is aged, she declared she would "manage to survive," and was proud that her son had voluntarily offered his services in the cause of humanity. "An Adams couldn't do less," she said.

PARROT SCARES BURGLAR OFF

Raucous Voice From an Adjoining Room Causes Negro to Take to His Heels.

Trenton, N. J.—Rebecca Girman was reading comfortably in the parlor. She heard shambling, heavy footsteps on the icy porch, and the bell jingled peremptorily.

As the woman opened the door in response to the ring, a negro roughly pushed her aside, flung pepper into her eyes, and leveled an automatic gun at her.

"Just one yell and I shoot!" he warned her.

"What language! What language! Leave the room, leave the room instantly!" yelled a raucous voice in the next room.

The negro obeyed in all haste and has not been seen since, although the police have been hunting for him. The voice which frightened him away was a parrot's.
